a FlexLifeFi K-12 program

GRADE 7 · CASH VIDEO SCRIPTS

Eight Scripts. One Cash.

Hook, content arc, and a clean classroom CTA — 2:30–3:00 each.

Year theme: Know Your Customer

CONTENTS

What's Inside

01 Video 1 — "Customers Are Evidence" (Week 1, Unit 1 Launch)

02 Video 2 — "Per-Customer Math Runs the Business" (Week 9, Unit 2 Launch)

03 Video 3 — "Honest Stories That Sell" (Week 19, Unit 3 Launch)

04 Video 4 — "Feedback Is a System, Not a Moment" (Week 29, Unit 4 Launch)

05 Video 5 — "Why Personas Aren't Demographics" (Week 3, Mid-Unit 1)

06 Video 6 — "What Could Your A/B Test Not Tell You?" (Week 27, Mid-Unit 3)

07 Video 7 — "The Quiet Signal" (Week 33, Mid-Unit 4)

08 Video 8 — "The Year-End Customer-First Summary" (Week 36, Defense Day)

09 Production notes (for whoever animates these)

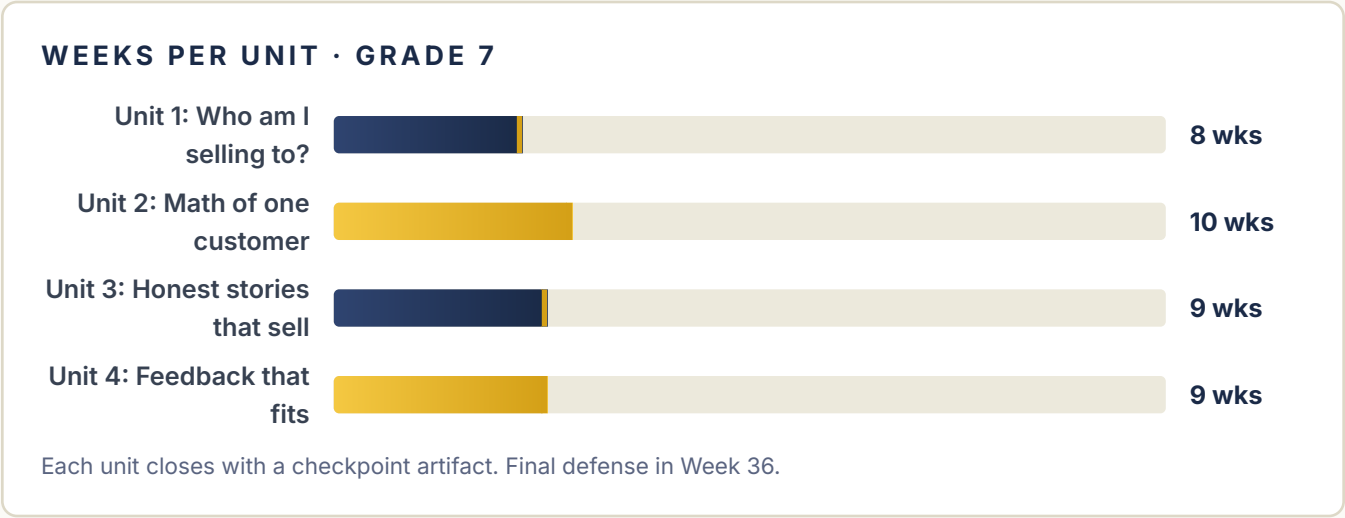
YEAR-AT-A-GLANCE

Four Units. Thirty-Six Weeks. One Capstone.

The year is built as four units, each ending with a public-facing artifact that feeds the rolling Capstone. The bars show how the weeks are spent — roughly equal, with a slight lean toward the math-heavy unit because per-customer math is the load-bearing skill.



36 WEEKS

8 CASH VIDEOS

GRADE 7 · CASH VIDEO SCRIPTS

Eight Scripts. One Cash.

Customers are evidence, not assumptions.

Eight short videos, one per major Grade 7 milestone. Each script targets 2:30–3:00 finished runtime, ~350–420 spoken words. Scripts include a hook, content arc, and a CTA (call to action) that lands in a classroom assignment or journal prompt. Voice and personality follow the Cash Mascot Style Guide — curious, warm, honest, never flatters, never says "everyone can be rich."

Format conventions:

- **[VISUAL]** = animated visual cue.
- **CASH:** = spoken dialogue.
- **[SFX]** = sound effect or music cue.

Video 1 — "Customers Are Evidence" (Week 1, Unit 1 Launch)

"Most adults skip this. You won't."

— CASH

Runtime target: 2:45 **Strand mapping:** BAVC + PSIG + LRCI

[VISUAL: A coin-shaped character with a friendly face, "Cash," sitting on a stool with a small notebook. Behind them, a warm but minimal classroom backdrop.]

CASH: Hey. I'm Cash. We're going to spend the year on one big idea: that the fastest way to mess up a business is to imagine your customer instead of meeting one.

