GRADE 6 · STUDENT ACTIVITY BOOK

Workbook for the Year

Activities, sort tasks, and reflection prompts you'll keep.

Year theme: Businesses Need Systems and Roles

CONTENTS

What's Inside

01 How to use this book

02 Unit 1 — Where the value comes from

03 Unit 2 — Build the system

04 Unit 3 — Who does what

05 Unit 4 — Run the stand-up

06 Capstone Defense Prep

07 A short note from Cash

08 Bonus / Extension Activities (use as time allows)

09 A note on saving your work

10 Senior expert upgrade pack — Deliberate practice (Grade 6)

YEAR-AT-A-GLANCE

Four Units. Thirty-Six Weeks. One Capstone.

The year is built as four units, each ending with a public-facing artifact that feeds the rolling Capstone. The bars show how the weeks are spent — roughly equal, with a slight lean toward the math-heavy unit because per-customer math is the load-bearing skill.

GRADE 6 · STUDENT ACTIVITY BOOK

Workbook for the Year

Most adults run their lives without a system. You won't.

Welcome.

This is your activity book for the year. It's the place to do the work that turns big ideas into real things you've made. You'll fill it in, mess it up, scratch things out, and revise. That's the point.

Cash, your animated guide for the year, will pop up between sections to ask the questions that matter. Cash never tells you what to do — Cash asks what your evidence says. Get used to the question: **which people, and how do you know?**

This book mirrors the four units. Each unit has activities, projects, and reflection prompts. You'll also keep a Capstone Journal in a separate notebook — the place where you sketch, plan, and reflect. This book is the structured part. The journal is the messy part. You need both.

How to use this book

"A little less wrong, every week."

— CASH

- **Date every entry.** Future-you will care.
- **Use real numbers and real names of businesses.** When you map a value chain, name the actual coffee shop. When you do a ledger, use realistic dollar amounts.
- **Don't skip the reflection prompts.** They look optional. They are not.
- **It's okay to be wrong.** Most of the year is about catching where you were wrong, faster.

A note on private money: nothing in this book asks you to share what your family earns, owes, or spends. The ledger work is for a hypothetical 12-year-old's small business — you make up the numbers, and the math is real. Keep your family's money private.

Unit 1 — Where the value comes from

Activity 1.1 — Pizza Chain Warm-Up

Walk a pizza slice backwards. Fill in at least one specific name at each node.

Node	Who / What
Supplier	
Producer	
Seller	
Customer	

One thing I didn't realize about how a pizza gets made:

Activity 1.2 — Map a Real Local Business

Pick a real business in your town. Map its value chain. Specifics, not categories.

Business name: _____

Node	Specific example
Supplier	
Producer	
Seller	
Customer	

What would happen if the supplier disappeared?

Activity 1.3 — Crowd vs. Segment Sort

Mark each as a Crowd (C) or a Segment (S):

___ Kids ___ Sixth graders who walk to school and forget breakfast on game days ___ Teenagers ___ Eighth-grade soccer players who have practice from 3:30 to 5:00 on Tuesdays ___ Adults ___ Adults who walk their dogs in the park between 6 and 7 a.m. on weekdays ___ People in my town ___ My neighbor Mr. K who has back pain and can't shovel snow ___ Hungry kids ___ Sixth graders whose lunch period is 5th and who finish lunch with 10 minutes to spare

In one sentence: what's the difference between a crowd and a segment?

Activity 1.4 — Segment Sketch for Your Capstone

My venture (one sentence):

My customer segment — three things I know:

1. Age or grade: _____
2. Where they hang out: _____
3. What they care about: _____

A realistic quote my segment might say (something they'd actually say in their own words):

"_____"

One thing I'm not sure about my segment:

Activity 1.5 — Caption: My Chain Plus My Segment

Write a 4–6 sentence paragraph in your Capstone Journal connecting the value chain to the segment.

> *"My venture is _ . **The chain starts with _** who provides **_ , goes to _** , then **_ , and ends with _** . The thing my segment cares most about is _ _ _ _, and that's why my venture exists."*

Unit 1 Reflection

In your Capstone Journal, answer:

1. What surprised me about how a real business is connected — the chain?
2. What's the difference between a crowd and a segment, in my own words?
3. What's one thing I want to figure out about my segment in Unit 2?

Unit 2 — Build the system

> *"Listening is not a moment. It's a system."*
>
> — CASH

Activity 2.1 — Fix the Bad SOP

This SOP is too vague. Rewrite it as 5 steps with checks.

