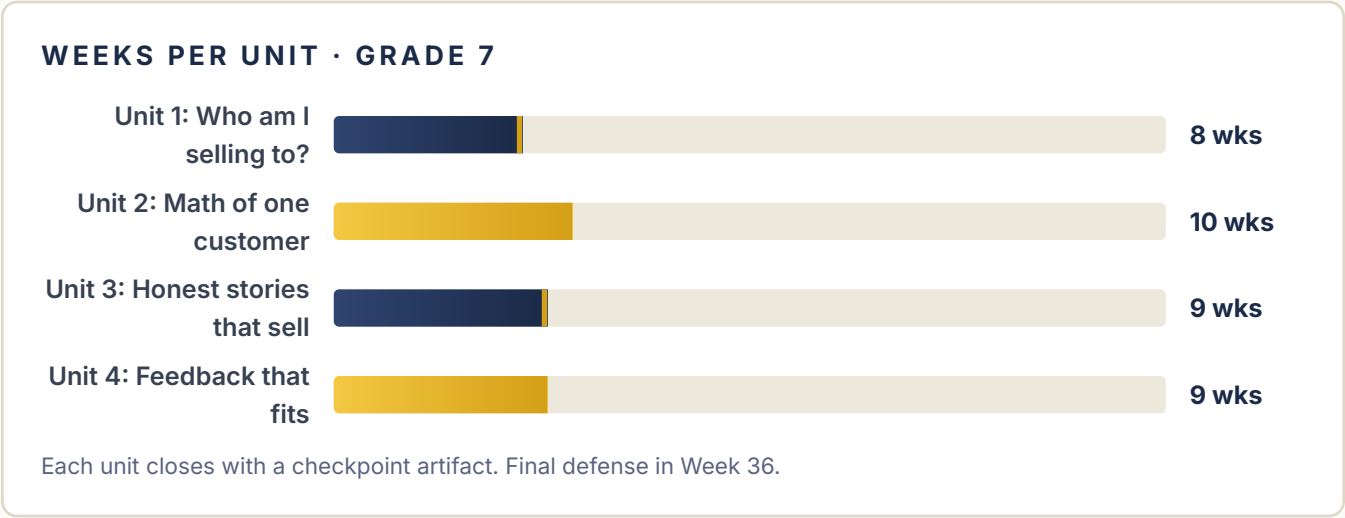
YEAR-AT-A-GLANCE

# Four Units. Thirty-Six Weeks. One Capstone.

The year is built as four units, each ending with a public-facing artifact that feeds the rolling Capstone. The bars show how the weeks are spent — roughly equal, with a slight lean toward the math-heavy unit because per-customer math is the load-bearing skill.



**36** WEEKS

**4** UNITS

**10** LESSONS

**8** CASH VIDEOS

GRADE 7 · CURRICULUM BOOK

# The Year, in One Place

*Customers are evidence, not assumptions.*

**Year theme:** Know your customer **Grade band:** 6-8 (middle school) **Total instructional time:** ~36 weeks · 90–120 minutes per week (one block + one short follow-up) **Anchor mascot:** Cash, the program's animated host

## Why this year

*"A little less wrong, every week."*

— CASH

Twelve-year-olds are wired to notice difference. They are intensely aware of who's in their group, who's not, who's cool, who's cringe. That sensitivity to social signal is exactly the muscle a great entrepreneur uses — except aimed at customers instead of cliques. Grade 7 turns that natural attention outward.

The financial spine of the year is the contribution margin. Once a student understands "for every customer I get, I make $X after my variable costs — and I need to pay my fixed costs out of that," they understand more about pricing and growth than most adults. Grade 7 builds the customer reasoning and the contribution math together because they belong together: who you sell to changes what they'll pay, which changes what you can keep.

## The big ideas (Understanding by Design — Stage 1)

These are full-sentence understandings the year is built around. Every unit, lesson, and assessment can be traced back to one or more of these.