[VISUAL: Split screen — left side, a kid in a thought bubble imagines a happy customer holding a product. Right side, the kid actually walks up to a real (animated) person to ask a question.]

CASH: Watch this. Two kids start a snack business. The first kid says, "Everybody at this school is going to love these cookies." The second kid says, "I asked twelve people what they actually buy at lunch. Eight of them said the same thing — they want something with protein because they're hungry by sixth period."

[VISUAL: The first kid's chart shows "imagined customers." The second kid's chart shows real quotes with initials and tally marks.]

CASH: Both kids worked hard. But only one of them did something real. That something has a name. It's called evidence.

[VISUAL: The word EVIDENCE appears, then the word ASSUMPTION below it.]

CASH: An assumption is something you think is true without checking. Evidence is something you observed, heard, or counted. The whole year, you'll be asked one question over and over. Get used to it. The question is: which people, and how do you know?

[VISUAL: A sign appears with the question, "WHICH PEOPLE, AND HOW DO YOU KNOW?"]

CASH: Here's what's funny. You already know how to do this. You do it with your friends every day. You notice who's quiet, who's loud, who's hungry, who's bored, who needs help with the math problem. You're already an evidence collector. We're going to point that muscle at customers.

[VISUAL: A montage of kids in a school hallway noticing different things — a friend struggling with a backpack zipper, someone scrolling their phone, someone helping carry a stack of books.]

CASH: Your first move this week is small. Write down what you think your customer wants. Just one sentence. We'll come back to that sentence in two months and see how wrong you were. Don't try to be right. Try to be specific.

[VISUAL: A blank index card appears, with the sentence frame: "I think my customer is **_ who wants because __**."]

CASH: Here's the thing that nobody tells you. Being wrong is the deal. Being wrong is how you find out who your customer actually is. So write the sentence, write your name, and put it in the box. We'll see it again.

[VISUAL: Cash drops the card into a box labeled "Day 1 Assumptions."]

CASH: And one rule. You can't ask about money. You can't ask "how much would you spend." That's not where the evidence is. The evidence is in what frustrates them, what they already do, what they wish was different. Money comes later.

CTA: [VISUAL: Bold text on screen.] "Write your Day 1 Customer Assumption. One sentence. Specific. We're going to find out together how wrong it is."

[VISUAL: Cash waves. Fade.]

Video 2 — "Per-Customer Math Runs the Business" (Week 9, Unit 2 Launch)

Runtime target: 2:50 **Strand mapping:** MFL + LRCI

[VISUAL: Cash at a chalkboard with two columns: "Revenue" and "Per Customer."]

CASH: Quick test. Two lemonade stands, same neighborhood, same Saturday.

[VISUAL: Two lemonade stands appear. Stand A has a fancy sign and a long line. Stand B is plain and quieter.]

CASH: Stand A sells fifty cups. Charges two dollars each. They make a hundred dollars in revenue. Stand B sells thirty cups, charges one dollar. They make thirty.

[VISUAL: Numbers appear under each stand: "$100" under A, "$30" under B.]

CASH: Easy question, right? Stand A wins.

[VISUAL: Cash holds up a hand. The word "WAIT" appears.]

CASH: Now I tell you the costs. Stand A spends a dollar eighty making each cup — fancy lemons, fancy ice, branded cup. Stand B spends thirty cents — homemade lemonade, plain cup.

[VISUAL: Costs subtract from each stand. Stand A: $100 revenue minus $90 in cost equals $10 left over. Stand B: $30 revenue minus $9 in cost equals $21 left over.]

CASH: Stand B wins. They have twenty-one dollars to pay for their fixed costs and put in their pocket. Stand A has ten. Same neighborhood, same Saturday. Stand B is in a better spot to grow.

[VISUAL: The phrase "CONTRIBUTION MARGIN" appears, then breaks into two parts: PRICE − VARIABLE COST.]

CASH: That number — what's left after you cover the cost of making one more — has a name. It's called contribution margin. It's the most useful number in your whole business.

[VISUAL: Cash points to the number and the words "WHAT'S LEFT TO PAY THE RENT."]

CASH: Why? Because every customer "contributes" that amount. If your contribution margin per customer is fifty cents, and your fixed costs are a hundred dollars a month, you need two hundred customers a month to break even. If your CM is two dollars? Fifty customers. Different business.

[VISUAL: Two scenarios animate. The 50-cent CM scenario shows a long line of customers. The $2 CM scenario shows a much shorter line.]

CASH: Most adults don't know this. They just ask "how much money came in?" That's revenue. Revenue is loud. Contribution margin is quiet. But contribution margin is the truth.

[VISUAL: Cash leans in.]

CASH: Here's your move. Take your venture. Compute one number — what does each customer contribute, after you cover the cost of making the thing? You don't have to know everything. You have to know that one number.

