a FlexLifeFi K-12 program

GRADE 6 · CASH VIDEO SCRIPTS

Eight Scripts. One Cash.

Hook, content arc, and a clean classroom CTA — 2:30–3:00 each.

Year theme: Businesses Need Systems and Roles

CONTENTS

What's Inside

01 Video 1 — "A Business Is a System, Not a Storefront" (Week 1, Unit 1 Launch)

02 Video 2 — "Customers Are Segments, Not Crowds" (Week 4, Mid-Unit 1)

03 Video 3 — "The Same Thing, the Same Way, Every Time" (Week 9, Unit 2 Launch)

04 Video 4 — "Numbers Tell What Happened. Ratios Tell Whether It's Working." (Week 13, Mid-Unit 2)

05 Video 5 — "Roles Are How Teams Stop Arguing" (Week 19, Unit 3 Launch)

06 Video 6 — "Some Things Are Legal but Sketchy" (Week 23, Mid-Unit 3)

07 Video 7 — "The First Answer Is Rarely the Real Answer" (Week 31, Mid-Unit 4)

08 Video 8 — "Systems Thinker" (Week 36, Defense Day)

09 Production notes (for whoever animates these)

10 Video 1 — "A Business Is a System, Not a Storefront" — Upgrade

11 Video 2 — "Customers Are Segments, Not Crowds" — Upgrade

12 Video 3 — "The Same Thing, the Same Way, Every Time" — Upgrade

13 Video 4 — "Numbers Tell What Happened. Ratios Tell Whether It's Working." — Upgrade

14 Video 5 — "Roles Are How Teams Stop Arguing" — Upgrade

15 Video 6 — "Some Things Are Legal but Sketchy" — Upgrade

16 Video 7 — "The First Answer Is Rarely the Real Answer" — Upgrade

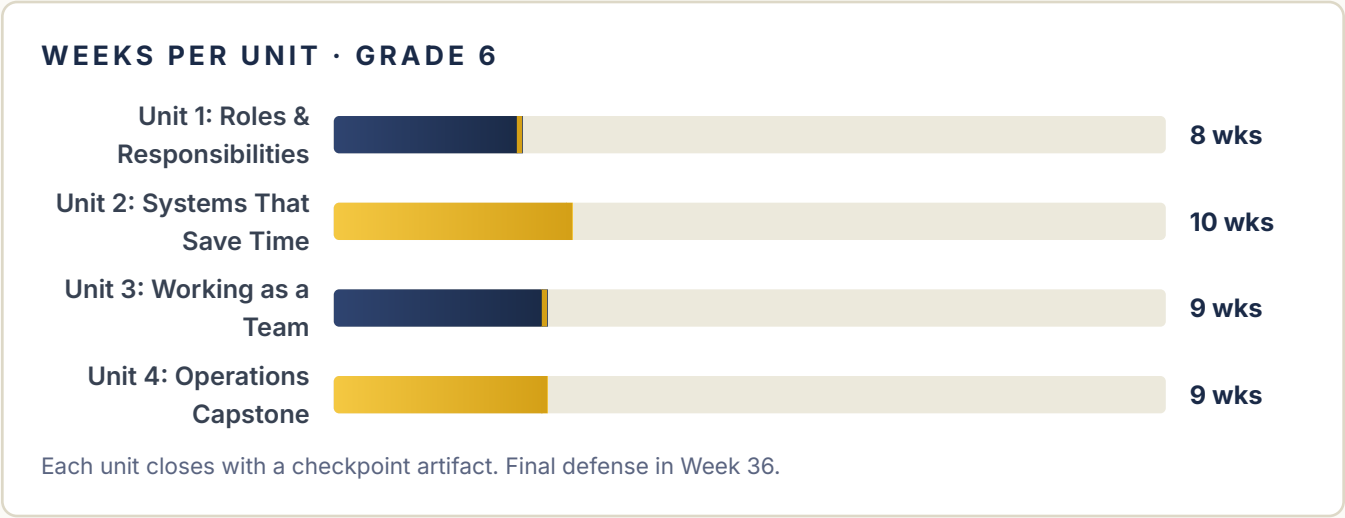
17 Video 8 — "Systems Thinker" — Upgrade

18 End-of-script Brand Stamp

YEAR-AT-A-GLANCE

Four Units. Thirty-Six Weeks. One Capstone.

The year is built as four units, each ending with a public-facing artifact that feeds the rolling Capstone. The bars show how the weeks are spent — roughly equal, with a slight lean toward the math-heavy unit because per-customer math is the load-bearing skill.



36 WEEKS

4 UNITS

8 CASH VIDEOS

GRADE 6 · CASH VIDEO SCRIPTS

Eight Scripts. One Cash.

Most adults run their lives without a system. You won't.

Eight short videos, one per major Grade 6 milestone. Each script targets 2:30–3:00 finished runtime, ~350–420 spoken words. Scripts include a hook, content arc, and a CTA (call to action) that lands in a classroom assignment or journal prompt. Voice and personality follow the Cash Mascot Style Guide — curious, warm, honest, never flatters, never says "everyone can be rich."

Format conventions:

- **[VISUAL]** = animated visual cue.
- **CASH:** = spoken dialogue.
- **[SFX]** = sound effect or music cue.

