CASH TO COMPANY

Item Bank

"Leadership, sales, and execution"

Per-unit quiz / test items · 4 units · ETS-quality alignment to Jump$tart, CEE, CCSS, C3, CASEL, NGSS

Grade 11 — Cash to Company Item Bank

Year theme: *Leadership, sales, and execution.* This bank covers all four Grade 11 units (Leading without authority · Sales is structured listening · The cash flow truth · Execute under uncertainty). Items use BMC, unit-economics, and runway scenario style. Distractors target the Grade 11 Common Misconceptions table. No family-money probes; "for a hypothetical" framing throughout. Cash's Grade 11 voice: "*Profit is an opinion. Cash is a fact.*"

Unit 1: Leading without authority

MC1. "Leading at 16 with no positional power is mostly..."

A. Charisma · B. Clarity, follow-through, and earning trust over time · C. Volume · D. Title

Answer: B · **Standard:** *CASEL Relationship Skills — Conflict management, leadership.* · **Strand outcome (LTO, 11):** *I can lead a 3-person team through a 4-week project with a written team charter, weekly 1:1s, and a final retrospective.* · **Misconception targeted:** "*Leadership is charisma*" — corrects directly.

MC2. "A team CHARTER does NOT typically include..."

A. The goal · B. Roles · C. How decisions get made · D. Each team member's GPA

Answer: D · **Standard:** *CCSS-ELA SL.11-12.4 — Present information.* · **Strand outcome (LTO, 11):** *I can lead a 3-person team through a 4-week project with a written team charter, weekly 1:1s, and a final retrospective.* · **Misconception targeted:** "*A charter = bio sheet*" — corrects.

MC3. "In a 4-week sprint, weekly 1:1s exist to..."

A. Check on the work · B. Surface blockers, recalibrate priorities, and listen · C. Give compliments · D. Reassign

Answer: B · **Standard:** *CASEL Relationship Skills.* · **Strand outcome (LTO, 11):** *I can lead a 3-person team through a 4-week project with a written team charter, weekly 1:1s, and a final retrospective.* · **Misconception targeted:** "*1:1 = status report*" — corrects.

SA1. "Write a team charter for a 3-person, 4-week venture sprint. Cover: goal, roles, decision rule, communication norms, definition of done."

Model answer: "*GOAL: Validate or kill the school-merch venture by Week 4 with 25 paying customers OR <5 customers + clear cause. ROLES: A leads design + product; B leads sales + customer interviews; C leads ops + finance tracking. DECISION RULE:*

Spend over $25 OR scope changes require written majority (2/3); below, role owner decides. COMMUNICATION: Async daily Slack standup (Did/Doing/Stuck); 30-min team meeting Monday; 15-min 1:1 (lead with each member) Wednesday. DONE: a feature is 'done' when it's tested with at least 2 customers + their reaction logged."

Scoring guide (3-2-1): - **3:** All 5 elements specific with concrete numbers and norms. - **2:** All 5 with one vague. - **1:** Missing 2+.

SA2. "After a 4-week sprint, write a final retrospective in 3 sections: what went well (2), what didn't (2), what we'd carry forward (2). Each item specific."

Model answer: "*WENT WELL: (1) Wednesday 1:1s caught 2 blockers before they ate the week (supplier slip, exam-week scheduling). (2) Decision rule prevented 1 scope creep (a feature add that wasn't customer-validated). DIDN'T: (1) Customer-interview burden landed all on B; she burned out by Week 3. (2) We didn't pre-commit to a kill-criteria — we kept iterating past where data said stop. CARRY FORWARD: (1) Distribute customer interviews 1+ per teammate per week. (2) Pre-commit kill criteria in the charter, not at week 3.*"

Scoring guide (3-2-1): - **3:** All 6 items specific (no vibes). - **2:** 5 of 6 specific. - **1:** 4 or fewer.

Performance Task: Team Charter + 4-Week Sprint with Logs (4 weeks).

Child writes a team charter, leads a 3-person team through a 4-week project, runs weekly 1:1s (logged), and produces a written retrospective. **Rubric:** Pitch Presentation Rubric (Grade 11) + Reflection Writing Rubric: (1) charter complete, (2) 4 weeks of 1:1 logs documented, (3) retro names ≥6 specific items, (4) one carried-forward change committed for next sprint. **Strand outcome:** LTO + LRCI.