1. **Customers are evidence, not assumptions.** The fastest way to be wrong about a business is to imagine the customer instead of meeting one.
2. **A customer is a specific person before they are a number.** Demographics are not personas; behaviors and frustrations are.
3. **Per-customer math runs the business.** If you know revenue per customer and variable cost per customer, you can decide almost everything else.
4. **Honest claims build long-term customers; clever claims build short-term sales.** The choice between the two is a business decision, not just an ethical one.
5. **Feedback is a system, not a moment.** A business that listens once is performing customer-centricity. A business that listens weekly is one.

6. **Knowing your customer changes your product.** Real customer evidence almost always reshapes the offer.

## Essential questions (returned to all year)

- Who is this for, exactly?
- How would I know if I'm wrong about my customer?
- What does a great customer experience cost — and is it worth it?
- When does a clever marketing message become a misleading one?
- What does my customer need that nobody (yet) gives them?
- How do I keep listening when I'm busy running the business?

## Year-at-a-glance

The year is built as four units. Each unit ends with a public-facing artifact and ties into the rolling Capstone — the Customer-First Venture — that students design across the year.

| Unit | Weeks | Title | Big idea | Anchor artifact |
|---|---|---|---|---|
| 1 | 1–8 | Who am I selling to? | Customers are evidence, not assumptions. | A customer persona built from real interview evidence. |
| 2 | 9–18 | Math of one customer | Per-customer math runs the business. | A contribution-margin worksheet + pricing recommendation. |
| 3 | 19–28 | Honest stories that sell | Honest claims build long-term customers. | A 3-day mini A/B test of two ad messages, with analysis. |
| 4 | 29–36 | Feedback that fits | Listening is a system. | A 1-week feedback system run on a real (or simulated) classmate-customer base, with revisions made. |

The Capstone (the Customer-First Venture) threads all four units. Students start with a hypothetical customer, sharpen them with evidence, build the per-customer math, design honest messaging, install a feedback loop, and present the venture at the end of the year.

# Vocabulary roadmap

*"Revenue is loud. Contribution margin is true."*

— CASH

Vocabulary in Grade 7 is layered intentionally. Each unit introduces 6–10 new terms; old terms are recycled. Students keep a Vocabulary Spine in their notebook (a single index list that grows all year) and a Frayer model is built for each "weight-bearing" term.

**Unit 1 (target population vocabulary):** customer, segment, persona, demographic, psychographic, channel, frustration, assumption, evidence, problem statement, target market.

**Unit 2 (per-customer math vocabulary):** revenue, variable cost, fixed cost, unit economics, contribution margin, gross margin, breakeven, customer acquisition cost (CAC, simplified), lifetime value (LTV, simplified).

**Unit 3 (messaging and ethics vocabulary):** claim, evidence, social proof, scarcity, urgency, authority, persuasion vs. manipulation, FTC truth-in-advertising (kid version), warranty, return policy, terms.

**Unit 4 (feedback and improvement vocabulary):** feedback, signal vs. noise, qualitative, quantitative, NPS-lite (simple "would you recommend"), iteration, pivot, test-and-learn, weekly review.

# Anchor texts

Mix of short readings, video, and case studies. None require purchase; school-friendly substitutes provided where possible.

- The Berenstain Bears Get the Gimmies — quick re-read for the messaging unit. Yes, even at 7th grade. The "gimme" framing surfaces persuasion fast.
- Excerpts from Founders at Work (Jessica Livingston) — kid-curated 2-page founder origin stories on YouTube and in the public domain (Brian Chesky on Airbnb's airbed origins; Sara Blakely on Spanx).
- Hooked (Nir Eyal) — teacher-mediated 1-page summary of the Trigger–Action–Reward–Investment loop, used to evaluate apps students already use. (Substantive — and a crowbar into "why is this app like this?")

- A short story or excerpt about a small-business shopkeeper who knows their regulars by name — recommended: a chapter from Bud, Not Buddy (Christopher Paul Curtis) or Inside Out & Back Again (Thanhha Lai), depending on classroom roster.
- Two side-by-side product pages — one ethical, one borderline — for ad-claim analysis. Provided in the program assets.
- One Cash video per unit (8 across the year — see the Video Scripts file).