[VISUAL: A worksheet appears with three lines: PRICE PER UNIT, VARIABLE COST PER UNIT, CONTRIBUTION MARGIN.]

CASH: And then ask the harder question. If you knew that number, would you be in business? Would you raise the price? Would you cut the cost? Would you pivot?

CTA: "Compute your contribution margin per customer this week. Bring it to Wednesday's work block. Be ready to defend it."

[Fade.]

Video 3 — "Honest Stories That Sell" (Week 19, Unit 3 Launch)

Runtime target: 2:55 **Strand mapping:** CBM + ESL

[VISUAL: Cash sitting in front of a wall covered in real-feeling ad clippings — some with bold headlines like "ONLY 3 LEFT" and "DOCTORS HATE THIS."]

CASH: I want to talk about messaging. Specifically, the line between persuading and tricking someone.

[VISUAL: A line on screen. On one side: PERSUASION. On the other: MANIPULATION. The space between them is gray.]

CASH: Here's the thing. Some people on the internet will tell you "every business is manipulation, kid, get used to it." And some adults at school will tell you "advertising is bad, full stop." Both of those are wrong.

[VISUAL: Two characters appear, each with a thought bubble. One says "BUSINESS IS MANIPULATION." The other says "ADVERTISING IS BAD."]

CASH: A great message tells a true story. Our snack box has thirty grams of protein, and that's why kids who play sports come back for more. That's a claim. It's specific. It's checkable. If you measured the protein and asked the kids, you'd know.

[VISUAL: A poster appears with that exact claim, with "30g protein" highlighted.]

CASH: A bad message tells a fake story. The brain food smart kids actually choose. What does that mean? Smart kids? Actually choose? Compared to what? It's vibes. There's nothing to check.

[VISUAL: The same poster with "vibes" stamped on it.]

CASH: Here's a simple test. The Fair-to-Customer Check.

[VISUAL: Four points appear, one at a time. Each is a phrase with a check box.]

CASH: One. **Clear claim.** Could a customer tell what's actually being promised? Two. **Honest price.** Will you pay the price you see, or are there fees hidden later? Three.

Real reviews. Are reviews from actual customers? Four. **Easy returns.** If it doesn't work, can you give it back?

[VISUAL: The four points stay on screen.]

CASH: Most products fail one of these. Some fail two. The ones that fail three or four — those are the ones that get pulled off the shelf when somebody notices.

[VISUAL: A montage of fictional products being pulled off shelves with red "RECALL" stamps.]

CASH: Your move this week. Find an ad. Any ad — TV, online, on the bus stop. Run it through the four points. Decide for yourself: is this persuasion, or is this manipulation? Don't ask me. Don't ask your teacher. Decide.

[VISUAL: A red pen circles "DECIDE" on screen.]

CASH: And then, harder question. When you write your own message for your venture, where's your line? What are you willing to say? What aren't you?

[VISUAL: A blank pledge appears with three lines: "In my Capstone, I will not **_. I will . If a friend told me to stretch the truth, I would __**."]

CTA: "Write your Capstone Pledge. Three sentences. Bring it Friday."

[Fade.]

Video 4 — "Feedback Is a System, Not a Moment" (Week 29, Unit 4 Launch)

Runtime target: 2:50 **Strand mapping:** OSO + LRCI

[VISUAL: Cash holding a tiny clipboard with a survey on it.]

CASH: Here's a true story I made up to be true. A kid runs a bracelet business. They get one piece of feedback. The feedback says, "I love your bracelets, but I wish they came in blue."

[VISUAL: A bracelet shop. One customer leaves a comment card.]

CASH: What does the kid do? They make blue bracelets. They make a hundred of them. They show up the next week, and three customers say, "I don't want blue, I wanted a different size." The kid runs out of money on blue bracelets nobody wanted.

[VISUAL: A pile of unsold blue bracelets. The kid looks frustrated.]

CASH: The kid didn't have a feedback problem. They had a system problem. They listened to one person once. That's not listening. That's reacting.

[VISUAL: The phrase "ONE PERSON, ONE TIME" with an X through it. Below it: "MANY PEOPLE, ON A SCHEDULE."]

CASH: A real listening system has three parts. Channel — where you ask. Cadence — how often. Triage — what's signal, what's noise.

[VISUAL: The three words appear: CHANNEL · CADENCE · TRIAGE.]

CASH: Channel. Where do you ask? In person, when they buy? On a card in the box? On a survey link? Different channels get different answers. People are honest in person about some things, in writing about others.

[VISUAL: Three icons: face-to-face conversation, a paper card, a phone with a survey.]

CASH: Cadence. How often? Once a week is a lot. Once a month is sometimes too little. The trick is to set a schedule and stick to it, even when you're busy. Especially when you're busy.

[VISUAL: A calendar with weekly check-ins highlighted.]

CASH: Triage. Most feedback is noise. One person's loud opinion is not a signal. A pattern across many people is. Your job is to sort, not to react.