Video 1 — "A Business Is a System, Not a Storefront" (Week 1, Unit 1 Launch)

> *"Honest claims build customers who come back. Tricks build customers who feel taken."*
>
> — CASH

Runtime target: 2:45 **Strand mapping:** BAVC + OSO + LRCI

[VISUAL: Cash, the coin-shaped character, sitting next to a small wooden sign that says "OPEN." Behind Cash, a pizza slice slowly rotates.]

CASH: Hey. I'm Cash. Welcome to sixth grade. We're going to spend the year on one big idea. The idea is that a business is a system before it's a brand.

[VISUAL: The word "BRAND" appears in shiny letters. Then it fades. The word "SYSTEM" appears in plain letters and stays.]

CASH: Last year you learned about pricing. About profit. About the math of one sale. That was real. This year, we go behind the counter.

[VISUAL: The pizza slice freezes. A trace line appears, walking backwards from the slice: a kid holding it, a cashier, a kitchen, a flour sack, a wheat field.]

CASH: Watch this. A slice of pizza. Walk it backwards. Somebody handed it over a counter. Somebody made it. Somebody supplied the flour. Somebody supplied the tomatoes. Each of those somebodies added something. That path has a name. It's called a value chain.

[VISUAL: Four labeled boxes in a row: SUPPLIER · PRODUCER · SELLER · CUSTOMER.]

CASH: Supplier, producer, seller, customer. Most people only see the seller — the person at the counter. But that person is part of a chain. If you can see the chain, you can see how a real business works.

[VISUAL: The pizza chain morphs into other chains: a haircut chain, a tutoring chain, a lemonade chain.]

CASH: Here's the thing. The pizza shop with a great logo and no chain — that's a poster. The pizza shop with a working chain and a boring logo — that's a business that pays the rent.

[VISUAL: Two pizza shops side by side. One has a flashy sign. The other has a plain sign. Inside the flashy one, chaos. Inside the plain one, a calm system.]

CASH: This year, you'll build a system. You'll write down the boring step. You'll name who does what. You'll make the numbers talk to the dollars. You'll learn what to do when something breaks.

[VISUAL: A simple notebook appears with four section dividers: Chain · System · Roles · Stand-up.]

CASH: Here's your first move. Pick a real business in your town. Anything — coffee shop, bike shop, salon, bakery. Walk it backwards. Who supplies, who produces, who sells, who's the customer? Use real names where you can.

[VISUAL: A blank value-chain template fills the screen.]

CASH: And one rule for the year. When somebody says "people will love this," you ask: which people, and how do you know? You'll get good at asking. You'll get better at answering.

CTA: "Map a real local business's value chain. Bring it Wednesday. Names, not categories."

[Cash waves. Fade.]

Video 2 — "Customers Are Segments, Not Crowds" (Week 4, Mid-Unit 1)

Runtime target: 2:35 **Strand mapping:** CBM

[VISUAL: Cash standing in front of two posters. One says "KIDS." The other says "SIXTH GRADERS WHO WALK TO SCHOOL AND FORGET BREAKFAST ON GAME DAYS."]

CASH: Quick question. Which of these is a customer?

[VISUAL: An arrow points to "KIDS." A red circle with a line through it appears.]

CASH: Kids. Not a customer. Too vague. There are billions of kids. They want different things at different times for different reasons. You can't sell to a crowd. You can sell to a segment.

[VISUAL: The arrow moves to the second poster. A green check appears.]

CASH: Sixth graders who walk to school and forget breakfast on game days. That you can sell to. You know who they are, where they are, and what they're missing.

[VISUAL: The phrase "THE THREE THINGS RULE" appears, with a numbered list under it.]

CASH: Here's the rule. To call something a segment, you need three things you actually know about it. One — age or grade. Two — where they hang out. Three — what they care about. Three things. If you can't name three, you have a crowd.

[VISUAL: A character appears holding a "kids" poster, looking confused. Another character appears holding a clean three-line description, looking ready to go.]

CASH: A crowd lets you imagine selling to everybody. A segment forces you to be specific. Specific is harder. Specific is the work.

[VISUAL: The word SEGMENT appears with three boxes underneath, each filling in: AGE · LOCATION · CARES ABOUT.]

CASH: Here's a thing nobody tells you. The most successful small businesses don't sell to "everybody." They sell to one specific segment really well. Then maybe a second one. Crowd-businesses run out of money before they figure out who showed up.

[VISUAL: Two stores. One has a generic "OPEN TO ALL" sign and an empty front. The other has a specific "FOR THE TUESDAY-NIGHT CYCLISTS" sign and a small steady stream of customers.]

CASH: I'm going to ask you something hard. Who's not your customer? If you can't name somebody it's not for, it's a crowd. Naming who it's not for is how you find out who it is for.

[VISUAL: A persona-style sketch appears with a "Not for" line below the "For" line.]

CASH: And one note. Your segment is defined by behaviors — what they do — not by who's cool. A segment can decline to serve someone. It cannot be defined by who's cool enough. That's not a business. That's a clique.

CTA: "This week, write a Segment Sketch with three things you know — age or grade, where they hang out, what they care about. Bring it Friday."

[Fade.]