> ***Original:*** *PB&J: 1) Get bread. 2) Put stuff on it. 3) Eat.*

Step	Detail	Check
1		
2		
3		
4		
5		

Activity 2.2 — Capstone SOP

Pick one process in your venture (e.g., "how to take an order," "how to make one bracelet," "how to deliver one tutoring session").

Process name: _____

Step	Detail	Check
1		
2		
3		
4		
5		

The most likely place this SOP would break, in my honest opinion:

What I'd add to the SOP to prevent that break:

Activity 2.3 — Pair Test of the SOP

Trade SOPs with a partner. Have them try to "do" your SOP without asking questions.
Mark each step:

Step	Did your partner pause / ask / guess?
1	
2	
3	
4	
5	

One revision I'm making based on the pair test:

Activity 2.4 — Hypothetical Jordan's Ledger

Jordan, age 12, runs a dog-walking service. Fill in the ledger from the story:

Date	Description	Income	Expense
4/3	Walk Mrs. K's dog		
4/5	Plastic bags		
4/10	Walk Sam's dog		
4/12	Walk Mrs. K's dog		
4/19	Walk Pat's dog		
4/26	New leash		
	Totals:		

- **Total income:** $_
- **Total expenses:** $_
- **Money left:** $_
- **If Jordan wants a 10% savings rate, Jordan saves:** $_
- **If Jordan wants a 25% savings rate, Jordan saves:** $_

Activity 2.5 — Capstone Ledger (One Month)

Fill in a one-month ledger for your hypothetical Capstone. Use realistic numbers — the math is real, but the numbers are made up to fit your venture.

My venture's monthly ledger:

Date	Description	Income	Expense
	Totals:		

- **My savings rate target (set BEFORE the month): _____%**
- **Total income:** $_
- **Total expenses:** $_
- **Money left:** $_
- **Actual savings:** $_
- **Actual savings rate: _____%**

If income dropped 20%, my savings rate would become: _%

One sentence: why this savings rate, and not 5% higher or lower?

Activity 2.6 — Systems Memo

Write a 1-page memo in the Capstone Journal:

To: Cash (and your future self) **From:** [Your name] **Date: _____ Subject:** Systems Pack for [your venture]

1. **My SOP** (one sentence: what process and why it matters).
2. **The check that matters most** (one sentence: which check, and what it prevents).
3. **My savings rate target** (one sentence: target and reason).
4. **The most likely failure point in my system** (one sentence).

Unit 2 Reflection

In your Capstone Journal:

1. Did writing the SOP change my mind about anything in my venture?
2. What number in my ledger am I least sure about?
3. If a stranger had to follow my SOP tomorrow, what would they get wrong?

Unit 3 — Who does what

Activity 3.1 — Fix the Bad Bake Sale

Maya, Ben, Priya, and Luca's bake sale flopped because nobody knew who did what. Fill in a RACI for them. Tasks: Bake, Flyers, Table, Money. Mark R, A, C, or I in each cell. (Remember: every task gets exactly one A.)

Task	Maya	Ben	Priya	Luca
Bake				
Flyers				
Table				
Money				

One sentence: which task is the single point of failure (if one person doesn't show up, the whole sale flops)?

Activity 3.2 — Capstone RACI (Team of 4)

You'll do this in a team of 4 assigned by your teacher. Pick one person's Capstone (or invent a 4-task project together). Fill in the RACI.

Project: _____

Task	Person 1: ____	Person 2: ____	Person 3: ____	Person 4: ____

Check: Does every task have exactly one A? (Yes / No) _

The task I'm most worried about and why:

Activity 3.3 — Ethics Sort

Sort each case into Fully Fine (F), Legal but Sketchy (S), or Over the Line (O):

___ Reselling a free school pencil to a classmate for $1 ___ Selling a friendship bracelet for $5 with a true description ___ Telling a customer "everyone in school loves these" when only 3 people have tried it ___ Copying another student's craft design and selling

it ___ Charging a younger sibling for help with homework ___ Adding a 50-cent "rush fee" without telling the customer

Pick one case you marked S. Defend your call in 2–3 sentences.

Activity 3.4 — Capstone Ethics Pledge

In my Capstone, I will not _____ because _____.

In my Capstone, I will _____ because _____.

If a friend pushed me to "stretch the truth," I would _____ _____.