[VISUAL: Three response cards. One alone in a "NOISE" pile. Five matching cards in a "SIGNAL" pile.]

CASH: Here's the trick most adults miss. The point of a feedback system is not to make every customer happy. It's to keep being a little less wrong, every week. Every week.

[VISUAL: The phrase "A LITTLE LESS WRONG, EVERY WEEK" appears.]

CASH: Your move. Build a three-question survey. Decide where you'll ask, when, and how you'll triage. Then run it for one week. One week. Then come back and tell us what was signal and what was noise.

CTA: "Design your three-question survey this week. One open question, one closed, one 'would you recommend.' Bring it Wednesday."

[Fade.]

Video 5 — "Why Personas Aren't Demographics" (Week 3, Mid-Unit 1)

"Don't sell. Show."

— CASH

Runtime target: 2:30 **Strand mapping:** CBM

[VISUAL: Cash at a desk with two cards labeled "Customer A" and "Customer B."]

CASH: Quick puzzle. Customer A is twelve years old, lives in a suburb, attends seventh grade. Customer B is twelve years old, lives in a suburb, attends seventh grade.

[VISUAL: Two identical-looking customer cards with the same demographics.]

CASH: Same customer, right?

[VISUAL: Cash flips both cards. New info appears.]

CASH: Customer A skips breakfast on game days, plays soccer Tuesday and Thursday, gets hungry by sixth period, and texts her mom from the cafeteria asking if there's anything in the car. Customer B doesn't play sports, eats a giant breakfast every morning, isn't hungry until dinner, and uses lunch to read.

[VISUAL: The two cards now have entirely different behavioral details.]

CASH: Same demographics. Different customers. If you're starting a hungry-at-school snack service, Customer A is your dream. Customer B doesn't care about your product.

[VISUAL: An arrow points from Customer A to a snack-box icon. Customer B's icon is a book, with no connection to the snack box.]

CASH: This is why people who build businesses talk about "personas," not just demographics. A persona is a customer described by what they do, not just what category they fit in.

[VISUAL: The word DEMOGRAPHIC fades. The word BEHAVIORAL stays bright.]

CASH: Demographic data — age, grade, neighborhood, gender — is useful for finding people. Behavioral data — what they do on a Tuesday, what frustrates them, what they already use — is useful for selling to them.

[VISUAL: A Venn diagram. "Find" on one side, "Sell" on the other. Demographics in "Find," behavior in "Sell," some overlap.]

CASH: Here's the rule. When you write your persona, every section needs at least one behavior. Not "13-year-old girl." But "13-year-old girl who forgets her water bottle three days a week."

[VISUAL: A persona one-pager with a "behavior" section highlighted.]

CASH: And every behavior comes from a real interview, not your imagination. Imagination is for fiction. Personas are for evidence.

CTA: "This week, fill in your Persona v1 — assumptions only. Mark each line with D for demographic or B for behavioral. Count which side you have more of. Aim for more B."

[Fade.]

Video 6 — "What Could Your A/B Test Not Tell You?" (Week 27, Mid-Unit 3)

Runtime target: 2:35 **Strand mapping:** CBM + LRCI

[VISUAL: Cash standing between two posters, one labeled A, one labeled B.]

CASH: Let me give you a hard truth about A/B tests. They will lie to you. Or really, they'll let you lie to yourself.

[VISUAL: A funhouse mirror appears between the two posters.]

CASH: Here's a story. Two posters. Same product. One on the left wall, one on the right. After three days, the left poster has more votes. Left wins!

[VISUAL: Left poster glows with "WINNER!"]

CASH: Except the left wall is closer to the cafeteria. So more people walked past it. More votes doesn't mean better message. It means more eyeballs.

[VISUAL: Foot-traffic arrows show way more people passing the left poster.]

CASH: That's a bias. A bias is something in your test that gives one side an unfair advantage. Every test has bias. The job isn't to eliminate it — that's impossible. The job is to name it.

[VISUAL: The word BIAS appears with a bullet list under it: "Position. Color. Time of day. Who's asking. What else is happening."]

CASH: Here's the rule. After you run your test, write down two sentences. Sentence one — who won. Sentence two — what your test cannot tell you.

[VISUAL: Two sentence frames appear: "Message _ won by _ votes." "My test cannot tell me whether _."]

CASH: That second sentence is what makes you a real entrepreneur. Adults who skip it look smarter for ten minutes and dumber for a year.

[VISUAL: Two characters — one confidently striding into a wall, one cautiously checking the doorway.]

CASH: And here's the bigger move. If your test is inconclusive — if A and B are basically tied — that's a real result. Don't make up a winner. Decide what to test next.

[VISUAL: A tied scoreboard. Below it, the word NEXT.]

CASH: Most great businesses run dozens of tests. Each one is small. Each one is honest. Each one teaches something. Nobody bats a thousand. Everybody who's any good — bats more often.