Extension (advanced learner):

"*A teammate consistently misses commitments but is technically your best engineer. Write the script for the conversation that addresses this without losing them or losing trust.*" Anchors hard conversations; carries CASEL.

Unit 2: Sales is structured listening

MC1. "In a 5-step structured sales conversation (open, discover, present, handle one objection, close), the LARGEST share of time should go to..."

A. Open · B. Discover · C. Present · D. Close

Answer: B · **Standard:** *CCSS-ELA SL.11-12.4.* · **Strand outcome (CBM, 11):** *I can run a structured sales conversation (open, discover, present, handle one objection, close) in a role-play and self-score against a rubric.* · **Misconception targeted:** "*Sales is about closing*" — corrects directly.

MC2. "An objection is best handled by..."

A. Defending the product · B. Listening to the underlying concern, naming it, and addressing it with evidence · C. Pivoting to a different product · D. Offering a discount

Answer: B · **Standard:** *CASEL Relationship Skills.* · **Strand outcome (CBM, 11):** *I can run a structured sales conversation.* · **Misconception targeted:** "*Objections = obstacles*" — corrects.

MC3. "In a sales role-play, your self-score 6-criterion rubric should NOT include..."

A. Customer-need clarity · B. Evidence cited · C. Whether you closed · D. Number of words you said

Answer: D · **Standard:** *CCSS-ELA SL.11-12.3 — Evaluate a speaker's point of view, reasoning, and use of evidence.* · **Strand outcome (CBM, 11):** *I can run a structured sales conversation in a role-play and self-score against a rubric.* · **Misconception targeted:** "*More words = better sale*" — corrects (talk-time ratio matters but raw count doesn't).

SA1. "Script a 5-step sales conversation for selling a hypothetical $25 custom phone-stand to a hypothetical college-bound senior. Each step gets 1-3 lines."

Model answer: "*OPEN: 'Hey — got a sec? I'm Maya, I make custom 3D-printed stands for college dorms. Quick question for you.' DISCOVER: 'When you're studying — do you usually have your laptop AND your phone running? What gets in the way?' (Listen.) PRESENT: 'My stand holds your phone at eye level next to your laptop. Hands-free FaceTime, hands-free notes — and it folds flat for a backpack.' OBJECTION ('it's $25'): 'I get it. The Amazon ones are $8 but they break in 3 months — I custom-print yours in your school's colors, lifetime replacement. Cost-per-month over 4 years is 50¢.' CLOSE: 'Want me to print yours in [school colors]? I can have it Monday.'*"

Scoring guide (3-2-1): - **3:** All 5 steps present with discovery before present and objection grounded in customer voice. - **2:** All 5 but discover-then-present sequence weak. - **1:** Steps mixed or missing.

SA2. "After your role-play, self-score on 6 criteria: customer-need clarity / evidence-and-specifics / logical flow / Q&A / honest claims / delivery. Score yourself 1-4 on each AND name the lowest-score criterion with one fix."

Model answer: "*Customer-need clarity: 4 (got 'eye-level study setup' from the prospect's own words). Evidence: 3 (cited '50¢/month' but not a customer testimonial). Flow: 4. Q&A: 3 (handled the price objection but stumbled on 'why not Amazon's plastic'). Honest claims: 4 (no manipulation). Delivery: 3 (rushed the close). LOWEST: Q&A. Fix: pre-stage 2 of the most likely objections (price, durability) with one customer-evidence response per.*"

Scoring guide (3-2-1): - **3:** All 6 criteria scored AND lowest named with a specific fix. - **2:** All 6 scored, fix vague. - **1:** Fewer than 6 scored.

Performance Task: Recorded Sales Role-Play + Self-Critique (60 min).

Child records a 5-step sales role-play, scores against the 6-criterion rubric (peer + self), and writes a 1-page critique with 2 specific commits for next attempt. **Rubric:** Pitch Presentation Rubric (Grade 11): (1) all 5 steps present, (2) discover > present in time, (3) honest claims throughout, (4) self-critique names specific commits. **Strand outcome:** CBM.

Extension (advanced learner):

"*Your prospect says, 'I love it but I need to talk to my parents.' Is this a stall or a real next step? How can you tell?*" Anchors objection-decoding.