Activity 3.5 — Three-Case Defense

Pick three cases from your Activity 3.3 sort. For each, write 1–2 sentences on the criterion you used to make your call (Did the customer know? Could they say no? Did anyone get hurt?).

Case (paraphrase)	My verdict	Criterion I used

Unit 3 Reflection

In your Capstone Journal:

1. What was the hardest case to call — and why?
2. Where in my own Capstone could I cross from "fully fine" into "legal but sketchy" if I'm not careful?
3. Who on my team is the easiest to make Accountable, and why?

Unit 4 — Run the stand-up

"Which people, and how do you know?"

— CASH

Activity 4.1 — Stand-up Log (Week 1)

Use this for one week. Each day, jot one item per column.

Day	DID (yesterday)	DOING (today)	STUCK (what's blocking?)
Mon			
Tue			
Wed			
Thu			
Fri			

The biggest STUCK this week was:

Activity 4.2 — Stand-up Log (Week 2)

Day	DID (yesterday)	DOING (today)	STUCK (what's blocking?)
Mon			
Tue			
Wed			
Thu			
Fri			

The biggest STUCK this week was:

Activity 4.3 — The 5 Whys on a Bad Day

Pick a bad day for your venture (real or hypothetical). Run the 5 Whys to a possible root cause.

The bad day, one sentence:

#	Why?	Because...
1		

#	Why?	Because...
2		
3		
4		
5		

My root cause (the 5th answer):

If I fixed this root cause, would the problem go away? Why or why not?

Activity 4.4 — One Adjustment

Based on the 5 Whys (or the stuck items in your stand-up), pick one adjustment to make to your Capstone.

The change I'm making:

Why this change:

How I'll know if it worked:

What I'd test next if it doesn't:

Unit 4 Reflection

In your Capstone Journal:

1. What was the hardest STUCK to admit?
2. What was the most useful thing I learned from doing 5 Whys?
3. If I were running this venture next year, what would my first SOP be?

Capstone Defense Prep

Activity 5.1 — The 4-Minute Defense Outline

You have 3–4 minutes. Plan it out.

Minute 1: Chain + Segment. - Venture, chain, three-things-known segment. - _____

Minute 2: System. - SOP and ledger. - _____

Minute 3: Roles + Ethics. - RACI and pledge. - _____

Minute 4: Adjustment + Reflection. - Stand-up adjustment + what I learned about myself. - _____

Activity 5.2 — Year-End Reflection

The biggest thing I learned this year was:

One thing I'd tell next year's Grade 6 student:

I'm proud of:

I'm going to keep working on:

A short note from Cash

"Being wrong on Day 1 is the deal."

— CASH

Hey — Cash here.

You didn't make a million dollars this year. You probably didn't even sell anything for real. That's okay. What you did was harder and more useful: you learned that businesses run on systems, not just energy. You learned to write the boring step. You

learned to share the work. You learned to ask "what's the real reason?" five times in a row.

When you start a real venture someday, the muscles you built this year — the SOP, the RACI, the ledger, the stand-up — those are the muscles that turn one good day into a hundred. Most adults skip the boring steps. You won't. See you in Grade 7 — where we'll go even deeper into who your customer actually is.

Bonus / Extension Activities (use as time allows)

Bonus 1 — Map Three Different Value Chains

Pick three different kinds of business: a service business, a product business, and a content business (e.g., a YouTube channel). Sketch a simple chain for each.

Service business (e.g., dog walking, tutoring, lawn care):

Node	Specific example
Supplier	
Producer	
Seller	
Customer	

Product business (e.g., bracelets, baked goods, repaired phones):

Node	Specific example
Supplier	
Producer	
Seller	
Customer	

Content business (e.g., a YouTube channel, a kid-run podcast, a stickers Instagram):

Node	Specific example
Supplier	
Producer	

Node	Specific example
Seller	
Customer	

One sentence: which kind of business has the simplest chain? Which has the most surprising one?

Bonus 2 — A Frayer Model for One Weight-Bearing Term

Pick one term from this year's Vocabulary Spine that you found hardest. Build a Frayer model.

The term: _____

Bonus 3 — Train a Stranger on the SOP

Pick one person in your life who has never seen your Capstone. Read them your SOP. Have them try to do step 1 without further explanation.

Where did they pause, ask, or guess?

One revision I'm making to the SOP based on this:

Bonus 4 — Two Months of Ledgers

Build a second hypothetical month for your Capstone with one major change (e.g., a customer leaves, you raise prices, a supplier costs more).