CTA: "After your test, write two sentences. Who won, and what your test cannot tell you. Be honest about both."

[Fade.]

Video 7 — "The Quiet Signal" (Week 33, Mid-Unit 4)

Runtime target: 2:30 **Strand mapping:** LRCI + ESL

[VISUAL: Cash holding two stacks of survey responses. One big stack, one small stack of just two cards.]

CASH: Here's a thing nobody told me when I was in seventh grade. Sometimes the most important feedback you'll get is from one or two people, and it'll sound quiet, and it'll be right.

[VISUAL: The big stack glows. The small stack stays in the shadow but is highlighted with a magnifying glass.]

CASH: The big stack is loud signal. Lots of people, similar comments. You should pay attention to it. That's how you learn what most customers want.

[VISUAL: An arrow from the big stack to a "PRIORITIZE" box.]

CASH: But the small stack — those one or two people who said something nobody else said — sometimes they're the canary. They're noticing something coming.

[VISUAL: A small bird in a coal mine. Then it flies up to a list labeled "INVESTIGATE."]

CASH: Here's a real-feeling example. A snack box business gets thirty pieces of feedback. Twenty-five say "I love the variety." Five say "the box is hard to open." One says "my brother has a peanut allergy and I noticed your label is small."

[VISUAL: A pie chart with the three buckets.]

CASH: What's the loud signal? Variety is working. What's the medium signal? Packaging needs work. What's the quiet signal? Allergens. And quiet signals about safety are the loudest signals there are.

[VISUAL: A "LABEL" close-up on the box, then a zoom into the small allergen warning, which gets bigger.]

CASH: So here's the rule. When you triage your feedback, don't just ask "how loud is this." Ask "if this person is right, what would happen?" If the answer is "somebody could get hurt" — drop everything and check.

[VISUAL: Three columns: HOW LOUD · HOW IMPORTANT · WHAT IF THEY'RE RIGHT.]

CASH: Most quiet signals are noise. Some are gold. Almost all of them are about safety, fairness, or something the company doesn't want to hear. Train yourself to listen for those.

CTA: "In your triage, mark the quietest comment in your survey. Write one sentence: 'If this person is right, what would I do?' That's your action item."

[Fade.]

Video 8 — "The Year-End Customer-First Summary" (Week 36, Defense Day)

Runtime target: 3:00 **Strand mapping:** All eight

[VISUAL: Cash at a different desk now — a slightly more grown-up setup. The classroom is gone. A simple panel of muted color sits behind.]

CASH: Okay. Last one. We made it.

[VISUAL: A timeline appears, with checkpoints marked: Week 1, Week 8, Week 18, Week 28, Week 36.]

CASH: I want to say something honest. You probably didn't make money this year. You probably didn't sell anything. You probably didn't end the year with a business that's launched.

[VISUAL: A blank cash register. No money.]

CASH: And that's the win.

[VISUAL: The cash register fades. A notebook appears with notes, sketches, crossed-out ideas.]

CASH: Because here's what most people who start businesses skip — and they regret it later. They skip the part where you actually find out who the customer is. They skip the math. They skip the part where their message says something true. They skip the listening. They jump.

[VISUAL: A character running and falling off a small cliff.]

CASH: You didn't jump. You sat with it. You interviewed three people. You revised your assumption. You did the math. You wrote a price you could defend. You tested two messages. You ran a survey. You changed something because of what you heard.

[VISUAL: Each step appears as a bullet, ticking off as Cash names it.]

CASH: Those things — interview, math, message, listen — those are the moves. They are the moves of every great business that lasts. They are the moves you missed in school for years before this year. And now they're yours.

[VISUAL: The bullets become a small toolkit icon labeled "CUSTOMER-FIRST KIT."]

CASH: A few things I want you to remember. One. Being wrong on Day 1 is the deal. Don't be afraid of it. Two. Revenue is loud. Contribution margin is true. When you're old, you'll see ads everywhere from people who skipped contribution margin and went for revenue. You'll know better.

[VISUAL: Two side-by-side imaginary newspapers — one celebrates "RECORD REVENUE," the other quietly notes "CONTRIBUTION MARGIN HEALTHY."]

CASH: Three. Honest claims build customers who come back. Tricks build customers who feel taken. You can pick which one your business is. It's actually a choice.

[VISUAL: Two arrows — long-curving green for honesty, sharp-spike-then-flat red for tricks.]

CASH: Four. Listening is not a moment. It's a system. The day you stop listening is the day a business stops being any good.

[VISUAL: A clock with a small ear icon at each hour.]

CASH: And one more — for the road. The thing you got wrong on Day 1 is the thing you'll get wrong on Day 1 of your next venture, too. Different details. Same shape. The skill is catching it faster.

[VISUAL: Cash holds up a hand-drawn version of the original Day 1 Assumption card.]

CASH: Today is your defense. Tell them what you learned about your customer, your math, your message, your change. Be honest about what you don't know yet. Use the words. Use the evidence. Don't sell. Show.

