
GRADE 1

Lesson Plans

C A S H

Businesses make things or do things.

Ten lessons that bring the year to life.

Grade 1 — Cash to Company: Lesson Plans

Ten short lessons, sampled across the year. Each lesson is 25–35 minutes — a half-period for first grade. Most assessment is **observation-based**: the teacher notes who can do what on a class checklist. Worksheets are minimal and mostly drawing or circling. Children are not yet fluent readers; the teacher reads every prompt aloud.

The format below is the pattern for every lesson:

- **Objectives** (what a child can demonstrably do)
- **Standards** (one or two; copied verbatim from the Standards Alignment Map)
- **Materials**
- **Vocabulary** (1–3 words)
- **Procedure** (warm-up, mini-lesson, dramatic play / activity, close)
- **Differentiation** (ELL, IEP/504, advanced)
- **Assessment** (what the teacher watches for, recorded on the class checklist)
- **Cash video tie-in** (where applicable; V1–V8 launch points)

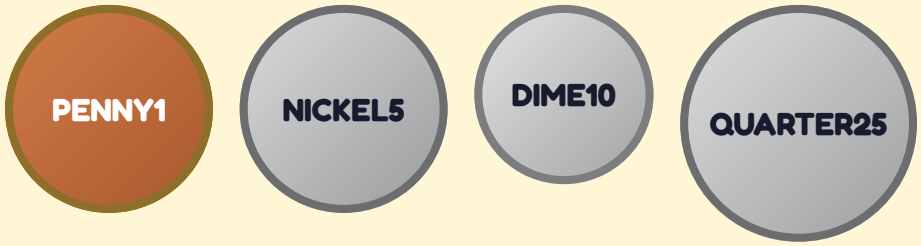
Lessons sampled:

1. (Week 1, Unit 1) Make or do? — first sort — Cash V1 launch

2. (Week 4, Unit 1) The Make/Do Sort Wall — building the bulletin board
3. (Week 7, Unit 1) Things people in my home need done — Cash V2
4. (Week 10, Unit 2) Coins on the mat — Cash V3 launch
5. (Week 14, Unit 2) Is it enough? — pair-up game — Cash V4
6. (Week 19, Unit 3) Follow the recipe card — Cash V5 launch
7. (Week 23, Unit 3) The promise — Cash V6
8. (Week 28, Unit 4) The Classroom Store opens — Cash V7 launch
9. (Week 32, Unit 4) Make a sign — name, item, price
10. (Week 36, Unit 4) Family Visit Day — Showcase — Cash V8

Lesson 1 — Make or do? (the year's first sort)

Grade band: K-2 **Time:** 30 minutes **Unit:** 1 — Make or do? **Cash video tie-in:** V1 — "Cash Asks: Make or Do?"



Objectives

- Sort two businesses into "makes a thing" or "does a thing."
- Tell a partner one reason for the sort.

Standards

- **Jump$tart Standard 3 (Employment and Income), Benchmark 4-2:** Describe how people use income for goods and services.
- **C3 D2.Eco.1.K-2:** Explain how scarcity necessitates decision making — at the level of "we only have so many cookies."

Materials

- Cash Video #1 (1:30) on a screen.
- A circle-time rug.
- 6 large business cards (laminated): bakery, barber shop, dog walker, lemonade stand, library, pizza shop.
- Two big floor labels: MAKE and DO.

Vocabulary

- **make** — to build a thing that did not exist before.
- **do** — to give a service that helps a person.

Procedure

Warm-up — 4 min. Children gather on the rug. Hold up the bakery card. "What do they do here?" Children answer: "bread!" Affirm: "Yes —

they MAKE the bread." Hold up the dog walker card. "What do they do here?" Children answer: "walk the dog!" Affirm: "Yes — they DO the walking."

Mini-lesson — 5 min. Play Cash Video #1. Cash holds up a bakery and a barber shop and asks, "make or do?" Cash points: "Make. Bread is a thing." Then: "Do. A haircut is a thing the barber does." Children echo MAKE and DO with hand motions (push hands up for MAKE; sweep hands across for DO).

Activity — 16 min. Lay the MAKE and DO labels on the floor. Hold up each business card one at a time. Ask the room: "Make or do?" Listen to the calls. Place the card under the chosen label. For each card, ask one child: "Why?" Acceptable answers: "They build a thing" or "It is a service" or simply "You can hold the bread" (great answer for MAKE). For the pizza shop, surface the puzzle: "They make the pizza. And they bring it to your table — that's doing. So this one is BOTH." Place the pizza shop on the line between the labels.

Close — 5 min. Stand back. Read the sort together: "Bakery — make. Lemonade stand — make. Barber shop — do. Dog walker — do. Library — do. Pizza shop — both." End with the year's first phrase: "Make or do? Look. Look. Look."

Differentiation

- **ELL.** Hand motions (push for make, sweep for do) carry the meaning. A child can place the card without speaking.

- **IEP/504.** A child who freezes at choice can place the card with a partner. The partner says the word; the child points.
- **Advanced.** Push: "Tell me one MORE thing the bakery makes." (Cookies. Muffins. Birthday cakes.) Or: "Name a business that ONLY makes — no doing at all." (Hard. The puzzle is the lesson.)

Assessment

On the **Make/Do Sort Checklist**, mark each child as: placed a card under the correct label (Y/N), said one reason for the sort (Y/N). No grades. A snapshot.

Lesson 2 — The Make/Do Sort Wall

Grade band: K-2 **Time:** 30 minutes **Unit:** 1 — Make or do?

Objectives

- Add one business to the Make/Do Sort Wall.
- Tell whether the business makes a thing, does a thing, or both — and why.

Standards

- **CCSS-ELA SL.1.4:** Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.