Video 3 — "The Same Thing, the Same Way, Every Time" (Week 9, Unit 2 Launch)

Runtime target: 2:50 **Strand mapping:** OSO

[VISUAL: Cash at a desk holding a clipboard with a checklist. The clipboard has a heading: STANDARD OPERATING PROCEDURE.]

CASH: I want to talk about something most people think is boring. It's not boring. It's the difference between a business and a hobby. It's called a Standard Operating Procedure. SOP.

[VISUAL: The letters SOP appear large.]

CASH: An SOP is a written, step-by-step recipe for how a business does the same thing the same way every single time. The same. Way. Every. Time.

[VISUAL: A factory line appears, then a coffee shop counter, then a hospital surgery prep, then a kid making a friendship bracelet on a table.]

CASH: Pilots use them. Surgeons use them. Coffee shops use them. The pilots could fly the plane from memory. They don't. They read the checklist out loud — every time — because the same way every time is what keeps the plane in the air.

[VISUAL: A pilot pre-flight checklist projects onto a screen with crisp checkmarks ticking off.]

CASH: Here's why this matters for you. If you have one good Saturday, that's a good day. If you have one good Saturday and a great SOP, you can have a hundred good Saturdays. Your friend can run it while you're sick. You can train somebody new. You can scale.

[VISUAL: One Saturday, then a hundred Saturdays calendar pages flip past.]

CASH: An SOP has three parts per step. Step. Detail. Check. Step is the action. Detail is the specifics — how much, where, when. Check is how you know the step was done right.

[VISUAL: A row appears: STEP · DETAIL · CHECK.]

CASH: Here's a bad SOP. Make sandwich. Add stuff. Eat. If I gave that to a robot, the robot would be confused. If I gave it to your cousin, your cousin would be confused. That's not an SOP. That's a vibe.

[VISUAL: A confused robot looks at the bad SOP, then at the kitchen, then at the bad SOP again.]

CASH: Here's a good SOP. Step one: get two slices of bread. Detail: same size. Check: hold them up — they match. That's not boring. That's how a business gets to be a hundred Saturdays instead of one.

[VISUAL: The good SOP rolls out as a clean five-row table.]

CASH: Here's your move. Pick one process in your venture. How to take an order. How to make one bracelet. How to deliver one tutoring session. Five steps. Each step has a check. The check is how you know it was done right.

CTA: "Draft a 5-step SOP with checks for one process in your venture. Bring it Wednesday. We'll pair-test it."

[Fade.]

Video 4 — "Numbers Tell What Happened. Ratios Tell Whether It's Working." (Week 13, Mid-Unit 2)

Runtime target: 2:50 **Strand mapping:** MFL

[VISUAL: Cash at a chalkboard. Two columns: "$80" on the left. "10%" on the right.]

CASH: Quick puzzle. A hypothetical 12-year-old runs a dog-walking service. Last month, they made eighty dollars. Question: is that good?

[VISUAL: The $80 sits there, alone. A question mark hovers next to it.]

CASH: You can't tell. Eighty dollars is a number. Numbers tell you what happened. They don't tell you whether it's working.

[VISUAL: The number $80 morphs. Below it appears: "Compared to what?"]

CASH: Compared to last month? Compared to costs? Compared to a savings goal? You need a ratio. A ratio puts the number in context. Eighty dollars of what. Eighty dollars over what.

[VISUAL: A formula appears: SAVINGS RATE = SAVINGS ÷ INCOME.]

CASH: Here's the most useful ratio for a small business. The savings rate. It's how much of your income you set aside, expressed as a percentage. Eighty dollars in income, eight dollars saved — that's a 10 percent savings rate.

[VISUAL: A pie chart with 10% savings shaded in green, 90% shaded gray.]

CASH: Why does this matter? Because the month a customer flakes, or your supplies cost more, or something breaks — you'll need money you didn't spend. The savings rate is the cushion. It's also the answer to "is this business healthy?"

[VISUAL: A jar labeled "savings" gradually fills as months tick by on a calendar.]

CASH: Here's where the math comes in. Income minus expenses equals what's left. Of what's left, some goes to savings. The percentage you choose is a decision. Most kid-businesses don't decide. They just spend whatever's left. That's why most kid-businesses run out of money on month two.

[VISUAL: Two scenarios. One labeled "no savings rate" — runs out of money in month two. One labeled "10% savings rate" — keeps going.]

CASH: Here's your move. Build a one-month ledger for a hypothetical version of your venture. Income on one side. Expenses on the other. Set a savings rate target first — before you run the month. Then check at the end: did you hit it?

[VISUAL: A blank ledger template fills the screen.]

CASH: And one rule. We're not asking about your family's money. Ever. The ledger is for a hypothetical 12-year-old's small business. The math is real. The numbers are made up. Your family's money is private.

CTA: "Build your one-month ledger this week. Set the savings rate before, check it after. Bring it Wednesday."

[Fade.]

Video 5 — "Roles Are How Teams Stop Arguing" (Week 19, Unit 3 Launch)

"Revenue is loud. Contribution margin is true."

— CASH

Runtime target: 2:40 **Strand mapping:** LTO + OSO

[VISUAL: Cash standing next to four cartoon characters who are all pointing at each other and looking annoyed.]