Unit 3: The cash flow truth

MC1. "For a hypothetical Founder A — $50k revenue, $35k expenses, $15k profit BUT customers paying 90 days late and no cash on hand by month 4 — Founder A is..."

A. Healthy · B. Profitable on paper but cash-broken · C. Failing · D. Same as Founder B

Answer: B · **Standard:** *CEE Standard 1 (Earning Income), Grade 12 — Income from self-employment is not the same as profit.* · **Strand outcome (MFL, 11):** *I can build a 12-month cash flow forecast (cash in, cash out, ending cash) and identify the month where cash gets tightest, with a fix.* · **Misconception targeted:** "*If I'm profitable, I have cash*" — corrects directly.

MC2. "In a 12-month cash flow forecast, the 'tight month' is..."

A. The month with lowest revenue · B. The month with lowest ENDING CASH · C. The month with highest expenses · D. December

Answer: B · **Standard:** *CCSS-Math A-REI.D.10 / F-LE.A.1 — Linear, exponential, quadratic models.* · **Strand outcome (MFL, 11):** *I can build a 12-month cash flow forecast (cash in, cash out, ending cash) and identify the month where cash gets tightest, with a fix.* · **Misconception targeted:** "*Tight month = bad revenue month*" — corrects.

MC3. "For a venture with seasonal revenue (Aug-Nov peak, Jan-Mar trough), the BEST cash-flow fix for the trough is..."

A. Cut all expenses · B. Pre-sell or take deposits in peak; build cash buffer for trough · C. Borrow during trough · D. Hope

Answer: B · **Standard:** *CCSS-Math F-LE.A.1.* · **Strand outcome (MFL, 11):** *I can build a 12-month cash flow forecast and identify the month where cash gets tightest, with a fix.* · **Misconception targeted:** "*Cash management = expense cutting*" — corrects.

SA1. "Build a simplified 12-month cash flow forecast for a venture with: $5k starting cash; revenue varies $1k-$5k/month seasonally; expenses $2.5k/month flat. Identify the tight month."

Model answer: "*Pattern: Aug-Nov rev $5k each = +$2.5k/mo cash gain. Dec-Feb rev $1k each = -$1.5k/mo cash drain. Mar-Jul rev $3k each = +$0.5k/mo. Run starting in Aug: Aug $7.5k → Sep $10k → Oct $12.5k → Nov $15k → Dec $13.5k → Jan $12k → Feb $10.5k → Mar $11k → Apr $11.5k → May $12k → Jun $12.5k → Jul $13k. Tight month: Feb at $10.5k — but really, starting in Mar (lower starting cash) would land at Aug-equivalent of $1k. Worst-case scenario tight month = early-year if you start in Dec.*"

Scoring guide (3-2-1): - **3:** Forecast computed monthly AND tight month identified with reasoning about scenario sensitivity. - **2:** Forecast computed, tight month named. - **1:** Forecast incomplete.

SA2. "For the tight month identified above, write 2 specific cash-flow fixes."

Model answer: "*FIX 1: Pre-sell 'spring custom batch' in Nov for Mar delivery — collect $2k deposits during peak revenue, smooth Feb cash by accelerating Mar revenue. FIX 2: Negotiate net-30 supplier terms instead of net-7 in Q1 — defer $800 in supplier outflow into the recovery month, freeing $800 of operating cash during Feb.*"

Scoring guide (3-2-1): - **3:** Two specific fixes naming the mechanism (pre-sell, supplier-terms, etc.) AND the cash-impact number. - **2:** Two fixes, vague mechanism. - **1:** Generic ("save more").

Performance Task: 12-Month Cash Flow Forecast + Fix Memo (90 min).

Child builds a 12-month cash flow forecast for the Capstone venture (cash in / cash out / ending cash), identifies the tight month, and writes a 1-page fix memo with 2 specific actions. **Rubric:** Budget Project Rubric (Grade 11): (1) all 12 months computed, (2) tight month named with reasoning, (3) fix memo names mechanism + impact + timeline. **Strand outcome:** MFL.

Extension (advanced learner):

"*Stress-test your forecast: what if revenue drops 25% across all months? When does cash hit zero? What's your trip-wire decision?*" Targets runway sensitivity; previews Grade 12.

Unit 4: Execute under uncertainty

MC1. "A 'growth backlog' of 5 experiments should each include..."

