YEAR-AT-A-GLANCE

Four Units. Thirty-Six Weeks. One Capstone.

The year is built as four units, each ending with a public-facing artifact that feeds the rolling Capstone. The bars show how the weeks are spent — roughly equal, with a slight lean toward the math-heavy unit because per-customer math is the load-bearing skill.

GRADE 6 · TEACHER GUIDE

How to Run This Year

Most adults run their lives without a system. You won't.

For: middle-school classroom teachers (typically ELA, social studies, math, business/CTE, or a dedicated entrepreneurship period), homeschool parents teaching the curriculum, and after-school program leads. **Companion to:** Grade 6 Curriculum Book, Lesson Plans, Student Activity Book, Cash Video Scripts, and Parent Guide.

How this year is built (and why)

"Revenue is loud. Contribution margin is true."

— CASH

Grade 6 is the bridge year. Students arrive from the 3-5 elementary band — where they learned that ideas come from skills, hobbies, and needs (Grade 3), that businesses need a plan (Grade 4), and that pricing is a choice with consequences (Grade 5). They will leave for Grade 7's Know your customer deep dive. Grade 6 sits between, doing the structural work nobody glamorizes: writing the boring step, naming who's accountable, making the ratio talk to the dollars.

The pedagogical bones come from three traditions:

- **Understanding by Design.** Big ideas, essential questions, and a year-end performance task drive the planning. Lessons feed the Capstone, not the other way around.
- **Workshop model.** Mini-lesson (10–15 min) → guided work (20–30 min) → confer + close (10 min). Students do most of their thinking on their own work most days.
- **Routines, not heroics.** A Monday opener, a Wednesday work block, a Friday share-out — the cognitive heavy-lifting goes to the content, not the structure. Stand-ups arrive in Unit 4 as a deliberate ramp into Grade 7's stronger weekly Showcase.

Classroom routines

These run all year. Establish them in the first three weeks and protect them.

Monday — Cash + the Question

A 5-minute Cash video (or printed transcript if no projector) introduces the week's question. Students respond to a one-prompt opener in the Capstone Journal. Whole-class share-out: 2–3 students.

Wednesday — Work Block

The longest block of the week, 45–60 minutes, dedicated to the Capstone. Mini-lesson (10–15) → independent or pair work (30–40) → 5-minute close. Teacher confers with 4–6 students per block in 3-minute one-on-ones.

Friday — Showcase + Stuck (Stand-up bridge)

15–20 minute share. Three or four students share progress; one shares "where I'm stuck." Class generates suggestions using the "What's working / What's confusing / One change I'd try" frame. By Unit 4 this routine becomes the stand-up.

Daily — the Vocabulary Spine

A single-page running glossary at the back of the notebook. Students add 1–3 terms per week with a Frayer entry for "weight-bearing" terms (SOP, RACI, savings rate, root cause).

Pedagogy at this grade band

- **Concrete, then abstract.** Always start with a real (or carefully simulated) example. The pizza chain before "value chain." Jordan's dog-walking ledger before "savings rate." The bake-sale failure before RACI.
- **Talk before write.** Most 11–12-year-olds know more than they can put on paper at first try. Pair-share before the journal entry, every time.
- **Identity-aware.** A 6th grader is figuring out who they are in public. Let them choose Capstones that signal something true to them — but coach against ventures that exclude classmates.
- **Visible thinking.** The Vocabulary Spine, Capstone Journal, pinned-to-wall value chains, and SOP gallery make student thinking observable. That's a CASEL win as much as a learning-design one.
- **Less worksheet, more artifact.** A value chain map, a 5-step SOP with checks, a one-month ledger, a RACI chart, two weeks of stand-up logs — the year's products. Worksheets serve practice; they're not the goal.
- **The boring step is the lesson.** When students resist writing the SOP because "it's obvious," that resistance is the teachable moment. Real businesses write it down.