Date	Description	Income	Expense

Date	Description	Income	Expense
	Totals:		

Compare: - Month 1 savings rate: **__% - Month 2 savings rate: _% - The change that mattered most was: _____**

Bonus 5 — RACI for a Real Group Project

Pick a real group project you've been part of (school, club, family event). Draft what the RACI should have been.

Task	Person 1	Person 2	Person 3	Person 4

What would have gone differently if this RACI had existed?

Bonus 6 — Write Your Own Ethics Case

Design the trickiest "legal but sketchy" case you can think of for a kid-run business.

The case (3–4 sentences):

The argument for "fully fine":

The argument for "over the line":

My verdict and reason:

Bonus 7 — 5 Whys on a Non-Business Problem

Run a 5 Whys on a problem from your week that wasn't about a business (e.g., "I forgot my homework," "the team lost the game," "my room is messy").

#	Why?	Because...
1		
2		
3		
4		
5		

Did the technique work outside business? What surprised you?

Bonus 8 — Vocabulary Self-Check

Without looking back, define each term in your own words:

- **Value chain:** _____
- **Segment:** _____
- **SOP:** _____
- **Ledger:** _____
- **Savings rate:** _____
- **RACI:** _____
- **Legal but sketchy:** _____
- **Root cause:** _____
- **Stand-up:** _____

Then check your Vocabulary Spine. How many did you get exactly right? ___ out of 9.

A note on saving your work

Keep this book. The Grade 7 teacher will want to see the segment sketch you wrote in Week 5. The Grade 8 teacher will want to see the SOP you wrote in Week 11. These artifacts are not just for grades — they are the start of the portfolio that, by Grade 12, you'll defend at your final Capstone.

Most adults can't show their younger self's work. You'll be able to. Don't lose the book.

Senior expert upgrade pack — Deliberate practice (Grade 6)

Practice A — RACI for your real Capstone team

For each task on your Capstone team, fill the RACI:

Task	R	A	C	I
Idea / decision				
Customer research				
Build / production				
Money tracking				
Marketing / signs				
Customer service				
Closing / cleanup				

Rule: each task has exactly one A. Other letters can repeat.

Practice B — Three SOPs for your Capstone

Pick three repeated processes in your Capstone. Write a 5-step SOP for each, with a check at each step.

SOP 1: _____ 1. Step + check: **____ 2. Step + check: ___ 3. Step + check: __ 4. Step + check: __ 5. Step + check: ____**

(Repeat for SOP 2 and 3.)

Practice C — 5 Whys on a Capstone problem

A real problem from your Capstone team this week:

Problem: ____ Why? 1: ___ Why? 2: __ Why? 3: __ Why? 4: __ Why? 5: ____

What's the root cause? **____ What's the fix? _____**

Practice D — Monthly ledger with savings rate

For your Capstone (or a hypothetical 12-year-old's small business):

Category	Amount
Revenue	$_____
Variable costs	$_____

Category	Amount
Fixed costs (monthly)	$_____
Profit	$_____
Savings rate target (%)	_____%
Savings amount ($)	$_____
Money for reinvestment / treats	$_____

What did you learn from this ledger? ____

ABOUT THE HOST

Cash, in five words

curious · warm · honest · patient · specific

> *"I'm Cash. I don't promise wealth. I don't promise success. I promise that the moves — interview, math, message, listen — will make you a clearer thinker about money no matter what you end up doing."*
>
> — CASH

What Cash does

- **Asks questions that point to evidence.** Cash never tells; Cash asks what your evidence says.
- **Names rules sparingly.** "An assumption is something you think is true without checking. Evidence is something you observed, heard, or counted."
- **Tells short, made-up-but-realistic stories.** 30–60 seconds, shows don't tell.
- **Celebrates the move, not the win.** Revision, honesty, and evidence — not revenue.
- **Hedges deliberately.** probably, often, sometimes — never absolutes about complex topics.

What Cash never does

- Flatter ("amazing!", "great job!"), promise wealth, moralize about money.
- Reference real brands or living celebrities as endorsements.
- Surface family financial details. (Hypothetical scenarios only.)
- Pretend the world is fair. Cash is honest about systemic factors without becoming a politics class.