- **C3 D2.Eco.1.K-2:** Explain how scarcity necessitates decision making.

Materials

- A blank bulletin board labeled with two halves: MAKE on the left, DO on the right, with a fuzzy middle space.
- Pre-cut paper squares (5x5 inches), one per child.
- Crayons, markers.
- Optional: photos of local businesses (bakery, mechanic, hair salon, vet, print shop, sandwich shop).

Vocabulary

- **business** — a place or person that helps people, often for money.

Procedure

Warm-up — 3 min. Show three photos of local businesses. Ask, "make or do?" One-word answers welcome. Affirm each.

Mini-lesson — 5 min. Show the blank wall. "This is our Make/Do Sort Wall. We will fill it up. Today, you draw one business you have seen. You decide where it goes." Demonstrate by drawing a stick-figure barber on a sample square. "This is a barber. The barber DOES haircuts. So my square goes on the DO side." Place it.

Activity — 17 min. Each child draws one business on a square. Walk and confer. Ask quietly: "What's this place? Make or do?" Write the

child's words at the bottom of their square in the teacher's hand. Children walk to the wall and pin their square on the side they chose. The teacher names each one as it goes up: "Mia drew a bakery. The bakery makes bread. MAKE side."

Close — 5 min. Stand in front of the wall. Read 4–5 squares aloud. End with the chant: "Make or do? Look. Look. Look."

Differentiation

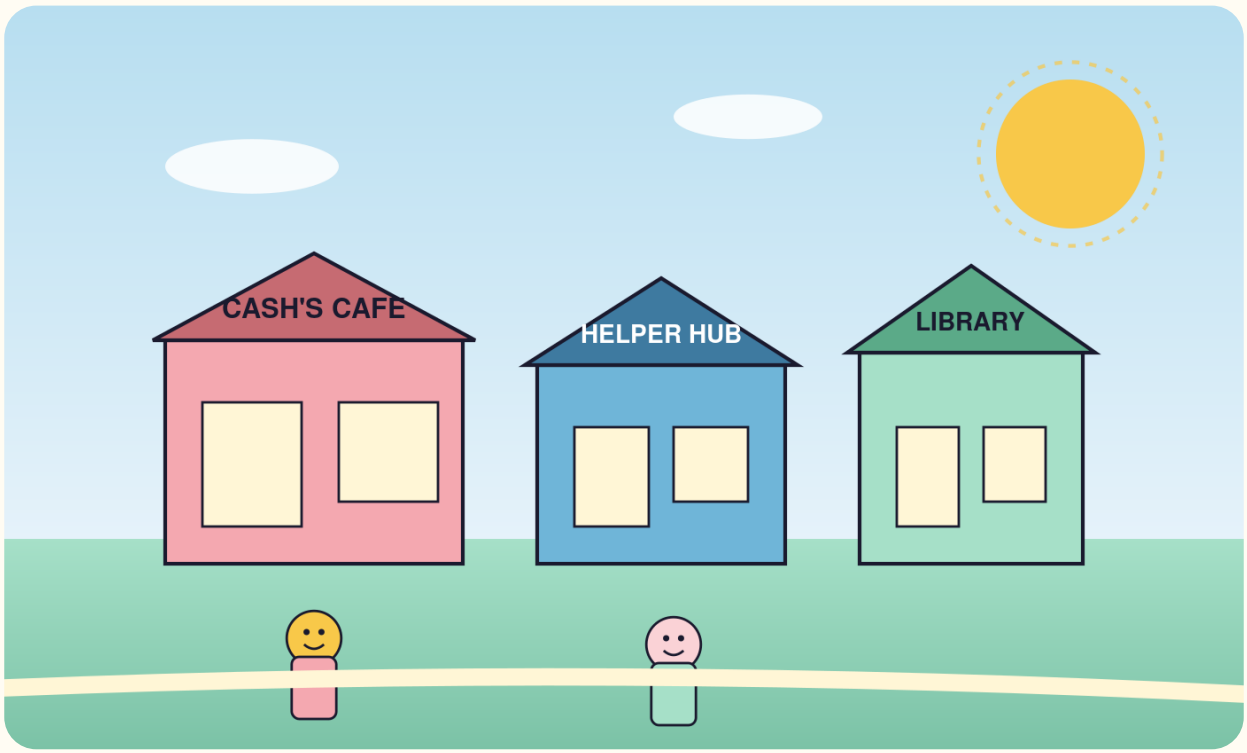
- **ELL.** Allow drawing-only with no caption. The picture is the language. Hand motion (push or sweep) is enough to choose a side.
- **IEP/504.** Pre-printed photo stickers for children who cannot draw. They peel and place. Teacher narrates: "You picked the dentist. Do?" Child nods. Teacher places.
- **Advanced.** Add a second square — "a business you've never seen but think exists." (A snowplow service. A shoe-repair shop.) Sort the new one too.

Assessment

On the checklist, mark: contributed a square (Y/N), placed it on a side and gave a reason (Y/N).

Lesson 3 — Things people in my home need done

Grade band: K-2 **Time:** 25 minutes **Unit:** 1 — Make or do? **Cash video tie-in:** V2 — "What Do People Need Done?"



Helpers are everywhere. Each one is a kind of business.

Objectives

- List three things the people in a home might need done.
- Circle one of the three that a business could do for money.

Standards

- **Jump$tart Standard 3 (Employment and Income), Benchmark 4-2:** Describe how people use income for goods and services.
- **CASEL Self-Awareness:** Recognize one's own observations.

Materials

- Cash Video #2.
- A simple worksheet titled "THINGS THAT NEED DOING" with a pretend house drawing and three blank lines (each with a small picture box).
- Crayons, markers.

Vocabulary

- **need** — a thing that should happen.