A. A budget · B. Hypothesis + test + metric · C. A name · D. A team member

Answer: B · **Standard:** *NGSS-ETS HS-ETS1-3 — Evaluate a solution to a complex real-world problem.* · **Strand outcome (PSIG, 11):** *I can take a stalled venture (mine or a*

case) and produce a 5-experiment "growth backlog" with hypothesis, test, and metric for each. · **Misconception targeted:** "*Experiments = ideas*" — corrects.

MC2. "In a 5-minute investor-style pitch, the 'what we learned' slide is often..."

A. Skipped · B. The most important slide because it shows learning velocity · C. Optional · D. A weakness

Answer: B · **Standard:** *CCSS-ELA SL.11-12.4 — Present information.* · **Strand outcome (LRCI, 11):** *I can deliver a 5-minute investor-style pitch with traction slide, ask, and "what we learned" — and incorporate panel feedback into a revision.* · **Misconception targeted:** "*Investors reward great ideas*" — corrects (they reward learning).

MC3. "3 ethical guardrails for a Grade 11 venture do NOT include..."

A. Truthful claims · B. Healthy work hours · C. No deceptive pricing · D. 'Always be closing'

Answer: D · **Standard:** *CASEL Relationship Skills + Responsible Decision-Making.* · **Strand outcome (ESL, 11):** *I can identify and apply 3 ethical guardrails (truthful claims, healthy work hours, no deceptive pricing) and write a "no-go" list for my venture.* · **Misconception targeted:** "*Hustle culture = ethics*" — corrects.

SA1. "For a hypothetical stalled venture, build a 5-experiment growth backlog. For each: hypothesis, test, metric."

Model answer: "*1. H: TikTok demo videos out-perform IG static posts for stops. T: 3 of each format, 7 days. M: stop-to-DM rate. 2. H: bundling 2 products at 15% off lifts AOV. T: bundle live for 14 days. M: avg order value. 3. H: lapsed-customer DM with personal message converts 10%. T: send to 20 lapsed customers. M: re-purchase within 7 days. 4. H: changing checkout from 3-step to 1-step lifts conversion. T: A/B for 7 days. M: cart-to-purchase %. 5. H: in-person Friday pop-up at school door beats DM ads for new-customer CAC. T: 4 Fridays. M: CAC + same-day conversion.*"

Scoring guide (3-2-1): - **3:** All 5 with H/T/M each specific. - **2:** All 5, one weak. - **1:** Fewer than 5.

SA2. "Write a 'what we learned' slide for your Capstone venture: 1 thing that worked + WHY, 1 thing that didn't + WHY, 1 thing that surprised you + IMPLICATION."

Model answer: "*WORKED: Friday pop-up at school door delivered $4 CAC vs. $11 from DM ads — physical presence beat digital for our segment because the buying decision was social (peers buying together at the table). DIDN'T: 15% bundle discount lifted AOV by 8% but cut CM% by 11% — net loss of ~$120 over 14 days. SURPRISED: Lapsed customers re-bought at 22% (we expected 8%) — implication: our re-engagement DM was UNDER-INVESTED; we should run it monthly, not as a one-off.*"

Scoring guide (3-2-1): - **3:** All 3 elements with specific numbers AND a why/implication for each. - **2:** All 3, one weak in why/implication. - **1:** Generic claims.

Performance Task: 6-Week Venture Sprint + 5-Min Investor-Style Pitch (6 weeks).

Child runs a 6-week sprint executing 5 experiments from a written growth backlog, tracks 5 metrics weekly, delivers a 5-minute investor-style pitch including traction + ask + "what we learned" slide, incorporates panel feedback into a revision. **Rubric:** Pitch Presentation Rubric (Grade 11): (1) growth backlog 5 experiments executed, (2) 5 tracked metrics, (3) pitch covers traction + ask + lessons, (4) revision list captures panel pushback. **Strand outcome:** PSIG + LRCI + ESL + OSO.

Extension (advanced learner):

"*Your panel said the 'ask' was unclear. Rewrite the ask in 2 sentences using the format: 'I'm looking for [specific thing] from [specific person/group] in [timeframe] to [specific outcome].'*" Targets ask-clarity discipline.

Total this grade: 12 MC + 8 SA + 4 Performance Tasks + 4 Extensions = 28 items.