> *When in doubt, work one of these into the script: Which people, and how do you know? · Being wrong on Day 1 is the deal. · Revenue is loud. Contribution margin is true. · A little less wrong, every week.*

STRAND OUTCOMES

Eight Strands. One Year. Verifiable Outcomes.

Cash to Company runs the same eight strands K-12. Each year deepens the demonstration. The Grade 6 version of each strand is below.

Code	Strand	Grade 6 demonstrated outcome
BAVC	Business Awareness and Value Creation	Identify a business problem, propose a value-creation hypothesis, and revise it with customer evidence.
PSIG	Problem Solving and Idea Generation	Generate, screen, and refine ideas; document why one was chosen and the others were not.
MFL	Money and Financial Literacy	Compute revenue, variable cost, contribution margin, and breakeven for a real product or service.
CBM	Customers, Branding, Marketing	Build a persona from interview evidence; design honest messaging; A/B test two claims.
OSO	Operations, Systems, Organization	Design a simple weekly operating cadence with named roles, handoffs, and a feedback loop.
LTO	Leadership, Teamwork, Ownership	Run and document a team meeting; resolve one disagreement using shared evidence.
ESL	Ethics, Safety, Legal Awareness	Identify the line between persuasion and manipulation; flag one borderline claim and rewrite it honestly.
LRCI	Launch Readiness and Continuous Improvement	Pilot, measure, and document at least three iterations with rationale and what changed.

STANDARDS ALIGNMENT

Six Benchmarks This Year

Standards are cited at the benchmark level. Honest gaps are named when they exist.
The Capstone artifact addresses each one.

Benchmark	What students must demonstrate
Jump$tart 2 (Spending & Saving) 8-1	Identify ways to deposit, store, and pay for goods and services.
CCSS-ELA SL.6.1	Engage effectively in collaborative discussions; build on others' ideas.
CASEL Self-Management	Set and monitor goals; manage time.
C3 D2.Eco.4.6-8	Describe the role of competition in the determination of prices and wages.
CASEL Relationship Skills	Establish and maintain healthy relationships; communicate effectively.
Jump$tart 6 (Financial Decision Making) 8-2	Identify ways that consumers may avoid making poor decisions.

HOW TO READ THIS TABLE

Each lesson cites at least one of these benchmarks. Each Capstone checkpoint addresses two or more. The Teacher Guide includes a per-lesson standards crosswalk.

"Standards aren't a cage. They're a list of moves you're going to be glad you can make. Pick one. Practice it. Move on."

— CASH

CAPSTONE RUBRIC (4-POINT)

How We Score the Capstone

The Capstone artifact is scored on four traits, each on a 4-point scale. Honest, specific, decision-oriented work earns the high marks. Generic or assumption-laden work earns the low ones.

Trait	1 — Emerging	2 — Developing	3 — Proficient	4 — Advanced
Evidence quality	Mostly assumptions; few or no quotes.	2-3 interview quotes; partial evidence.	5+ direct quotes; varied sources; coded patterns.	Triangulated quotes plus behavioral observation; counter-evidence acknowledged.
Per-customer math	Confused costs; no contribution margin.	CM computed but with errors; one price scenario.	Correct CM and breakeven; clear pricing rationale.	CM under multiple price scenarios; LTV-lite reasoning.
Honest messaging	Vague or misleading claims.	Some specifics; some unsupported claims.	All claims supported; clean ethics check.	A/B-tested copy with rationale; resists clever-but-borderline phrasing.
Feedback system	One-time check; no documentation.	Ad-hoc feedback; partial revisions.	1-week feedback loop with 3 documented changes.	Sustained loop plus signal-vs-noise analysis plus revision log.

CALIBRATION NOTE

Score honestly. A "3" means the student met the standard the way an adult professional would. A "4" means they did something a working entrepreneur would be proud to show. Withhold "4" unless the work earns it.

SENSITIVITY AND FAMILY ENGAGEMENT

What We Don't Ask. What We Always Frame.

Money is a tool, not a virtue. Some students live in households with credit-card debt, low or no banking access, or active financial stress. The curriculum is built so that none of those students is asked to disclose, perform, or apologize for their family situation.

Rules of the room

- **Never ask about family money.** No questions about parents income, debts, accounts, or banking status.
- **Use neutral hypotheticals.** "For a sample family with a $4,000/month take-home" — not "your family."
- **Decouple wealth from worth.** Cash never says "everyone can be rich." Cash says "you will be a clearer thinker about money no matter what you end up doing."
- **Name systemic factors honestly.** Wage gaps, geography, and luck shape outcomes. The skill we build is the skill in the student hands.
- **Protect the venture.** A student Capstone is theirs. We don't require they share revenue or family contribution. The artifact is the work, not the bank account.