Assessment philosophy

"Most adults skip this. You won't."

— CASH

Assess two things at every checkpoint:

1. **Did the student do the work the standard names?** A real value chain with named suppliers. Real ratio math. A real RACI with one A per task. Not pretend versions.
2. **Did they think about it?** A "what would break this" line in the SOP. A "if income dropped 20%" sensitivity in the ledger. A "what's the criterion I used" defense in the ethics check.

Use the program's analytic rubrics (Rubric Bank) for the Capstone checkpoints. Grade 6 leans on simplified versions: the Customer Research rubric (3 criteria for Grades 4–6), Business Plan rubric (4 criteria, dropping Operations and Honest Self-Assessment for late-Unit-2 use), Budget Project rubric (4 criteria for Grade 6), Pitch Presentation rubric (5 criteria, no Q&A handling at this band), and Reflection Writing rubric (3 criteria).

A typical assessment cadence

Cadence	Form	Stakes
Daily	Exit ticket or work-block confer	Low — formative
Weekly	Capstone Journal entry	Low–medium — counts toward habit grade
Bi-weekly	Vocabulary check (10 terms)	Low — formative
End of unit	Capstone checkpoint with rubric	Medium-high — rubric-graded
End of year	Final Capstone defense	Highest — full-year synthesis

Pacing — week by week

The pacing below is a default. Adjust to your actual calendar (assume ~36 weeks). Each week needs roughly 90–120 instructional minutes for Cash to Company; the Capstone Journal homework is 10–15 minutes of writing.

Unit 1 — Where the value comes from (Weeks 1–8)

Week	Focus	Anchor activities	Capstone milestone
1	Course launch + Cash V1 ("A business is a system, not a storefront")	Set norms; intro pizza chain; pick Capstone categories	Choose Capstone category
2	Pick the Capstone	"Skills + Hobbies + Needs I See" web (Grade-3 strand recycled at higher complexity)	Lock Capstone topic + tentative segment
3	Value chains in real businesses	Pair-map a local business chain	Sketch chain for own Capstone (rough)
4	Crowd vs. segment	Sort cards; mini-debate	Draft segment v1 (assumptions)
5	The Three Things Rule for segments	Build segment sketch with quote	Refine segment sketch
6	Cash V2 ("Customers are segments, not crowds") + caption-writing	Mini-lesson on caption form	Draft caption
7	Polish & peer review	Revise Pack	Submit draft for self-check
8	**Checkpoint 1** — Value Chain + Segment Pack	Gallery walk + 2-min peer share	Submit Pack (graded)

Unit 2 — Build the system (Weeks 9–18)

Week	Focus	Anchor activities	Capstone milestone
9	Cash V3 ("The same thing, the same way, every time") + optional pivot window	Pivot decision (kept or new venture)	Confirm Capstone or pivot
10	Why SOPs matter	Read Checklist Manifesto extract	Pick a process to SOP
11	Write the SOP	Sandwich SOP modeling + draft	Draft 5-step SOP with checks
12	Pair-test the SOP	Stranger-test the SOP	Revise SOP
13	Cash V4 ("Numbers tell what; ratios tell whether it's working")	Income, expense, ledger basics	Draft ledger header

Week	Focus	Anchor activities	Capstone milestone
14	The monthly ledger and savings rate	Jordan's ledger + class ledger	Build Capstone ledger
15	Sensitivity check	"What if income drops 20%" math	Add sensitivity row
16	Memo writing	Mini-lesson on memo form	Draft Systems memo
17	Peer review	Critique with rubric	Revise Pack
18	**Checkpoint 2** — Systems Pack	3-minute pair defense	Submit Pack (graded)

Unit 3 — Who does what (Weeks 19–28)