CASH: Here's a story that's true a thousand times over. Four kids run a bake sale. Nobody decides who does what. On Saturday, three of them bring cookies. Nobody made flyers. Nobody handles money. They make fourteen dollars. Everybody's mad. Three of them never want to work together again.

[VISUAL: A chaotic bake-sale scene. A "$14" sign on a near-empty table.]

CASH: That bake sale didn't have a team problem. It had a role problem. Nobody knew whose job something was.

[VISUAL: A four-letter acronym appears: R · A · C · I.]

CASH: I'm going to give you the simplest leadership tool that real teams use. It's called RACI. Four letters. Each letter is a role for each task.

[VISUAL: Each letter expands one at a time.]

CASH: R is Responsible. The person who does the work. A is Accountable. The person who owns whether it gets done — and there's only one A per task. C is Consulted. People whose input matters before. I is Informed. People who need to know after.

[VISUAL: A grid appears. Tasks down the side, people across the top. Cells fill in with R, A, C, or I.]

CASH: Here's the rule that solves most team fights. Every task gets exactly one A. Multiple Rs are fine. The A is the one whose neck is on the line if it doesn't get done.

[VISUAL: Four tasks for the bake sale appear, each with an A clearly assigned.]

CASH: A is not "the boss." A is "the one who chases it down." If the flyers don't get posted, the A isn't who didn't post them — it's who didn't make sure they got posted. That's a different job from doing them.

[VISUAL: Two characters. One holds a flyer, labeled R. One stands with a clipboard, labeled A. They high-five.]

CASH: Here's why this matters. Teams that argue about whose job something was — that's a team without a RACI. Teams that don't argue about whose job something was — that's a team with one. Or with one person who quietly remembered who was A.

[VISUAL: Two team-meeting scenes. One chaotic, one calm.]

CASH: Your move. Get into a team of four assigned by your teacher. Pick one Capstone. Build a RACI with four tasks. Each task gets one A. Defend your call.

CTA: "Build your team's RACI. Four tasks, four people, exactly one A per task. Bring it Wednesday."

[Fade.]

Video 6 — "Some Things Are Legal but Sketchy" (Week 23, Mid-Unit 3)

Runtime target: 2:45 **Strand mapping:** ESL

[VISUAL: Cash standing between two product packages. One is plain and labeled "FULLY FINE." The other is fancy, labeled "LEGAL BUT SKETCHY."]

CASH: I want to talk about ethics. Not the lecture version. The kid-business version.

[VISUAL: Three columns appear: FULLY FINE · LEGAL BUT SKETCHY · OVER THE LINE.]

CASH: Most kid-business decisions are easy. Selling a friendship bracelet you made for five dollars with a true description — that's fully fine. Copying somebody else's craft design and selling it as your own — that's over the line. Easy.

[VISUAL: Two cards appear, one in each outer column.]

CASH: The interesting space is in the middle. Legal but sketchy. Stuff that's technically allowed, technically not against the rules, but a customer or a friend would feel taken if they knew the whole story.

[VISUAL: A third card slides into the middle column.]

CASH: Examples. Reselling a free school pencil for a dollar. Telling customers "everyone in school loves these" when only three people have tried it. Adding a fifty-cent rush fee without telling the customer it's optional. None of those are illegal. All of them are sketchy. All of them are choices.

[VISUAL: Three small scenarios animate, one for each example.]

CASH: Here's the thing about the middle column. There's no rulebook for it. You have to decide. The questions that help you decide are these.

[VISUAL: Four questions appear, one at a time.]

CASH: One. Did the customer know what they were getting? Two. Could they have said no? Three. Did anyone get hurt — even a little? Four. Is this how I'd want to be treated?

[VISUAL: Each question gets a checkbox.]

CASH: Run those four questions on the fence-sitters. If you can answer all four cleanly — fully fine. If you can't answer one of them cleanly — sketchy. If three or four of them are messy — over the line.

[VISUAL: A meter slides from green to yellow to red as the answers shift.]

CASH: Here's the move adults make that I want you to notice. Some adults get good at the legal but sketchy lane and call it "smart business." It's not. It's how customers stop trusting you. The line between persuasion and tricks is real. You're going to draw your line this year. Out loud. With reasons.

[VISUAL: A character draws a line on a piece of paper with a marker.]

CASH: Your move. Sort five cases into the three columns. Defend at least one borderline call with a reason. And write your Capstone Pledge. What you will do. What you won't. What you'd say if a friend pushed you to "stretch the truth."

CTA: "Sort the five cases. Write your Capstone Pledge. Bring both Friday."

[Fade.]

Video 7 — "The First Answer Is Rarely the Real Answer" (Week 31, Mid-Unit 4)

Runtime target: 2:40 **Strand mapping:** PSIG + LRCI

[VISUAL: Cash holding a question mark. Behind Cash, a chain of question marks dangles down.]

CASH: I'm going to tell you about a tool that changes how you think when something goes wrong. It's called the 5 Whys.

[VISUAL: The numbers 1, 2, 3, 4, 5 appear in a vertical column, each with a "WHY?" next to it.]

CASH: Here's the bake-sale story again. On Saturday, sales dropped fifty percent. Why?

[VISUAL: A small text bubble appears: "Fewer people came."]