Family engagement

Parents get one well-framed question per quarter — never a quiz, never a money-disclosure prompt. The default frame is curiosity ("What did you notice about your customers this week?"), not interrogation ("How much did you make?").

"Money is a tool. The question is not whether your family has a lot of it. The question is what you do with the moves we are practicing — interview, math, message, listen — wherever your starting line happens to be."

— CASH

ACTIVITY INDEX

Ten Activities. One Notebook.

Every activity in this book is built to be done with a pencil, your own evidence, and the questions Cash keeps asking. Skip nothing. Date everything. Re-read in three months.

No.	Activity	What you will do
01	Day 1 Customer Assumption	One sentence, one card. Don't try to be right; try to be specific.
02	Open vs. Leading Questions	Rewrite five leading questions into open ones. Practice on a partner.
03	Coding Patterns from Transcripts	Highlight surprises, frustrations, wishes. Tally them. Find the pattern.
04	Persona Pack v1	Combine evidence into one specific person — name, behaviors, top frustration.
05	Variable Cost per Unit	From a real receipt, compute the cost per one of the thing you sell.
06	Contribution Margin Worksheet	Price minus variable cost. Decide if it covers your fixed costs.
07	Two-Message A/B Test	Two honest messages. Three-day test. Report the winner and why.
08	Persuasion vs. Manipulation Line	Sort 10 ad claims onto a line. Defend your placement.
09	1-Week Feedback Loop	Collect, code, and act on feedback. Document three changes.
10	Final Capstone Defense	Five slides. Five minutes. Show the moves you made.

NOTEBOOK SETUP

Get a single notebook for the whole year. Number every page. The first 5 pages are your Vocabulary Spine. The last 5 pages are your Day-1 Assumptions (you will come back to those). Everything in between is your work.

Notebook checklist

- **Title page** — your name, your venture working-title, today's date.
- **Vocabulary spine** — 5 pages reserved for definitions you will add as we go.
-

Customer notes — one section for interview transcripts. Use direct quotes, with initials and dates.

- **Math section** — receipts taped in, per-unit computations, contribution margin scratch work.
- **Messaging section** — drafts of two-claim A/B tests, with what won and why.
- **Feedback log** — one page per week of your feedback system, with the three changes you made.

WORKED EXAMPLE

Worked Example: Roles That Save Time

Maya runs a small backyard car-wash on Saturdays with three friends. Last weekend, every kid did every job. They washed nine cars in five hours. They argued twice. Two cars came out streaky. Maya's notebook says: "Same kid greeted, soaped, rinsed, and took the money. Bottleneck: the towel-dry. Decision: split into roles."

This week, Maya assigns roles. Greeter, soaper, rinser, dryer, money. They wash twelve cars in five hours. Zero arguments. No streaks. Same humans. Different system.

WHAT TO COPY

The move here is not the answer. It is the structure: specific number, specific person, specific decision. Use that pattern in your own venture this quarter.

> *"Most adults skip this. You won't. Pick one customer. Compute one number. Decide one thing." — Cash*

END-OF-QUARTER REFLECTION

Four Quarters. Same Five Questions.

At the end of every quarter you will answer the same five questions. The answers should look different over time. Reread the previous quarter before you write a new one.

1. **Which people did you talk to this quarter, and what did they actually say?**

   Specific quotes, initials, dates. Resist the urge to summarize.
2. **What did you change in your venture because of evidence?**

   Name the change. Name the evidence that caused it.
3. **What is one number you know better now than three months ago?**

   Variable cost per unit. Contribution margin. Anything quantitative.
4. **What is a claim you made that you would take back?**

   Be honest. The claim does not have to be public. The honesty is the move.
5. **What would Cash ask you about all of this?**

   "Which people, and how do you know?" is always available. Find your own version.

"Reflection is not a feeling check-in. It is a memory tool. The you in three months wants to know what the you today learned. Write it down so future-you can use it."

— CASH

One promise.

Cash to Company makes one promise: students who move through this program will be clearer thinkers about money and entrepreneurship — no matter what they end up doing for a living.

We do not promise wealth. We do not promise success. We promise clarity.

"Most adults run their lives without a system. You won't."

— CASH, GRADE 6