Week	Focus	Anchor activities	Capstone milestone
19	Cash V5 ("Roles are how teams stop arguing") + optional pivot window	Bake-sale failure case	Confirm Capstone
20	RACI in 5 minutes	Fix-the-bake-sale together	Sketch team RACI
21	Capstone team RACI	Teacher-assigned 4-person teams	Draft RACI
22	RACI exception thinking	"What if person 2 is sick?"	Revise RACI
23	Cash V6 ("Some things are legal but sketchy")	Sort 5 cases	Draft ethics pledge
24	Three categories deep	Four corners on a borderline case	Refine pledge
25	Capstone Ethics Pledge	Pledge writing	Pledge in Capstone Journal
26	Three-case defense	Apply criteria to 3 cases	Draft defense write-up
27	Peer review	Critique with rubric	Revise Pack
28	**Checkpoint 3** — Roles Pack		

Week	Focus	Anchor activities	Capstone milestone
		3-minute team defense	Submit Pack (graded)

Unit 4 — Run the stand-up (Weeks 29–36)

Week	Focus	Anchor activities	Capstone milestone
29	Cash V7 ("The first answer is rarely the real answer") + optional pivot	Andon cord story	Confirm Capstone
30	Stand-up structure	Did → Doing → Stuck modeling	Run first daily stand-up
31	The 5 Whys	Bake-sale 5 Whys + Capstone 5 Whys	Run 5 Whys on a Stuck
32	Stand-up Week 1	Daily 5-minute stand-up	Complete Week 1 log
33	One adjustment	Choose change, name how to verify	Make adjustment
34	Stand-up Week 2	Daily 5-minute stand-up	Complete Week 2 log
35	Capstone defense prep	Storyboard the defense	Build defense slides/poster
36	**Final Capstone Defense** + Cash V8 ("Systems Thinker")	Public presentation	Deliver the defense

FAQ

Q: I have ELA, not business background. Can I teach this? A: Yes. The lesson plans script the moves; the Cash videos introduce concepts; you become the chief norm-enforcer ("the same thing, the same way, every time" / "which people, and how do you know?"). The math in Grade 6 is 6th-grade math: ratios, rates, percentages applied to realistic numbers.

Q: We don't have a class store or classroom economy. Can students still do this? A: Yes. Grade 6 Capstones are designed to be runnable on paper. SOPs, ledgers, RACIs, stand-ups — all these can be developed for hypothetical ventures. Real-world execution is welcome but not required.

Q: My students can't go interview people outside class. A: Grade 6 doesn't require external interviews (that's Grade 7's lift). Segment sketches use realistic-but-imagined quotes; ledgers use hypothetical numbers; SOPs describe processes the student knows from experience or can imagine.

Q: A student wants to do a venture that feels off (gambling-like, weight-loss, exclusionary). A: Use the optional pivot windows in Weeks 9, 19, 29. Coach early ("What about this idea is sitting wrong? Let's talk it through."). The Ethics, Safety, and Legal strand exists precisely for this.

Q: Some of my students don't have stable internet at home. A: The program is print-first. Cash videos have transcripts; SOP, RACI, ledger, and stand-up templates are 1-pagers; the Capstone Journal is a notebook. Optional digital extensions are explicitly optional.

Q: How do I assess fairly when students choose different ventures? A: The rubrics are content-agnostic. They measure SOP quality, ledger reasoning, RACI accountability, and ethics defense — not how cool the business is. A tutoring service and a snack venture can both score 4s if the work is rigorous.

Q: What if a student wants to talk about real family money problems triggered by these lessons? A: Refer to the school counselor. Don't try to handle it inside the lesson. The curriculum is designed to leave private home finance off the table; if a student volunteers something heavy, listen briefly, validate, and route appropriately.

Q: Do I need to give grades on the Cash videos? A: No. The Cash videos are concept anchors. Use them for opening discussions and reflection prompts. The Capstone checkpoints carry the grade weight.

Q: What's the minimum I can do if I'm out of time some weeks? A: Protect Wednesday's Work Block. Skip Monday or Friday before you skip Wednesday. The Capstone is the spine; everything else is helpful but not load-bearing.