Procedure

Warm-up — 3 min. Hold up a picture of a yard with leaves all over it. "What needs doing?" Children answer: "rake the leaves!" Affirm: "Yes. Someone needs to rake."

Mini-lesson — 5 min. Play Cash Video #2. Cash visits a pretend house. Cash points: "The grass is long. Someone needs to cut it. The dog wants out. Someone needs to walk it. The shirt has a hole. Someone needs to sew it." Cash adds: "Some of these are jobs a business could do. For money." Children echo three things: cut the grass, walk the dog, sew the shirt.

Activity — 12 min. Hand out the worksheet. Each child draws or names three things that need doing in a pretend home. (Important: a pretend home, for a sample. Not their actual home.) Acceptable: cut grass, walk dog, sew shirt, fix sink, deliver groceries, take out trash, paint a wall. Walk and confer. Ask quietly: "Could a business do this for money?" If yes, the child circles that picture in red.

Close — 5 min. Three volunteers share. "What's one thing in your sample home? Could a business do it?" End: "People need things done. Some they do themselves. Some they hire a business for. That's a kind of business too."

Differentiation

- **ELL.** Picture-only is fine. The child draws a leaf rake; the teacher names raking in English. The home language is welcome too.
- **IEP/504.** Pre-printed picture cards: dog being walked, leaves being raked, shirt being sewn. Child picks three.
- **Advanced.** Push: "Of your three, which one would cost the most? Which one would cost the least?" (Accept any reasonable answer; do not press.)

Assessment

Checklist: named 3 things that need doing (Y/N), circled one a business could do for money (Y/N).

Sensitivity flag. Some children may name a need that reveals a private detail about their family. Receive warmly. Do not probe. Use the pretend home framing the whole lesson — never your home.

CASH SAYS

Which coin is more? Show me with your hands.

Lesson 4 — Coins on the mat

Grade band: K-2 **Time:** 30 minutes **Unit:** 2 — Coins on the mat **Cash video tie-in:** V3 — "Counting Coins"

Objectives

- Count a small group of coins (up to 3 coins, value up to 50¢).
- Say the total out loud.

Standards

- **CCSS-Math 1.MD.C.4:** Organize, represent, and interpret data with up to three categories — applied to sorting and counting coin groups.
- **CCSS-Math 1.OA.A.1:** Use addition within 20 to solve word problems — applied to coin sums up to 50¢.

Materials

- Cash Video #3.
- Coin cards (laminated): 6 of each of the four coins.
- A "coin mat" per pair of children — a piece of paper with a circle in the middle.
- The class coin chart: PENNY 1, NICKEL 5, DIME 10, QUARTER 25.
- Optional: a small jar of real coins for closing demo (teacher-handled, supervised).

Vocabulary

- **count** — to add up and say how much.
- **cents** — small parts of a dollar.

Procedure

Warm-up — 3 min. Hold up two dimes. "How much?" Children call out: "twenty!" Add a nickel. "How much now?" Pause. "Twenty-five." Affirm: "Coins add up."

Mini-lesson — 5 min. Play Cash V3. Cash places three coins on a mat: a quarter, a dime, and a nickel. Cash counts on three fingers: "Twenty-five. Plus ten. That's thirty-five. Plus five. That's forty." Children echo. "Forty cents on the mat."

Activity — 17 min. Pairs at desks. Each pair gets a coin mat and a small handful of coin cards (mixed). The teacher calls out a "task" each round. - Round 1: "Put one quarter and one dime on your mat. How

much?" (35¢) Children write or say. - Round 2: "Put two dimes and a nickel on your mat. How much?" (25¢) - Round 3: "Put a quarter, a nickel, and a penny on your mat. How much?" (31¢) - Round 4: "Put any three coins on your mat. Tell your partner how much." (Free choice.)

The teacher walks the room. As children finish each round, ask: "Show me the dime. Show me how you counted."

Close — 5 min. End with the chant: "Quarter twenty-five. Dime ten. Nickel five. Penny one. Add them up — coins add up." Repeat twice.

Differentiation

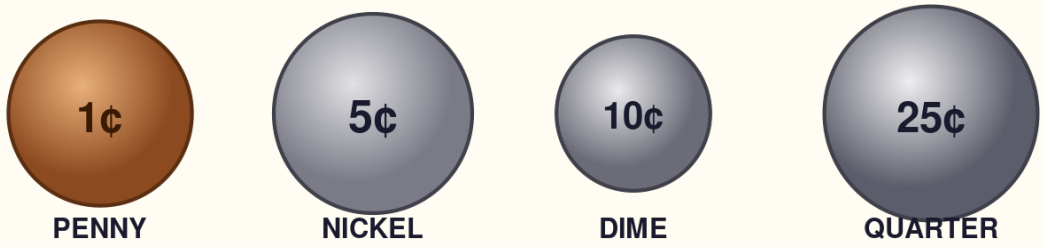
- **ELL.** Use the chart with the dot count from Grade K. Children touch each coin and count dots.
- **IEP/504.** Reduce the field to two coins per round. Build to three only when the child is ready. A counting-on number line on the desk helps.
- **Advanced.** Add a fourth coin per round. Or set the question: "How can you make 40 cents three different ways?" (Four dimes; one quarter and a dime and a nickel; two dimes and four nickels.)

Assessment

Checklist: correctly counted a 3-coin group (Y/N), said the total out loud (Y/N).

Lesson 5 — Is it enough? (the 30-cent ice pop game)

Grade band: K-2 **Time:** 25 minutes **Unit:** 2 — Coins on the mat **Cash video tie-in:** V4 — "Is It Enough?"



Penny. Nickel. Dime. Quarter. We say each name out loud.

Objectives

- Decide whether a small group of coins is enough to buy a 30-cent item.
- Explain the decision.