CASH: That's the first answer. Most people stop here. The first answer is never wrong, exactly — it's just not useful yet. What do you do with "fewer people came"? Nothing. So you ask why again.

[VISUAL: A second bubble: "Nobody saw the sale was happening."]

CASH: Why? Because nobody posted flyers in time. Why? Because Priya took the flyers home Friday. Why? Because nobody was the A on flyers — there was no plan for who posts when.

[VISUAL: Each "why" stacks on top of the last, building a tower.]

CASH: Five whys later, you have a root cause. Not a surface cause. The thing that, if you fix it, the problem actually goes away.

[VISUAL: The phrase "ROOT CAUSE" appears at the bottom of the stack, glowing.]

CASH: Here's what's wild. Most root causes are not "somebody's fault." They are system gaps. No SOP. No RACI. No check. The 5 Whys keeps walking you toward the system instead of toward a person to blame.

[VISUAL: A "blame finger" appears, pointing at a kid. Then it lifts up, away, and lands on a missing checkbox in a system diagram.]

CASH: That's important. When the 5 Whys lands on "because Priya is irresponsible," you're done with the technique — but you haven't finished. Push: why did the system rely on one person remembering? Because nobody made it the A on the RACI.

[VISUAL: The RACI grid appears with one missing A. A green box fills it in.]

CASH: Here's the test of a good 5 Whys. After you write the fifth answer, ask: if I fixed this, would the problem actually go away? If yes — good 5 Whys. If no — push another why.

[VISUAL: A green check appears next to "Yes, would go away."]

CASH: Your move. Pick a hypothetical bad day for your venture. Sales dropped. A customer complained. A deadline missed. Run the 5 Whys until you hit a system gap. Write what you'd add to your system to fix it.

CTA: "Run the 5 Whys on a bad day for your venture. Land on a root cause. Bring it Friday."

[Fade.]

Video 8 — "Systems Thinker" (Week 36, Defense Day)

Runtime target: 3:00 **Strand mapping:** All eight

[VISUAL: Cash at a slightly different desk than the year started with. The classroom backdrop has been replaced with a clean, calm panel of muted color. A small tower of artifacts sits on the desk: a value-chain map, an SOP, a ledger, a RACI, two stand-up logs.]

CASH: Okay. Last one. We made it.

[VISUAL: A timeline appears with checkpoints marked: Week 1, Week 8, Week 18, Week 28, Week 36.]

CASH: I want to say something honest. You probably didn't make money this year. You probably didn't even sell anything for real. You finished the year with a notebook, a poster, and some math. That's the win.

[VISUAL: The cash register is empty. The notebook is open and full. Cash points to the notebook.]

CASH: Because here's what most people who start small businesses skip — and they regret it later. They skip the boring step. They run from memory. They argue about

whose job something was. They have one good Saturday and then everything falls apart.

[VISUAL: A character throws together a fast business, runs it for one weekend, and walks away exhausted.]

CASH: You didn't skip. You wrote it down. You named the chain. You wrote five steps with checks. You computed a savings rate. You filled in the RACI. You drew your line on the legal-but-sketchy stuff. You ran a stand-up. You used the 5 Whys.

[VISUAL: Each artifact on the desk lights up as Cash names it.]

CASH: Those things — chain, system, roles, stand-up — those are the moves of every real business that lasts. They are the moves you missed in school for years before this year. And now they're yours.

[VISUAL: The artifacts pull together into a small toolkit icon labeled "SYSTEMS-AND-ROLES KIT."]

CASH: A few things I want you to remember. One. A business is a system before it's a brand. The logo is fun. The system pays the rent. Two. Roles stop arguments. The one A per task rule will save you years of group-project drama.

[VISUAL: Two side-by-side imaginary scenes — one chaotic team, one calm team. The calm team has a RACI on the wall.]

CASH: Three. Numbers tell what happened. Ratios tell whether it's working. The savings rate is the small business's smallest honest mirror. Look in it monthly.

[VISUAL: A jar with a savings rate line drawn at the target percentage.]

CASH: Four. The first answer is rarely the real answer. Five whys, every time, until you land on a system gap.

[VISUAL: A "1 → 2 → 3 → 4 → 5" arrow walking down a slope.]

CASH: And one more — for the road. Some things are legal but sketchy. Drawing your line is your job, not someone else's. Don't outsource it.

[VISUAL: A line drawn with a marker. The marker is in the student's hand, not Cash's.]

CASH: Today is your defense. Tell them about your chain, your system, your roles, your adjustment. Be honest about what would still break. Use the words. Use the artifacts. Don't sell. Show.

[VISUAL: A panel of three faceless silhouettes appears, each with a clipboard.]

CASH: Whether you start a real venture next year or not, you've already done something most adults haven't. You've practiced the boring step. And the boring step is the one that turns one good Saturday into a hundred.

CTA: [VISUAL: A simple line of text.] "Go give your defense. We'll see you in Grade 7 — where we go even deeper into your customer."

[Cash waves. A simple "Cash to Company" logo appears. Fade.]