Common pitfalls

"Tell me what they actually said."

— CASH

- **The pretty SOP that doesn't work.** A student writes a beautifully formatted SOP that a stranger couldn't follow. The pair test catches this. Coach: "Where did your partner pause? That's where the SOP needs more."

- **The all-A RACI.** A student makes themselves accountable for everything. Push back: "If you're A on every task and you're sick, who carries the load?" An A who never delegates is a single point of failure.
- **The ledger with no expenses.** A student claims their venture has only income. Coach: every business has expenses. What's the cost of materials? Time? Permission slips?
- **The 5 Whys that lands on self-blame.** A student's root cause becomes "because I'm bad at this." Coach: that's not a root cause; that's self-criticism. Push toward a system gap (no SOP, no RACI, no check).
- **The defense that's a sales pitch.** The final defense at Grade 6 should be reflective: chain, system, roles, adjustment, and what the student learned about themselves. Coach toward evidence and revision, not enthusiasm.

Working with the Cash mascot

Cash is a mascot, not a teacher. Do not let students treat Cash's word as authority — Cash poses questions; students answer them in evidence. If a student says "Cash said do X," redirect: "What does your evidence say?"

For voice and personality of Cash, see the Cash Mascot Style Guide. Bottom line: Cash is curious and warm but does not flatter, does not promise quick wins, and never says "everyone can be rich." See style guide for forbidden phrases.

Working with parents and caregivers

The Parent Guide is sent home in Week 1 with a brief overview and four optional conversation starters (one per quarter). The biggest parent question at Grade 6 is: "Why is my kid writing checklists? Isn't this a business class?" Answer: SOPs are how real businesses run. The boring step is the lesson.

A teacher self-check at end of year

> *"Which people, and how do you know?"*
>
> — CASH

Did most of my students this year:

- Map a real value chain with at least one specific name at each node? (Yes/No)
- Write a 5-step SOP with checks that a stranger could follow? (Yes/No)
- Build a one-month ledger with a savings-rate ratio? (Yes/No)

- Fill out a RACI with exactly one A per task? (Yes/No)
- Run a 2-week stand-up and make one documented adjustment? (Yes/No)

If four of those five are yes, the year worked. If fewer, look at which routine slipped — usually the Wednesday Work Block, which carries the SOP and ledger work.

Bridge to Grade 7

The Grade 7 teacher will pick up where you left off. The biggest handoffs:

- **Segment sketch** → becomes the customer persona in Grade 7 Unit 1.
- **5 Whys habit** → becomes the "what-changed-since-Day-1" reflection in Grade 7.
- **Stand-up routine** → becomes the weekly Showcase + Stuck in Grade 7 (same structure, deepened).
- **Vocabulary Spine** → carries forward; segment and demographic land cleanly when persona and psychographic arrive.

If your school has a 6-7 vertical alignment meeting, pull the Persona Pack from Grade 7's Lesson 4 to your end-of-year session — it'll show your kids exactly where they're headed.

Senior expert upgrade pack — Differentiation deep moves (Grade 6)

Advanced learners — three named extensions

1. **Multi-team RACI.** A 4-person RACI is the floor. Advanced learners do an 8-person RACI for a hypothetical larger team. Surface the question: "What happens to RACI when teams scale?"
2. **SOP improvement loop.** Run an SOP for one week. Track where it broke. Update. This is PDSA-lite, previewing Grade 8 work.
3. **5 Whys on a personal problem.** With permission and care, advanced learners can apply 5 Whys to a self-improvement question (not a family-money question). "Why did I miss the homework deadline? Why? Why?" Self-awareness building.

ELL deep moves

- **RACI in two columns.** Home language on the left, English on the right. Definitions of R/A/C/I in both.
- **SOP visual templates.** Each step has a small icon space + a sentence. Reduces the writing load.
- **5 Whys with sentence stems.** "This happened because ___."