Standards

- **CCSS-Math 1.OA.A.1:** Use addition within 20 to solve word problems — applied to coin sums and comparison.
- **C3 D2.Eco.1.K-2:** Explain how scarcity necessitates decision making — at the level of "we only have so many cookies."

Materials

- Cash Video #4.
- Coin cards (laminated).
- A picture card of a 30-cent ice pop (pretend; for a sample).
- An "ENOUGH" smiley card and a "NOT ENOUGH" frown card.

Vocabulary

- **enough** — as much as you need, or more.

Procedure

Warm-up — 3 min. Hold up the ice pop card. "Pretend this ice pop costs 30 cents. For a sample, that's the price." Hold up two dimes. "Is this enough?" Children answer: "no — twenty!" Add a nickel. "Now?" Children: "twenty-five — still no!" Add another nickel. "Now?" Children: "thirty — yes!"

Mini-lesson — 5 min. Play Cash V4. Cash holds up the pretend ice pop. "For a sample, this costs 30 cents. We do not ask what you have at home. We pretend." Cash demonstrates three coin combinations and asks: "Enough? Or not enough?" Children call out for each.

Activity — 13 min. Pairs at desks. Each pair gets a small handful of coin cards. The teacher gives each pair four "tasks." For each, the pair counts the coins, decides ENOUGH or NOT ENOUGH for a 30-cent ice pop, and places the ENOUGH or NOT ENOUGH card on top. - Task A: Two dimes and three pennies. (23¢ — not enough.) - Task B: One

quarter and one nickel. (30¢ — enough.) - Task C: Three dimes. (30¢ — enough.) - Task D: One quarter and three pennies. (28¢ — not enough.)

Teacher confers with 4–5 pairs.

Close — 4 min. "Tell me one task where you said ENOUGH. Tell me one task where you said NOT ENOUGH. How did you know?" End: "For a sample, count first. Then decide."

Differentiation

- **ELL.** ENOUGH and NOT ENOUGH cards have a smiley/frown face. The face is the language.
- **IEP/504.** Use only two tasks instead of four. Or pre-count with the teacher; the child decides.
- **Advanced.** Add: "How short are you?" For Task A, "23 cents — you are 7 cents short. Pretend the price changed to 25 cents — would you have enough now?"

Assessment

Checklist: correctly decided ENOUGH/NOT ENOUGH on at least 3 of 4 tasks (Y/N), said how they knew (Y/N).

Sensitivity flag. Always frame the price as "for a sample" or "pretend." Never ask, and never let a child volunteer, what coins they have or do not have at home.

Lesson 6 — Follow the recipe card

Grade band: K-2 **Time:** 35 minutes **Unit:** 3 — Follow the recipe **Cash video tie-in:** V5 — "Four Steps in Order"

Objectives

- Follow a 4-step recipe card to make a small classroom product (paper bookmark).
- Tell a partner each step in order.

Standards

- **CCSS-ELA SL.1.4:** Describe people, places, things, and events with relevant details.
- **CCSS-ELA RI.1.3:** Describe the connection between two events, ideas, or pieces of information in a text — applied to the steps on a recipe card.

Materials

- Cash Video #5.
- A 4-step recipe card per child: "PAPER BOOKMARK." 1) Pick a strip of paper. 2) Draw a picture on it. 3) Write your name. 4) Punch a hole and tie a yarn loop.
- Strips of cardstock (1 per child), crayons, hole punch, short yarn pieces.

Vocabulary

- **step** — one part of a job that has more than one part.
- **recipe card** — a card that lists steps in order.

Procedure

Warm-up — 3 min. Hold up the recipe card. "How many steps?" Children count: "four!" "What's step one?" Read: "Pick a strip of paper."

Mini-lesson — 6 min. Play Cash V5. Cash demonstrates one full bookmark, narrating each step. "Step one. I pick a strip. Step two. I draw a picture. Step three. I write my name. Step four. I punch a hole and tie a yarn loop." Cash holds up the finished bookmark. "Done. Four steps. In order."

Activity — 22 min. Each child receives a recipe card and the materials. Children follow the steps. Teacher and one paraprofessional walk and confer. As each child finishes a step, they whisper to a partner: "I did step one. I picked a strip." Partners check off (mentally or on the recipe card). Hole-punching happens at a teacher-supervised table.

Close — 4 min. Three volunteers hold up their bookmark and tell the class the four steps in order. End: "Steps go in order. The recipe card helps." Children take their bookmark home.

Differentiation

- **ELL.** Pictures on the recipe card carry the order. Hand motion: hold up one finger for step one, two for step two, etc. The child can narrate by holding up fingers.
- **IEP/504.** A child with fine-motor difficulty can use pre-cut shapes (no scissors), pre-tied yarn, and a teacher-assisted hole punch. Mark on the checklist if assistance was needed; do not penalize.
- **Advanced.** Add a fifth step: "Step five. Decorate the back." Or: "Write a 4-step recipe for ANOTHER product you could make. Trail mix? A friendship bracelet?"

Assessment

Checklist: finished all 4 steps (Y/N), told a partner each step in order (Y/N), held up the finished product (Y/N).

Lesson 7 — The promise (story-based ESL)

Grade band: K-2 **Time:** 25 minutes **Unit:** 3 — Follow the recipe **Cash video tie-in:** V6 — "A Promise Kept"

Objectives

- Decide whether a "promise" was kept in a story.
- Tell why keeping promises matters in business.

Standards

- **CCSS-ELA RL.1.3:** Describe characters, settings, and major events in a story, using key details.
- **CASEL Relationship Skills:** Cooperation and trust.

Materials

- Cash Video #6.
- A short read-aloud — Officer Buckle and Gloria (Peggy Rathmann), or any picture book where a worker keeps (or breaks) a promise.
- Two cards per pair: a green "KEPT" card and a red "BROKEN" card.