Production notes (for whoever animates these)

> *"Most adults skip this. You won't."*
>
> — CASH

- **Energy:** Cash is calm and curious, not hyper. No exclamation-heavy shouting. The tone is more "thoughtful older sibling" than "TV presenter."
- **Visuals:** Animation should feel hand-drawn or paper-cutout, not slick 3D. Style should signal "we made this with care, not a marketing budget."
- **Music:** Sparse. Light underscore at most. Silence is fine.
- **Captions:** Always on. Some students learn through reading. Captions are not optional.
- **Length discipline:** Keep within 30 seconds of target runtime. Cut content rather than rush delivery — the slower pace is part of the brand.

UPGRADE LAYER (added by Brand & SMM Director, 2026-04-25)

6-8 cross-script conventions (apply to all 8 G6 scripts): - **Signature opener:** [VISUAL: A real concrete scene, no setup.] **CASH:** "Most adults skip this. Watch." - **Signature physical move:** the Slow Lean — Cash physically leans toward camera before delivering a contrarian truth. - **Twist-structure mandate:** every script sets up the obvious answer, then flips it with evidence. - **9-second Shorts cut MANDATORY at top.**

Video 1 — "A Business Is a System, Not a Storefront" — Upgrade

- **NEW HOOK:** [VISUAL: A bakery storefront photo. Then: zoom out. The "bakery" is actually 11 connected things — supplier, oven, schedule, marketing list, refunds, etc.] **CASH:** "Most adults skip this. Watch. That's not a bakery. That's eleven things glued together."
- **Shareable Cash line:** "A business isn't a storefront. It's a system."

- **9-second Shorts cut:** Bakery zoom-out reveal → 11 boxes appear → "System. Not storefront."
- **Classroom CTA:** Map your venture as a system. Five boxes minimum. Bring it Wednesday.

Video 2 — "Customers Are Segments, Not Crowds" — Upgrade

- **NEW HOOK:** [VISUAL: A crowd labeled "MY CUSTOMERS." Cash pulls one card out: same crowd, sliced into 4 different colors.] **CASH:** "Most adults skip this. Watch. That crowd is actually four crowds."
- **Shareable Cash line:** "A crowd is a guess. A segment is a customer."
- **9-second Shorts cut:** Crowd → segment slice → "Different segments. Different products. Different prices."
- **Classroom CTA:** Slice your customer crowd into 3 segments. Name each. Bring it Friday.

Video 3 — "The Same Thing, the Same Way, Every Time" — Upgrade

- **NEW HOOK:** [VISUAL: Two pizza shops. Same pizza ordered Tuesday. One looks identical both days. The other is different both times.] **CASH:** "Most adults skip this. Watch. Same store. Different pizza."
- **Shareable Cash line:** "A system is what makes Tuesday's pizza match Friday's."
- **9-second Shorts cut:** Two-pizza compare → "System. Same. Every. Time."
- **Classroom CTA:** Write a 3-step SOP for one part of your venture. Bring it Wednesday.

Video 4 — "Numbers Tell What Happened. Ratios Tell Whether It's Working." — Upgrade

> *"A little less wrong, every week."*
>
> — CASH

- **NEW HOOK:** [VISUAL: Two stores. Both made $500. Cash holds up a magnifying glass.] **CASH:** "Most adults skip this. Watch. Same revenue. Different stories."
- **Shareable Cash line:** "Numbers say what. Ratios say whether."
- **9-second Shorts cut:** Two stores, same revenue → ratio reveal → "Profit margin is the truth."
- **Classroom CTA:** Compute one ratio for your venture this week — gross margin OR conversion. Bring it Wednesday.

Video 5 — "Roles Are How Teams Stop Arguing" — Upgrade

- **NEW HOOK:** [VISUAL: Three teammates all yelling about the same task.] **CASH:** "Most adults skip this. Watch. They're not fighting about the work. They're fighting because nobody owns it."
- **Shareable Cash line:** "Roles aren't bossy. They're how teams stop arguing."
- **9-second Shorts cut:** Three-yelling → role cards → quiet → "RACI."
- **Classroom CTA:** Build a 3-row RACI for your team's next deliverable. Bring it Friday.

Video 6 — "Some Things Are Legal but Sketchy" — Upgrade

- **NEW HOOK:** [VISUAL: A sign: "LEGAL." Below it: "Sketchy?" A line gets drawn between them.] **CASH:** "Most adults skip this. Watch. Legal is the floor. Sketchy starts well above it."
- **Shareable Cash line:** "Legal is the floor. The line you set is higher than that."
- **9-second Shorts cut:** Floor / line graphic → 3 case studies → "Where's YOUR line?"
- **Classroom CTA:** Three sketchy-but-legal scenarios. Where's your line? Bring it Wednesday.

Video 7 — "The First Answer Is Rarely the Real Answer" — Upgrade

- **NEW HOOK:** [VISUAL: A customer says "I don't have time." Cash leans in. The bubble peels back: actually means "I don't trust your value."] **CASH:** "Most adults skip this. Watch. The first answer is the surface."
- **Shareable Cash line:** "The first answer is rarely the real answer."
- **9-second Shorts cut:** Surface answer → peel → real answer → "Five-Whys."
- **Classroom CTA:** Run "5 Whys" on the last objection you got. Surface to root. Bring it Friday.