IEP/504 deep moves

- **Pre-printed RACI grid.** Names of teammates pre-filled.

- **SOP step-card format.** Each step on its own index card; arrange in order on the desk.
- **Calculator allowed for the savings-rate work.** Percent reasoning is the goal.

"What to do when a student says 'we had a fight in the team meeting today'"

Three concrete moves:

1. **Locate the role gap.** "Was the fight about WHO was doing something, or WHAT was being done? If WHO, your RACI may need work. Show me your RACI."
2. **Practice the next conversation.** "What would you say in your next 1:1 with that teammate?" Role-play 60 seconds.
3. **Don't escalate every fight.** Some friction is normal. "Did the team finish the work? If yes, the friction is part of how teams move. If no, we look at the system."

ROUND 2 PATCH — Cash Never Says (Teacher Reference Card)

Cash never says: "Amazing!" / "Awesome!" / "Crushing it!" / "Boss up" / "Get that bag" / "Everyone can be rich" / "Easy money" / "Passive income" / "Financial freedom" / "Just believe" / "If you can dream it, you can do it" / "Side hustle" (use "side venture") / wealth-flexing language / anything implying wealth is mindset/hustle / anything implying low-income or unbanked families are at fault.

Cash always asks: "Which people, and how do you know?" / "What did they actually say?" / "Whats the evidence?" / "What would have to be true for you to be right/wrong?" / "Whats one thing youd change?"

Teacher mirror: Replace "great job!" with "okay, thats specific — whats the evidence?"

Cashs three signature physical moves: (1) **Notebook Tilt**; (2) **Two-Finger Tap**; (3) **Slow Lean**.

ABOUT THE HOST

Cash, in five words

curious · warm · honest · patient · specific

"I'm Cash. I don't promise wealth. I don't promise success. I promise that the moves — interview, math, message, listen — will make you a clearer thinker about money no matter what you end up doing."

— CASH

What Cash does

- **Asks questions that point to evidence.** Cash never tells; Cash asks what your evidence says.
- **Names rules sparingly.** "An assumption is something you think is true without checking. Evidence is something you observed, heard, or counted."
- **Tells short, made-up-but-realistic stories.** 30–60 seconds, shows don't tell.
- **Celebrates the move, not the win.** Revision, honesty, and evidence — not revenue.
- **Hedges deliberately.** probably, often, sometimes — never absolutes about complex topics.

What Cash never does

- Flatter ("amazing!", "great job!"), promise wealth, moralize about money.
- Reference real brands or living celebrities as endorsements.
- Surface family financial details. (Hypothetical scenarios only.)
- Pretend the world is fair. Cash is honest about systemic factors without becoming a politics class.

> *When in doubt, work one of these into the script: Which people, and how do you know? · Being wrong on Day 1 is the deal. · Revenue is loud. Contribution margin is true. · A little less wrong, every week.*

STRAND OUTCOMES

Eight Strands. One Year. Verifiable Outcomes.

Cash to Company runs the same eight strands K-12. Each year deepens the demonstration. The Grade 6 version of each strand is below.

Code	Strand	Grade 6 demonstrated outcome
BAVC	Business Awareness and Value Creation	Identify a business problem, propose a value-creation hypothesis, and revise it with customer evidence.
PSIG	Problem Solving and Idea Generation	Generate, screen, and refine ideas; document why one was chosen and the others were not.
MFL	Money and Financial Literacy	Compute revenue, variable cost, contribution margin, and breakeven for a real product or service.
CBM	Customers, Branding, Marketing	Build a persona from interview evidence; design honest messaging; A/B test two claims.
OSO	Operations, Systems, Organization	Design a simple weekly operating cadence with named roles, handoffs, and a feedback loop.
LTO	Leadership, Teamwork, Ownership	Run and document a team meeting; resolve one disagreement using shared evidence.
ESL	Ethics, Safety, Legal Awareness	Identify the line between persuasion and manipulation; flag one borderline claim and rewrite it honestly.
LRCI	Launch Readiness and Continuous Improvement	Pilot, measure, and document at least three iterations with rationale and what changed.