Vocabulary

- **promise** — something we said we would do.

Procedure

Warm-up — 3 min. Hold up the green card. "This is for kept." Hold up the red card. "This is for broken." Practice with one example: "I promised to bring you a pencil. I brought it. Kept or broken?" Children: "kept!" Then: "I promised to bring you a pencil. I forgot. Kept or broken?" Children: "broken!"

Mini-lesson — 4 min. Play Cash V6. Cash tells a short made-up story: "A baker promised the customer a birthday cake on Saturday. Saturday came. Was the cake ready?" Cash shows two endings — one where the cake is ready (KEPT) and one where it is not (BROKEN). Cash asks: "Which one is the better business?" Children answer: "the kept one!"

Cash: "Yes. A business that keeps promises is one customers come back to."

Activity — 13 min. Read a few pages of the picture book. Pause after each promise scene. "Was that a promise?" If yes, "was it kept or broken?" Pairs hold up their card. Teacher tallies on the chart paper. End the read-aloud after 3–4 promise moments. Discuss the broken ones briefly: "What happened next? How did the customer feel?"

Close — 5 min. "Why does keeping promises matter in business?" Take 3–4 answers. Acceptable: "customers come back," "people trust them," "it's fair," "they feel good." End with the year's ESL phrase: "A promise kept is a customer kept."

Differentiation

- **ELL.** The KEPT/BROKEN cards carry the language. A child can hold the card without speaking. Color and face on the card = the meaning.
- **IEP/504.** A child overwhelmed by the read-aloud can listen with one paraprofessional in a smaller group. Same KEPT/BROKEN cards.
- **Advanced.** Push: "Have you read or heard another story where someone broke a promise? What happened?" (Accept any story example. Do NOT press for a personal example.)

Assessment

Checklist: correctly identified at least 2 of 3 promises in the story as kept or broken (Y/N), said one reason promises matter in business (Y/N).

Sensitivity flag. Use the story as the source of every promise example. Do not ask a child whether someone in their real life kept or broke a promise. If a child volunteers a personal example, listen warmly, then redirect: "That sounds important. Let's go back to our story."

CASH SAYS

What comes first? What comes next?

Lesson 8 — The Classroom Store opens

Grade band: K-2 **Time:** 35 minutes **Unit:** 4 — The Classroom Store (Capstone) **Cash video tie-in:** V7 — "Welcome to the Classroom Store"

Objectives

- Take a turn as worker or customer.

- Use kind words (please, thank you, you're welcome).

Standards

- **CASEL Relationship Skills:** Cooperation and turn-taking.
- **CCSS-ELA SL.1.4:** Describe events and feelings clearly.

Materials

- Cash Video #7.
- Classroom Store corner: a small table, two chairs, paper aprons (4–6), pretend products (felt or paper) — bookmarks (from Lesson 6), pretend trail mix bags, pretend lemonade cups.
- Pretend coin cards.
- An OPEN/CLOSED sign on a stick.
- A hand-drawn price sign: "BOOKMARK — 10¢. TRAIL MIX — 25¢. LEMONADE — 30¢."

Vocabulary

- **worker** — the helper who does the job at a business.
- **customer** — the person who comes to a business.

Procedure

Warm-up — 3 min. Show the store corner. "This is the Classroom Store. What do you see?" Children call out: "a sign! aprons! coins!"

Mini-lesson — 6 min. Play Cash V7. Cash explains: "At the Classroom Store, you take turns. One is the worker. One is the customer. The worker says: 'Hi, can I help you?' The customer says: 'Please, may I have a bookmark?' The worker counts the coins: 'Ten cents. Yes.' The customer says: 'Thank you.' The worker says: 'You're welcome.'" Children echo each line.

Activity — 22 min. First turn: pick 2 children. One worker, one customer. Teacher coaches the lines. Customer pays with coin cards (e.g., one dime for the bookmark). Worker counts the coins out loud. Other children watch. Trade. Trade again. Each round 3 minutes. Run 5 rounds. Children clap softly between rounds.

Close — 4 min. "What kind word did you hear today?" Children call out: "please. thank you. you're welcome." Hang the OPEN/CLOSED sign on the corner. "The Classroom Store is OPEN."

Differentiation

- **ELL.** Sentence frames on a card the child holds: "Please, may I have ___?" "Thank you." The card is held up; speaking is bonus.
- **IEP/504.** Allow non-verbal trades — the child can point to the product and nod. Coach the partner to use the kind words on their behalf.
- **Advanced.** Add a third role: the **sign-keeper** who keeps the price sign clean and updated. Add the math: "How much for a bookmark AND a trail mix? 10 plus 25 — 35 cents."

Assessment

Checklist: took at least one turn (Y/N), used a kind word (please/thank you) (Y/N), counted the coins out loud (Y/N).

Lesson 9 — Make a sign

Grade band: K-2 **Time:** 30 minutes **Unit:** 4 — The Classroom Store

Objectives

- Draw a sign for a pretend stand showing the name, the item, and the price.
- Tell a partner what each part of the sign means.

Standards

- **CCSS-ELA SL.1.4:** Describe people, places, things, and events with relevant details.
- **CCSS-Math 1.MD.C.4:** Organize and interpret data — applied to a price as a number with a cent symbol.

Materials

- A blank "MY SIGN" template per child: a large rectangle with three labeled lines — NAME, ITEM, PRICE. (Read aloud.)
- Crayons, markers.

- Three sample teacher-made signs to model: "MIA'S LEMONADE — 25¢," "JAKE'S BOOKMARKS — 10¢," "ZAINA'S TRAIL MIX — 30¢."

Vocabulary

- **sign** — a picture and words that tell the customer what a place is.
- **price** — how much money something costs.