[VISUAL: A panel of three faceless silhouettes appears, each with a clipboard.]

CASH: Whether you start a real venture next year or not, you've already done something most adults haven't. You've practiced asking — every time, about everything — which people, and how do you know?

CTA: [VISUAL: A simple line of text.] "Go give your defense. We'll see you in Grade 8 — where you build the system."

[Cash waves. A simple "Cash to Company" logo appears. Fade.]

Production notes (for whoever animates these)

"Being wrong on Day 1 is the deal."

— CASH

- **Energy:** Cash is calm and curious, not hyper. No exclamation-heavy shouting. The tone is more "thoughtful older sibling" than "TV presenter."
- **Visuals:** Animation should feel hand-drawn or paper-cutout, not slick 3D. Style should signal "we made this with care, not a marketing budget."
- **Music:** Sparse. Light underscore at most. Silence is fine.
- **Captions:** Always on. Some students learn through reading. Captions are not optional.
- **Length discipline:** Keep within 30 seconds of target runtime. Cut content rather than rush delivery — the slower pace is part of the brand.

UPGRADE LAYER (added by Brand & SMM Director, 2026-04-25)

Note: Grade 7 is the canonical pattern and is already the strongest scripts in the corpus. Upgrades here are LIGHT — primarily Shorts cuts and shareable-line callouts. Hooks already work.

Video 1 — "Customers Are Evidence" — Upgrade

- **Shareable Cash line:** "Being wrong is the deal."

- **9-second Shorts cut:** Two-kids-snack-business compare → "Evidence vs. assumption" → end card with the year question. **THIS IS A FLAGSHIP SHORT.**
- **B-roll suggestion:** include a slow zoom on the words EVIDENCE / ASSUMPTION; this is the screenshot teachers will pin.

Video 2 — "Per-Customer Math Runs the Business" — Upgrade

- **Shareable Cash line:** "Revenue is loud. Contribution margin is true."
- **9-second Shorts cut:** Two lemonade stands → "WAIT" beat → "$10 vs. $21" reveal. **THIS IS THE TOP VIRAL CANDIDATE OF THE WHOLE 104-SCRIPT CORPUS.** The "WAIT" beat is a TikTok hook in the wild.
- **Production note:** caption-on, big-number animation on $90 / $9 cost reveal, 1-frame visual freeze + brief silence on the "WAIT" (no music sting — silence carries the line, per Style Guide §9) — this Short can carry the brand on social for 6 months.

Video 3 — "Honest Stories That Sell" — Upgrade

- **Shareable Cash line:** "Honest claims build customers who come back. Tricks build customers who feel taken."
- **9-second Shorts cut:** Four-point Fair-to-Customer Check → swipeable carousel format on Instagram.
- **UGC angle:** pin the Capstone Pledge on the classroom wall; teachers photograph it for #CapstonePledge.

Video 4 — "Feedback Is a System, Not a Moment" — Upgrade

> *"A little less wrong, every week."*
>
> — CASH

- **Shareable Cash line:** "Listening is not a moment. It's a system."
- **9-second Shorts cut:** Bracelet-business mistake → "channel · cadence · triage" reveal.

Video 5 — "Why Personas Aren't Demographics" — Upgrade

- **Shareable Cash line:** "Same demographics. Different customers."
- **9-second Shorts cut:** Two-card flip reveal → behavioral details → "Demographics for finding. Behaviors for selling."

Video 6 — "What Could Your A/B Test Not Tell You?" — Upgrade

- **Shareable Cash line:** "Don't make up a winner. Decide what to test next."
- **9-second Shorts cut:** Two-poster bias reveal → tied scoreboard → "Inconclusive is a real result."

Video 7 — "The Quiet Signal" — Upgrade

- **Shareable Cash line:** "Quiet signals about safety are the loudest signals there are."
- **9-second Shorts cut:** Pie chart reveal → quiet signal → "30 cards. 1 mattered most. Listen for that one."

Video 8 — "The Year-End Customer-First Summary" — Upgrade

- **Shareable Cash line:** "You didn't make money this year. That's the win. You did the work."
- **9-second Shorts cut:** Empty cash register → notebook of moves → "The work, not the win."
- **Production note:** Year-end closer — give it a slightly more grown-up musical bed.

End-of-script Brand Stamp

[VISUAL: Cash to Company logo. **"Which people, and how do you know?"**]

ABOUT THE HOST

Cash, in five words

curious · warm · honest · patient · specific

"I'm Cash. I don't promise wealth. I don't promise success. I promise that the moves — interview, math, message, listen — will make you a clearer thinker about money no matter what you end up doing."