STANDARDS ALIGNMENT

Six Benchmarks This Year

Standards are cited at the benchmark level. Honest gaps are named when they exist.
The Capstone artifact addresses each one.

Benchmark	What students must demonstrate
Jump$tart 2 (Spending & Saving) 8-1	Identify ways to deposit, store, and pay for goods and services.
CCSS-ELA SL.6.1	Engage effectively in collaborative discussions; build on others' ideas.
CASEL Self-Management	Set and monitor goals; manage time.
C3 D2.Eco.4.6-8	Describe the role of competition in the determination of prices and wages.
CASEL Relationship Skills	Establish and maintain healthy relationships; communicate effectively.
Jump$tart 6 (Financial Decision Making) 8-2	Identify ways that consumers may avoid making poor decisions.

HOW TO READ THIS TABLE

Each lesson cites at least one of these benchmarks. Each Capstone checkpoint addresses two or more. The Teacher Guide includes a per-lesson standards crosswalk.

"Standards aren't a cage. They're a list of moves you're going to be glad you can make. Pick one. Practice it. Move on."

— CASH

CAPSTONE RUBRIC (4-POINT)

How We Score the Capstone

The Capstone artifact is scored on four traits, each on a 4-point scale. Honest, specific, decision-oriented work earns the high marks. Generic or assumption-laden work earns the low ones.

Trait	1 — Emerging	2 — Developing	3 — Proficient	4 — Advanced
Evidence quality	Mostly assumptions; few or no quotes.	2-3 interview quotes; partial evidence.	5+ direct quotes; varied sources; coded patterns.	Triangulated quotes plus behavioral observation; counter-evidence acknowledged.
Per-customer math	Confused costs; no contribution margin.	CM computed but with errors; one price scenario.	Correct CM and breakeven; clear pricing rationale.	CM under multiple price scenarios; LTV-lite reasoning.
Honest messaging	Vague or misleading claims.	Some specifics; some unsupported claims.	All claims supported; clean ethics check.	A/B-tested copy with rationale; resists clever-but-borderline phrasing.
Feedback system	One-time check; no documentation.	Ad-hoc feedback; partial revisions.	1-week feedback loop with 3 documented changes.	Sustained loop plus signal-vs-noise analysis plus revision log.

CALIBRATION NOTE

Score honestly. A "3" means the student met the standard the way an adult professional would. A "4" means they did something a working entrepreneur would be proud to show. Withhold "4" unless the work earns it.

SENSITIVITY AND FAMILY ENGAGEMENT

What We Don't Ask. What We Always Frame.

Money is a tool, not a virtue. Some students live in households with credit-card debt, low or no banking access, or active financial stress. The curriculum is built so that none of those students is asked to disclose, perform, or apologize for their family situation.

Rules of the room

- **Never ask about family money.** No questions about parents income, debts, accounts, or banking status.
- **Use neutral hypotheticals.** "For a sample family with a $4,000/month take-home" — not "your family."
- **Decouple wealth from worth.** Cash never says "everyone can be rich." Cash says "you will be a clearer thinker about money no matter what you end up doing."
- **Name systemic factors honestly.** Wage gaps, geography, and luck shape outcomes. The skill we build is the skill in the student hands.
- **Protect the venture.** A student Capstone is theirs. We don't require they share revenue or family contribution. The artifact is the work, not the bank account.

Family engagement

Parents get one well-framed question per quarter — never a quiz, never a money-disclosure prompt. The default frame is curiosity ("What did you notice about your customers this week?"), not interrogation ("How much did you make?").

"Money is a tool. The question is not whether your family has a lot of it. The question is what you do with the moves we are practicing — interview, math, message, listen — wherever your starting line happens to be."