Procedure

Warm-up — 3 min. Hold up the three sample signs. "What do you see on each sign?" Children call out: "a name! an item! a price!" Affirm: "A good sign has three things. Name. Item. Price."

Mini-lesson — 5 min. Demonstrate. "Watch me make a sign. My name is Ms. R. My item is friendship bracelets. My price is 15 cents." Draw the sign on the board. "R'S BRACELETS — 15¢." Read aloud each part. Then: "A sign tells the customer what they need to know. Easy to read. Big letters. A picture."

Activity — 17 min. Each child fills out the MY SIGN template. They pick: their name (or a pretend stand name), an item to sell, a price (a coin total they can count, e.g., 10¢, 15¢, 20¢, 25¢, 30¢, 35¢, 40¢, 50¢). They draw a small picture of the item. Teacher walks and confers. "Tell me your sign. What's the name? What's the item? What's the price?" Capture in the corner of the sheet in the teacher's handwriting if needed.

Close — 5 min. Three volunteers hold up their sign and read it. End the chant: "Name. Item. Price. Make it big. Make it clear."

Differentiation

- **ELL.** Pictures carry the language. The child draws the item; the teacher writes the name and price.
- **IEP/504.** Pre-printed item stickers (lemonade cup, bookmark, trail mix bag, friendship bracelet, paper flower). Child picks one and pastes.
- **Advanced.** Add an extra line: "WHY YOU'LL LIKE IT." Coach against marketing-speak ("Best ever!"). Acceptable: "Cool colors." "Sweet but not too sweet." "Soft yarn." Cash voice rule applies — specifics, not flattery.

Assessment

Checklist: drew a sign with name, item, and price (Y/N), said each part out loud (Y/N). The sign goes in the child's folder for Family Visit Day.

Lesson 10 — Family Visit Day (Showcase)

Grade band: K-2 **Time:** 35 minutes **Unit:** 4 — The Classroom Store (Capstone — Family Visit Day) **Cash video tie-in:** V8 — "Tell a Grown-Up: Make or Do?"

Objectives

- Show a grown-up the sign you drew. Read it aloud.
- Take a turn at the Classroom Store as worker or customer.
- Tell a grown-up one helper you noticed who makes a thing and one who does a thing.

Standards

- **CCSS-ELA SL.1.4:** Describe events and feelings clearly.
- **C3 D2.Eco.1.K-2:** Explain how scarcity necessitates decision making.
- **CASEL Relationship Skills:** Cooperation, kind words, and cross-generational interaction.

Materials

- The Make/Do Sort Wall (full).
- The Classroom Store (open).
- Each child's sign (from Lesson 9), pinned at a small assigned spot.
- Each child's Coin Mat Booklet (from Unit 2 capstone).
- A small badge sticker for each child after they share.

Vocabulary

- **show** — to let someone see.
- **tell** — to say in words.

Procedure

Warm-up — 3 min. Greet families in a circle. Children sit, families stand behind. Cash V8 plays: Cash welcomes the families and says, "the children sorted businesses, counted coins, followed recipes, and ran a Classroom Store. Now they will tell you what they did."

Mini-lesson — 5 min. Teacher demonstrates with one volunteer child. "This is my sign. My name is on it. My item is on it. My price is on it." Then: "This is one helper I noticed who makes a thing — the bakery. This is one who does a thing — the dog walker." The grown-up says: "Thank you for telling me."

Activity — 22 min. Children rotate. Each child finds their grown-up (or a partner grown-up). They walk to the Make/Do Sort Wall and point to two squares — one MAKE, one DO — and tell the grown-up about each. They walk to the child's sign and read it aloud (with the grown-up reading along). They visit the Classroom Store and play one round (child as worker, grown-up as customer; coin counted out loud). After each child shares, the teacher hands them a small badge. The Coin Mat Booklet is in the child's folder for the family to take home.

Close — 5 min. Whole-class farewell. "Make or do? Coins add up. Steps in order. Take turns." Children wave to the families.

Differentiation

- **ELL.** Family members may speak any language with their child. Encourage. The picture and the sign carry meaning across languages.

- **IEP/504.** Children who freeze in front of grown-ups can have the teacher narrate while the child points. Counts as completed.
- **Advanced.** A child may share two signs (their own and one classmate's), or take the grown-up on a walking tour of the Make/Do Sort Wall and narrate four squares instead of two.

Assessment

Final checklist (year-end): named at least one MAKE business and one DO business (Y/N), read their sign aloud (Y/N), played a Classroom Store round and counted the coins (Y/N), used kind words (Y/N), said one thing they would change about their product or sign (Y/N — LRCI strand). This is the year's culminating observation. Add to the cumulative folder.

Notes on the lessons not shown

The remaining ~26 weekly blocks recycle these patterns:

- **Make/Do Sort Wall maintenance.** Weekly add 1–2 new businesses. Read the wall together.
- **Coin counting routine.** A 5-minute "count this mat" ritual on Tuesdays after Unit 2 starts.
- **Recipe-of-the-week.** A new 4-step recipe each Wednesday after Unit 3 starts (paper bookmark, trail mix, friendship bracelet, paper flower, hand-printed card, fruit cup).

- **Store time.** Once Unit 4 begins, a 15-minute Classroom Store rotation runs twice a week.
- **Cash video viewings.** Each of the eight Cash videos lands once. Re-watch one short Cash video per week thereafter as a brain-break.

Teachers may sub in any picture book the school library has that fits the week's theme. Anchor texts in the Curriculum Book are a starting list, not a required list.

CASH SAYS

Tell me what they said with their words.

Year-end teacher reflection (2 questions)

After Family Visit Day, the teacher writes 2–3 sentences answering:

- Which lesson did the children carry the most? (Use the checklist data.)
- What would I change for next year? (One specific change.)