— CASH

What Cash does

- **Asks questions that point to evidence.** Cash never tells; Cash asks what your evidence says.
- **Names rules sparingly.** "An assumption is something you think is true without checking. Evidence is something you observed, heard, or counted."
- **Tells short, made-up-but-realistic stories.** 30–60 seconds, shows don't tell.
- **Celebrates the move, not the win.** Revision, honesty, and evidence — not revenue.
- **Hedges deliberately.** probably, often, sometimes — never absolutes about complex topics.

What Cash never does

- Flatter ("amazing!", "great job!"), promise wealth, moralize about money.
- Reference real brands or living celebrities as endorsements.
- Surface family financial details. (Hypothetical scenarios only.)
- Pretend the world is fair. Cash is honest about systemic factors without becoming a politics class.

> *When in doubt, work one of these into the script: Which people, and how do you know? · Being wrong on Day 1 is the deal. · Revenue is loud. Contribution margin is true. · A little less wrong, every week.*

STRAND OUTCOMES

Eight Strands. One Year. Verifiable Outcomes.

Cash to Company runs the same eight strands K-12. Each year deepens the demonstration. The Grade 7 version of each strand is below.

Code	Strand	Grade 7 demonstrated outcome
BAVC	Business Awareness and Value Creation	Identify a business problem, propose a value-creation hypothesis, and revise it with customer evidence.
PSIG	Problem Solving and Idea Generation	Generate, screen, and refine ideas; document why one was chosen and the others were not.
MFL	Money and Financial Literacy	Compute revenue, variable cost, contribution margin, and breakeven for a real product or service.
CBM	Customers, Branding, Marketing	Build a persona from interview evidence; design honest messaging; A/B test two claims.
OSO	Operations, Systems, Organization	Design a simple weekly operating cadence with named roles, handoffs, and a feedback loop.
LTO	Leadership, Teamwork, Ownership	Run and document a team meeting; resolve one disagreement using shared evidence.
ESL	Ethics, Safety, Legal Awareness	Identify the line between persuasion and manipulation; flag one borderline claim and rewrite it honestly.
LRCI	Launch Readiness and Continuous Improvement	Pilot, measure, and document at least three iterations with rationale and what changed.

STANDARDS ALIGNMENT

Six Benchmarks This Year

Standards are cited at the benchmark level. Honest gaps are named when they exist.
The Capstone artifact addresses each one.

Benchmark	What students must demonstrate
Jump$tart 6 (Financial Decision Making) 8-2	Identify ways consumers may avoid making poor decisions; apply to entrepreneurs avoiding poor customer guesses.
CCSS-ELA W.7.4	Produce clear and coherent writing in which the development, organization, and style are appropriate to task.
CCSS-ELA SL.7.1	Engage effectively in a range of collaborative discussions.
CASEL Social Awareness	Recognize the perspectives of others; demonstrate empathy.
C3 D2.Eco.1.6-8	Explain how economic decisions affect well-being of individuals, businesses, society.
Jump$tart 1 (Spending & Saving) 8-2	Demonstrate ability to use number skills to manage money.

HOW TO READ THIS TABLE

Each lesson cites at least one of these benchmarks. Each Capstone checkpoint addresses two or more. The Teacher Guide includes a per-lesson standards crosswalk.

"Standards aren't a cage. They're a list of moves you're going to be glad you can make. Pick one. Practice it. Move on."

— CASH

CAPSTONE RUBRIC (4-POINT)

How We Score the Capstone

The Capstone artifact is scored on four traits, each on a 4-point scale. Honest, specific, decision-oriented work earns the high marks. Generic or assumption-laden work earns the low ones.

Trait	1 — Emerging	2 — Developing	3 — Proficient	4 — Advanced
Evidence quality	Mostly assumptions; few or no quotes.	2-3 interview quotes; partial evidence.	5+ direct quotes; varied sources; coded patterns.	Triangulated quotes plus behavioral observation; counter-evidence acknowledged.
Per-customer math	Confused costs; no contribution margin.	CM computed but with errors; one price scenario.	Correct CM and breakeven; clear pricing rationale.	CM under multiple price scenarios; LTV-lite reasoning.
Honest messaging	Vague or misleading claims.	Some specifics; some unsupported claims.	All claims supported; clean ethics check.	A/B-tested copy with rationale; resists clever-but-borderline phrasing.
Feedback system	One-time check; no documentation.	Ad-hoc feedback; partial revisions.	1-week feedback loop with 3 documented changes.	Sustained loop plus signal-vs-noise analysis plus revision log.

CALIBRATION NOTE

Score honestly. A "3" means the student met the standard the way an adult professional would. A "4" means they did something a working entrepreneur would be proud to show. Withhold "4" unless the work earns it.

SENSITIVITY AND FAMILY ENGAGEMENT

What We Don't Ask. What We Always Frame.

Money is a tool, not a virtue. Some students live in households with credit-card debt, low or no banking access, or active financial stress. The curriculum is built so that none of those students is asked to disclose, perform, or apologize for their family situation.