Video 8 — "Systems Thinker" — Upgrade

- **NEW HOOK:** [VISUAL: A kid at a defense panel. They draw their venture as a system map on a white board.] **CASH:** "Most adults skip this. Watch. They didn't pitch a product. They pitched a system."
- **Shareable Cash line:** "You stopped seeing storefronts. You started seeing systems."
- **9-second Shorts cut:** White-board reveal → "System thinker. Year done."
- **Classroom CTA:** Defense Day. Pitch your venture AS A SYSTEM. Five connected boxes minimum.

End-of-script Brand Stamp

[VISUAL: Cash to Company logo. **"Most adults skip this. You won't."**]

ABOUT THE HOST

Cash, in five words

curious · warm · honest · patient · specific

"I'm Cash. I don't promise wealth. I don't promise success. I promise that the moves — interview, math, message, listen — will make you a clearer thinker about money no matter what you end up doing."

— CASH

What Cash does

- **Asks questions that point to evidence.** Cash never tells; Cash asks what your evidence says.
- **Names rules sparingly.** "An assumption is something you think is true without checking. Evidence is something you observed, heard, or counted."
- **Tells short, made-up-but-realistic stories.** 30–60 seconds, shows don't tell.
- **Celebrates the move, not the win.** Revision, honesty, and evidence — not revenue.
- **Hedges deliberately.** probably, often, sometimes — never absolutes about complex topics.

What Cash never does

- Flatter ("amazing!", "great job!"), promise wealth, moralize about money.
- Reference real brands or living celebrities as endorsements.
- Surface family financial details. (Hypothetical scenarios only.)
- Pretend the world is fair. Cash is honest about systemic factors without becoming a politics class.

> *When in doubt, work one of these into the script: Which people, and how do you know? · Being wrong on Day 1 is the deal. · Revenue is loud. Contribution margin is true. · A little less wrong, every week.*

STRAND OUTCOMES

Eight Strands. One Year. Verifiable Outcomes.

Cash to Company runs the same eight strands K-12. Each year deepens the demonstration. The Grade 6 version of each strand is below.

Code	Strand	Grade 6 demonstrated outcome
BAVC	Business Awareness and Value Creation	Identify a business problem, propose a value-creation hypothesis, and revise it with customer evidence.
PSIG	Problem Solving and Idea Generation	Generate, screen, and refine ideas; document why one was chosen and the others were not.
MFL	Money and Financial Literacy	Compute revenue, variable cost, contribution margin, and breakeven for a real product or service.
CBM	Customers, Branding, Marketing	Build a persona from interview evidence; design honest messaging; A/B test two claims.
OSO	Operations, Systems, Organization	Design a simple weekly operating cadence with named roles, handoffs, and a feedback loop.
LTO	Leadership, Teamwork, Ownership	Run and document a team meeting; resolve one disagreement using shared evidence.
ESL	Ethics, Safety, Legal Awareness	Identify the line between persuasion and manipulation; flag one borderline claim and rewrite it honestly.
LRCI	Launch Readiness and Continuous Improvement	Pilot, measure, and document at least three iterations with rationale and what changed.

STANDARDS ALIGNMENT

Six Benchmarks This Year

Standards are cited at the benchmark level. Honest gaps are named when they exist.
The Capstone artifact addresses each one.

Benchmark	What students must demonstrate
Jump$tart 2 (Spending & Saving) 8-1	Identify ways to deposit, store, and pay for goods and services.
CCSS-ELA SL.6.1	Engage effectively in collaborative discussions; build on others' ideas.
CASEL Self-Management	Set and monitor goals; manage time.
C3 D2.Eco.4.6-8	Describe the role of competition in the determination of prices and wages.
CASEL Relationship Skills	Establish and maintain healthy relationships; communicate effectively.
Jump$tart 6 (Financial Decision Making) 8-2	Identify ways that consumers may avoid making poor decisions.

HOW TO READ THIS TABLE

Each lesson cites at least one of these benchmarks. Each Capstone checkpoint addresses two or more. The Teacher Guide includes a per-lesson standards crosswalk.

"Standards aren't a cage. They're a list of moves you're going to be glad you can make. Pick one. Practice it. Move on."

— CASH

CAPSTONE RUBRIC (4-POINT)

How We Score the Capstone

The Capstone artifact is scored on four traits, each on a 4-point scale. Honest, specific, decision-oriented work earns the high marks. Generic or assumption-laden work earns the low ones.

Trait	1 — Emerging	2 — Developing	3 — Proficient	4 — Advanced
Evidence quality	Mostly assumptions; few or no quotes.	2-3 interview quotes; partial evidence.	5+ direct quotes; varied sources; coded patterns.	Triangulated quotes plus behavioral observation; counter-evidence acknowledged.
Per-customer math	Confused costs; no contribution margin.	CM computed but with errors; one price scenario.	Correct CM and breakeven; clear pricing rationale.	CM under multiple price scenarios; LTV-lite reasoning.
Honest messaging	Vague or misleading claims.	Some specifics; some unsupported claims.	All claims supported; clean ethics check.	A/B-tested copy with rationale; resists clever-but-borderline phrasing.
Feedback system	One-time check; no documentation.	Ad-hoc feedback; partial revisions.	1-week feedback loop with 3 documented changes.	Sustained loop plus signal-vs-noise analysis plus revision log.