This is the program's smallest LRCI move — modeling for ourselves the same what would I change? question we ask of every grade after this one.

How to use the class checklist (assessment crib sheet)

The class checklist is one page. Down the left: every child's name. Across the top: the year's eight strand outcomes, written in kid-friendly form:

1. Sorts 5 businesses MAKE / DO and tells why. (BAVC)
2. Names 3 things people in a home need done; circles one a business could do. (PSIG)
3. Counts coins to 50¢ on a mat; tells if it is enough for a 30¢ item. (MFL)
4. Draws a sign with name, item, and price. (CBM)
5. Follows a 4-step recipe and tells each step in order. (OSO)
6. Takes a turn as worker or customer; uses kind words; says one thing partner did well. (LTO)
7. Tells whether a promise was kept in a story; says why promises matter. (ESL)
8. Shows a finished product; says one thing they would change. (LRCI)

Mark Y when you see a child do it. No partial credit at Grade 1. No grades. The checklist is for the teacher's planning and the year-end family conference. By June, every child should have most boxes checked. If a box is empty for 4+ children, that is the lesson to repeat.

Unit-by-unit overviews

These short overviews give the teacher the shape of each unit at a glance. The 10 sampled lessons above cover the high points; the unit overviews fill in the weeks between.

Unit 1 — Make or do? (Weeks 1–9)

Spine. Build the sorting habit. Build the Make/Do Sort Wall. Children should be able to sort 5 businesses into MAKE or DO and explain their sort by Week 9.

Daily routine (5–10 minutes). Begin every Cash to Company block with a business card and the question "make or do?" Take 3–5 calls.

Weeks 1–3. Bakery, barber shop, lemonade stand, dog walker. Easy ones. **Weeks 4–6.** Library, dentist, mechanic, print shop, vet. Harder ones. **Weeks 7–9.** The "both" puzzle: pizza shop, school, ice cream truck. Add the fuzzy middle space to the wall. Children love the fuzzy middle.

Cash videos. V1 (Make or Do? — Week 1), V2 (What Do People Need Done? — Week 7).

Unit 2 — Coins on the mat (Weeks 10–18)

Spine. Count mixed coins to 50¢. Decide if it is enough for a 30¢ item. By Week 18, every child should be able to do both with 3-coin groups.

Daily routine. Add a 3-minute coin moment to the start of each block: "count this mat." Three coin cards on the rug; the room calls out the total.

Weeks 10–12. Two-coin counts. Quarter and dime. Two dimes. Five pennies. Just sums. **Weeks 13–14.** Three-coin counts. Quarter, dime, nickel. Two dimes and a nickel. Add the question: "how much?" **Weeks 15–16.** Add the is it enough? question. Use the 30-cent ice pop card. **Weeks 17–18.** Capstone: the **Coin Mat Booklet.** Each child draws 5 coin combinations and writes the total under each.

Cash videos. V3 (Counting Coins — Week 10), V4 (Is It Enough? — Week 14).

Unit 3 — Follow the recipe (Weeks 19–27)

Spine. Follow a 4-step recipe card. Tell whether a promise was kept. By Week 27, every child should be able to follow a 4-step recipe and finish a small product.

Daily routine. A 4-step recipe card sits on the rug. Children read it aloud at arrival (with the teacher reading along).

Weeks 19–21. Paper bookmark. Friendship bracelet. Paper flower. Easy crafts. **Weeks 22–24.** Trail mix (with allergy check). Hand-printed card.

Step counts: 4 each. **Weeks 25–27.** Promises in stories — Officer Buckle and Gloria, others. Discuss kept and broken in story characters. Capstone: the **child-drawn 4-Step Recipe Card** for one product the child would sell.

Cash videos. V5 (Four Steps in Order — Week 19), V6 (A Promise Kept — Week 23).

Unit 4 — The Classroom Store (Weeks 28–36)

Spine. Take turns as worker, customer, sign-keeper. Use kind words. Make a sign with name, item, price. Family Visit Day at the end.

Daily routine. The Classroom Store runs twice a week, 15 minutes each. Three groups of 3 children rotate through.

Weeks 28–30. Store opens. Two roles: worker and customer. Coach the kind words. Coach counting coins out loud. **Weeks 31–33.** Add the third role: sign-keeper. Children make signs (Lesson 9). Hang signs at small assigned stand spots. **Weeks 34–35.** Children prepare their portfolio for Family Visit Day: their sign, their Coin Mat Booklet, their Recipe Card, one square they drew on the Make/Do Sort Wall. **Week 36.** Family Visit Day.

Cash videos. V7 (Welcome to the Classroom Store — Week 28), V8 (Tell a Grown-Up: Make or Do? — Week 36).

A short FAQ for first-time Grade 1 teachers

My class can't sit still for 35 minutes. What do I cut? Cut the close. Keep the warm-up, mini-lesson, and activity. The activity is the lesson. The chant at the end is nice but not essential.

A child says the dentist makes a thing because they make smiles. Beautiful answer. Affirm warmly. "Yes — the dentist makes the smile better. So that's some make and some do." Place the dentist on the line. The fuzzy middle is the puzzle.

A child cannot count to 30 yet. Slow down. Use only two coins. Use the dot chart. Pair them with a peer who can count. Mark on the checklist as needs-more-time. Re-teach in Week 18.

The Classroom Store gets loud. That's the work. As long as kind words are happening, the noise is fine. Reset the kind-words rule at the start of every session.

A family member can't come for the Family Visit Day. Pair the child with a teacher, paraprofessional, or another family. The point is telling a grown-up — the specific grown-up matters less than the telling.

A child's sign says "BEST EVER." Cash voice rule: specifics, not flattery. Coach: "What's something true about it? Like — soft yarn. Bright colors. Sweet but not too sweet." Help them rewrite.