Rules of the room

- **Never ask about family money.** No questions about parents income, debts, accounts, or banking status.
- **Use neutral hypotheticals.** "For a sample family with a $4,000/month take-home" — not "your family."
- **Decouple wealth from worth.** Cash never says "everyone can be rich." Cash says "you will be a clearer thinker about money no matter what you end up doing."
- **Name systemic factors honestly.** Wage gaps, geography, and luck shape outcomes. The skill we build is the skill in the student hands.
- **Protect the venture.** A student Capstone is theirs. We don't require they share revenue or family contribution. The artifact is the work, not the bank account.

Family engagement

Parents get one well-framed question per quarter — never a quiz, never a money-disclosure prompt. The default frame is curiosity ("What did you notice about your customers this week?"), not interrogation ("How much did you make?").

> *"Money is a tool. The question is not whether your family has a lot of it. The question is what you do with the moves we are practicing — interview, math, message, listen — wherever your starting line happens to be."*

ACTIVITY INDEX

Ten Activities. One Notebook.

Every activity in this book is built to be done with a pencil, your own evidence, and the questions Cash keeps asking. Skip nothing. Date everything. Re-read in three months.

No.	Activity	What you will do
01	Day 1 Customer Assumption	One sentence, one card. Don't try to be right; try to be specific.
02	Open vs. Leading Questions	Rewrite five leading questions into open ones. Practice on a partner.
03	Coding Patterns from Transcripts	Highlight surprises, frustrations, wishes. Tally them. Find the pattern.
04	Persona Pack v1	Combine evidence into one specific person — name, behaviors, top frustration.
05	Variable Cost per Unit	From a real receipt, compute the cost per one of the thing you sell.
06	Contribution Margin Worksheet	Price minus variable cost. Decide if it covers your fixed costs.
07	Two-Message A/B Test	Two honest messages. Three-day test. Report the winner and why.
08	Persuasion vs. Manipulation Line	Sort 10 ad claims onto a line. Defend your placement.
09	1-Week Feedback Loop	Collect, code, and act on feedback. Document three changes.
10	Final Capstone Defense	Five slides. Five minutes. Show the moves you made.

NOTEBOOK SETUP

Get a single notebook for the whole year. Number every page. The first 5 pages are your Vocabulary Spine. The last 5 pages are your Day-1 Assumptions (you will come back to those). Everything in between is your work.

Notebook checklist

- **Title page** — your name, your venture working-title, today's date.
- **Vocabulary spine** — 5 pages reserved for definitions you will add as we go.
-

Customer notes — one section for interview transcripts. Use direct quotes, with initials and dates.

- **Math section** — receipts taped in, per-unit computations, contribution margin scratch work.
- **Messaging section** — drafts of two-claim A/B tests, with what won and why.
- **Feedback log** — one page per week of your feedback system, with the three changes you made.

WORKED EXAMPLE

Worked Example: Per-Customer Math at the Snack Stand

Devon sells protein cookies after school. He sells 30 cookies a week at $2.00 each. Revenue is $60. He spends $0.85 on each cookie (oats, peanut butter, packaging). His variable cost per cookie is $0.85.

Contribution margin per cookie = $2.00 - $0.85 = **$1.15**. His fixed cost (the table he rents from the school store) is $20/week. He needs **$20 / $1.15 = 18 cookies/week** just to cover the table. He's currently selling 30. He's clearing $14.50/week after fixed costs.

Devon's question to Cash: should he raise the price to $2.50? Cash answers with a question: "Which people, and how do you know? Run a 3-day test. Half the kids see $2.00. Half see $2.50. Tell me what they actually buy."

WHAT TO COPY

The move here is not the answer. It is the structure: specific number, specific person, specific decision. Use that pattern in your own venture this quarter.

> *"Most adults skip this. You won't. Pick one customer. Compute one number. Decide one thing." — Cash*

END-OF-QUARTER REFLECTION

Four Quarters. Same Five Questions.

At the end of every quarter you will answer the same five questions. The answers should look different over time. Reread the previous quarter before you write a new one.

1. **Which people did you talk to this quarter, and what did they actually say?**

   Specific quotes, initials, dates. Resist the urge to summarize.
2. **What did you change in your venture because of evidence?**

   Name the change. Name the evidence that caused it.
3. **What is one number you know better now than three months ago?**

   Variable cost per unit. Contribution margin. Anything quantitative.
4. **What is a claim you made that you would take back?**

   Be honest. The claim does not have to be public. The honesty is the move.
5. **What would Cash ask you about all of this?**

   "Which people, and how do you know?" is always available. Find your own version.

> *"Reflection is not a feeling check-in. It is a memory tool. The you in three months wants to know what the you today learned. Write it down so future-you can use it."*
>
> — CASH

One promise.

Cash to Company makes one promise: students who move through this program will be clearer thinkers about money and entrepreneurship — no matter what they end up doing for a living.

We do not promise wealth. We do not promise success. We promise clarity.

"Customers are evidence, not assumptions."

— CASH, GRADE 7