CALIBRATION NOTE

Score honestly. A "3" means the student met the standard the way an adult professional would. A "4" means they did something a working entrepreneur would be proud to show. Withhold "4" unless the work earns it.

SENSITIVITY AND FAMILY ENGAGEMENT

What We Don't Ask. What We Always Frame.

Money is a tool, not a virtue. Some students live in households with credit-card debt, low or no banking access, or active financial stress. The curriculum is built so that none of those students is asked to disclose, perform, or apologize for their family situation.

Rules of the room

- **Never ask about family money.** No questions about parents income, debts, accounts, or banking status.
- **Use neutral hypotheticals.** "For a sample family with a $4,000/month take-home" — not "your family."
- **Decouple wealth from worth.** Cash never says "everyone can be rich." Cash says "you will be a clearer thinker about money no matter what you end up doing."
- **Name systemic factors honestly.** Wage gaps, geography, and luck shape outcomes. The skill we build is the skill in the student hands.
- **Protect the venture.** A student Capstone is theirs. We don't require they share revenue or family contribution. The artifact is the work, not the bank account.

Family engagement

Parents get one well-framed question per quarter — never a quiz, never a money-disclosure prompt. The default frame is curiosity ("What did you notice about your customers this week?"), not interrogation ("How much did you make?").

> *"Money is a tool. The question is not whether your family has a lot of it. The question is what you do with the moves we are practicing — interview, math, message, listen — wherever your starting line happens to be."*
>
> — CASH

ACTIVITY INDEX

Ten Activities. One Notebook.

Every activity in this book is built to be done with a pencil, your own evidence, and the questions Cash keeps asking. Skip nothing. Date everything. Re-read in three months.

No.	Activity	What you will do
01	Day 1 Customer Assumption	One sentence, one card. Don't try to be right; try to be specific.
02	Open vs. Leading Questions	Rewrite five leading questions into open ones. Practice on a partner.
03	Coding Patterns from Transcripts	Highlight surprises, frustrations, wishes. Tally them. Find the pattern.
04	Persona Pack v1	Combine evidence into one specific person — name, behaviors, top frustration.
05	Variable Cost per Unit	From a real receipt, compute the cost per one of the thing you sell.
06	Contribution Margin Worksheet	Price minus variable cost. Decide if it covers your fixed costs.
07	Two-Message A/B Test	Two honest messages. Three-day test. Report the winner and why.
08	Persuasion vs. Manipulation Line	Sort 10 ad claims onto a line. Defend your placement.
09	1-Week Feedback Loop	Collect, code, and act on feedback. Document three changes.
10	Final Capstone Defense	Five slides. Five minutes. Show the moves you made.

NOTEBOOK SETUP

Get a single notebook for the whole year. Number every page. The first 5 pages are your Vocabulary Spine. The last 5 pages are your Day-1 Assumptions (you will come back to those). Everything in between is your work.

Notebook checklist

- **Title page** — your name, your venture working-title, today's date.
- **Vocabulary spine** — 5 pages reserved for definitions you will add as we go.
-

Customer notes — one section for interview transcripts. Use direct quotes, with initials and dates.

- **Math section** — receipts taped in, per-unit computations, contribution margin scratch work.
- **Messaging section** — drafts of two-claim A/B tests, with what won and why.
- **Feedback log** — one page per week of your feedback system, with the three changes you made.

WORKED EXAMPLE

Worked Example: Roles That Save Time

Maya runs a small backyard car-wash on Saturdays with three friends. Last weekend, every kid did every job. They washed nine cars in five hours. They argued twice. Two cars came out streaky. Maya's notebook says: "Same kid greeted, soaped, rinsed, and took the money. Bottleneck: the towel-dry. Decision: split into roles."

This week, Maya assigns roles. Greeter, soaper, rinser, dryer, money. They wash twelve cars in five hours. Zero arguments. No streaks. Same humans. Different system.

WHAT TO COPY

The move here is not the answer. It is the structure: specific number, specific person, specific decision. Use that pattern in your own venture this quarter.

> *"Most adults skip this. You won't. Pick one customer. Compute one number. Decide one thing." — Cash*

END-OF-QUARTER REFLECTION

Four Quarters. Same Five Questions.

At the end of every quarter you will answer the same five questions. The answers should look different over time. Reread the previous quarter before you write a new one.

1. **Which people did you talk to this quarter, and what did they actually say?**

   Specific quotes, initials, dates. Resist the urge to summarize.
2. **What did you change in your venture because of evidence?**

   Name the change. Name the evidence that caused it.
3. **What is one number you know better now than three months ago?**

   Variable cost per unit. Contribution margin. Anything quantitative.
4. **What is a claim you made that you would take back?**

   Be honest. The claim does not have to be public. The honesty is the move.
5. **What would Cash ask you about all of this?**

   "Which people, and how do you know?" is always available. Find your own version.

> *"Reflection is not a feeling check-in. It is a memory tool. The you in three months wants to know what the you today learned. Write it down so future-you can use it."*
>
> — CASH

One promise.

Cash to Company makes one promise: students who move through this program will be clearer thinkers about money and entrepreneurship — no matter what they end up doing for a living.

We do not promise wealth. We do not promise success. We promise clarity.

"Most adults run their lives without a system. You won't."

— CASH, GRADE 6