A child names a need from home that feels private. Receive warmly. Move on. Use the pretend home framing. Do not probe.

How do I assess without grading? The class checklist is the assessment. Mark Y/N. Watch for trends. If half the class is N on coin counting after Week 14, slow down and re-teach.

CASH SAYS

Notice, notice, notice. What did you see?

Senior expert upgrade pack — Common Misconceptions (Grade 1)

Common Misconceptions table

Kid belief	What's actually true	How to coach (Grade 1 voice)
"A hairdresser doesn't make anything because hair was already there."	A hairdresser does a thing — they cut, style, wash. Doing a thing is a real business.	"Yes. The hair was there. The hairdresser does the cutting. Do a thing."
"My dad's office job isn't a business."	Most jobs are part of a business that helps people.	"Does Dad help people at his job? That helps a business. That's a kind of helper."
"Two dimes equals two cents."	Two dimes equals 20 cents. The dime says ten.	Touch the dots. "Each dime, ten dots. Two dimes, twenty dots. Twenty cents."
"A sign doesn't matter — people will figure it out."	A sign tells the customer the name, the item, and the price. Without a sign, the customer doesn't know.	Cover up the sign on the classroom store. "Now what is this place?" Children laugh. "That is why we have signs."
"If you make a promise, you can change it later if you want."	A business that breaks promises loses customers. Keeping a promise is part of being a helper.	Read a story about a kept promise and a broken one. Ask: "Which helper would you go back to?"

Classroom-tested moves (Grade 1)

If a student insists "my dad's job isn't a business": Affirm, then re-route. "Tell me one thing your dad does that helps people." Whatever the answer, write it on the board. "That helps a business." Don't probe further.

If two students fight over the make/do sort verdict: post the card on a "needs more thinking" middle box. The next day, vote as a class. Both children get to argue their case with a sentence each.

If a student writes a sign with the price but no name: "What's the name of your store?" They invent one on the spot. Add it to the sign. Pattern: name first, then item, then price.

If a student can't count past a nickel: stay on penny + nickel only for a week. Add the dime on Friday with a tactile-only intro (touch the smooth edge of the dime, the rough edge of the quarter). Build to all four by Week 14.

ROUND 2 PATCH — Common Misconceptions (Grade 1)

Common kid-belief	Reality	Coaching move
"A hairdresser doesnt make anything because hair was already there."	A hairdresser does a thing — they cut, style, dry. The "do" category is real work that produces a result.	Show before/after pictures of a haircut. Ask: "Whats different?" Affirm: "The hairdresser did something. Their business is in the do column."
"If you cant hold it in your hand, its not a real business."	Many businesses are services (cleaning, teaching, music lessons). The customer pays for what was done, not for what was made.	Sort 5 businesses on the carpet — bakery (make), dry cleaner (do), toy store (make), babysitter (do), bookstore (make). Have students walk to a side.
"If I have 5 dimes, I have 5 cents."	One dime = 10 cents. Five dimes = 50 cents.	Stack 10 pennies next to 1 dime; affirm equality. Repeat with 5 dimes = 50 cents. Use the play money board.
"The price on the sign is just for show."	The price tells the customer how many cents to give. The customer cant guess.	Run a 30-second customer skit. Customer asks "how much?" Helper points to the sign. Customer counts coins.
"The customer is always right."	Customers can be wrong about how something works. The job of the helper is to listen and be honest.	Read aloud a story where the customer is mistaken; the helper kindly corrects. Ask: "Was the helper kind? Was the helper honest?"

ROUND 2 PATCH — Multi-Class Branching Scenario (Grade 1)

"Sams paper-airplane business — make-or-do?" A 3-day branching scenario that practices BAVC + CBM + LTO.

- **Day 1.** Show a picture: Sam folds 10 paper airplanes. Ask the class: "Should Sam sell the airplanes (make a thing) or teach kids how to fold them (do a thing)?" Class votes by walking to one side of the room. No wrong answer.
- **Day 2.** Whichever side won, the class designs the business sign. If "sell airplanes" won — sign needs name, item (airplane), price (5¢ or 10¢). If "teach folding" won — sign needs name, service (folding lesson), price.
- **Day 3.** Class runs the business for one recess. Three students play customers; three play helpers. End with: "What did you make or do? Did the customer leave happy?"

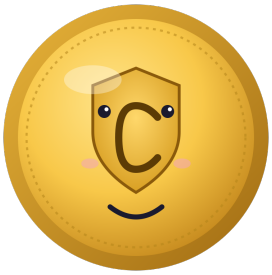
This branching practices the make/do sort, the 3-element sign, and the worker/customer role-play in one arc. Repeatable later in the year with new ideas (cookies, friendship bracelets, drawing portraits).

CASH

Which people, and how do you know?

ROUND 2 PATCH — Teacher Move Set (Grade 1)

- **Student insists "my dads job isnt a business."** Say: "Some people work for a business; some people own a business. Both are real jobs. Whose business does your dad work for?" If the answer is "I dont know," affirm: "We can ask later. Both are real jobs."
- **Student tries to count coins by size.** Say: "Lets count by worth, not by size. The dime is small but worth 10. The nickel is bigger but only worth 5. Lets stack 10 pennies next to a dime to remember."
- **Student says "we cant have a business because were kids."** Say: "Lots of kids run businesses. Today were practicing in the classroom, the way you practice spelling before you write a story. Practicing is real."
- **Student wants to charge $100 for the lemonade stand.** Say: "Lets check — would you pay $100 for one cup? What would you pay?" Use their answer to bring the price down to a reasonable kid-scale.
- **Two students fight over who is the helper.** Say: "Helpers and customers are both important. Lets switch every two minutes." Use a visible timer.



Which people, and how do you know?