— CASH

ACTIVITY INDEX

Ten Activities. One Notebook.

Every activity in this book is built to be done with a pencil, your own evidence, and the questions Cash keeps asking. Skip nothing. Date everything. Re-read in three months.

No.	Activity	What you will do
01	Day 1 Customer Assumption	One sentence, one card. Don't try to be right; try to be specific.
02	Open vs. Leading Questions	Rewrite five leading questions into open ones. Practice on a partner.
03	Coding Patterns from Transcripts	Highlight surprises, frustrations, wishes. Tally them. Find the pattern.
04	Persona Pack v1	Combine evidence into one specific person — name, behaviors, top frustration.
05	Variable Cost per Unit	From a real receipt, compute the cost per one of the thing you sell.
06	Contribution Margin Worksheet	Price minus variable cost. Decide if it covers your fixed costs.
07	Two-Message A/B Test	Two honest messages. Three-day test. Report the winner and why.
08	Persuasion vs. Manipulation Line	Sort 10 ad claims onto a line. Defend your placement.
09	1-Week Feedback Loop	Collect, code, and act on feedback. Document three changes.
10	Final Capstone Defense	Five slides. Five minutes. Show the moves you made.

NOTEBOOK SETUP

Get a single notebook for the whole year. Number every page. The first 5 pages are your Vocabulary Spine. The last 5 pages are your Day-1 Assumptions (you will come back to those). Everything in between is your work.

Notebook checklist

- **Title page** — your name, your venture working-title, today's date.
- **Vocabulary spine** — 5 pages reserved for definitions you will add as we go.
-

Customer notes — one section for interview transcripts. Use direct quotes, with initials and dates.

- **Math section** — receipts taped in, per-unit computations, contribution margin scratch work.
- **Messaging section** — drafts of two-claim A/B tests, with what won and why.
- **Feedback log** — one page per week of your feedback system, with the three changes you made.

WORKED EXAMPLE

Worked Example: Roles That Save Time

Maya runs a small backyard car-wash on Saturdays with three friends. Last weekend, every kid did every job. They washed nine cars in five hours. They argued twice. Two cars came out streaky. Maya's notebook says: "Same kid greeted, soaped, rinsed, and took the money. Bottleneck: the towel-dry. Decision: split into roles."

This week, Maya assigns roles. Greeter, soaper, rinser, dryer, money. They wash twelve cars in five hours. Zero arguments. No streaks. Same humans. Different system.

WHAT TO COPY

The move here is not the answer. It is the structure: specific number, specific person, specific decision. Use that pattern in your own venture this quarter.

> *"Most adults skip this. You won't. Pick one customer. Compute one number. Decide one thing." — Cash*

END-OF-QUARTER REFLECTION

Four Quarters. Same Five Questions.

At the end of every quarter you will answer the same five questions. The answers should look different over time. Reread the previous quarter before you write a new one.

1. **Which people did you talk to this quarter, and what did they actually say?**

   Specific quotes, initials, dates. Resist the urge to summarize.
2. **What did you change in your venture because of evidence?**

   Name the change. Name the evidence that caused it.
3. **What is one number you know better now than three months ago?**

   Variable cost per unit. Contribution margin. Anything quantitative.
4. **What is a claim you made that you would take back?**

   Be honest. The claim does not have to be public. The honesty is the move.
5. **What would Cash ask you about all of this?**

   "Which people, and how do you know?" is always available. Find your own version.

> *"Reflection is not a feeling check-in. It is a memory tool. The you in three months wants to know what the you today learned. Write it down so future-you can use it."*
>
> — CASH

One promise.

Cash to Company makes one promise: students who move through this program will be clearer thinkers about money and entrepreneurship — no matter what they end up doing for a living.

We do not promise wealth. We do not promise success. We promise clarity.

"Most adults run their lives without a system. You won't."

— CASH, GRADE 6