## Project arc — the Customer-First Venture (Capstone)

Across the year, each student (or pair) develops one venture. A venture can be a real business, a service, an event, a content product, or a not-for-profit. The Capstone has four checkpoints, one per unit:

- **End of Unit 1 (Week 8):** Persona pack — interview evidence + persona + problem statement.
- **End of Unit 2 (Week 18):** Pricing pack — per-customer math, pricing recommendation, breakeven.
- **End of Unit 3 (Week 28):** Messaging pack — two-message test results + revised pitch + ethics check.
- **End of Unit 4 (Week 36):** Feedback pack — one-week feedback system results + 3 documented changes + final pitch.

Students choose the venture in Week 2 from a list of "Capstone-friendly" categories (food, tutoring, content, service, repair, events). Optional pivot windows in Weeks 9, 19, and 29 allow students to switch ventures if evidence demands it.

## Assessment philosophy

We assess two things at every checkpoint:

1. **Did the student do the work the standard names?** (Did they actually run interviews? Did they actually compute contribution margin?)
2. **Did the student think about it?** (Can they explain their logic? Can they identify what they got wrong on the first try?)

The 4-point rubrics in the Rubric Bank are the spine. Holistic scoring is allowed for Cash-video reflections and quick exit tickets; analytic rubrics are required for the Capstone checkpoints.

# Differentiation in Grade 7

*"Most adults skip this. You won't."*

— CASH

- **ELL.** Customer interview transcripts are ideal language-rich material. Provide sentence frames for interview questions and write-up. Allow native-language interviews if the customer is also an ELL family member; require English in the persona document.
- **IEP/504.** Interview as primary mode of evidence-gathering favors students who write slowly. Allow voice-recorded interviews with transcription support. Provide structured templates with one section per page.
- **Advanced.** Push toward depth — multi-segment personas, contribution margin under multiple price scenarios, a third "what if I'm wrong about my customer?" scenario in every checkpoint. Peer-teaching role for younger grades during the per-customer math unit.

# Sensitivity considerations specific to this year

- **Money topics in interviews.** Students are likely to interview family members or neighbors. Frame interviews around "what frustrates you about [domain]" — never "how much do you spend" or "what's your income."
- **Customer empathy without overstepping.** Help students notice that "customer frustration" is a useful business signal, not a license to gossip about real people they know. Anonymize in write-ups.
- **Cliques and exclusion.** "Who is this for?" is a useful business question. It can also reproduce cliquishness if uncoached. Surface the difference between "this isn't for you" (fine: a teen brand isn't for grandparents) and "you're not cool enough" (not fine: exclusion as marketing).
- **Body, food, appearance.** Many 7th-grade ventures will lean toward beauty, food, fitness. Apply the program's Honest Claims unit early so vague body-image messaging gets caught and reshaped.

# Materials and tools (year)

- Notebooks (paper or digital) for the Vocabulary Spine and Capstone Journal.
- Interview script template (provided).
- Persona one-pager template (provided).
- Per-customer math worksheet (provided).

- Mini A/B test template (provided).
- Weekly feedback survey template — 3-question short form (provided).
- Access to one Cash short video per unit (8 total).
- Optional: a free spreadsheet tool (Google Sheets, Excel for Web) for the per-customer math and breakeven.

## How this year hooks into the rest of Cash to Company

- **Reaches back to Grade 6** — students who came through Grade 6 already know about systems and roles; this year they apply that operations sense to a customer-feedback system.
- **Reaches forward to Grade 8** — Grade 8 builds on the contribution math with break-even calculators and PDSA cycles. Strong Grade 7 work makes Grade 8 easier.
- **Vertical strands.** Each of the eight strands has a Grade 7 outcome (see the Master Scope and Sequence). The four units braid them together — for example, Unit 1 centers BAVC, PSIG, and CBM with a strong supporting beam from LTO.

## A note to first-time teachers of this curriculum

> *"Listening is not a moment. It's a system."*
>
> — CASH

You don't need to be an entrepreneur to teach this. You do need to be willing to model honest curiosity about customers — to say "I'm not sure, let's go ask" and mean it. The Cash videos take some pressure off introducing concepts; the lesson plans take the pressure off pacing. Your highest-leverage move is enforcing the "evidence not assumptions" norm. When a student says "people will love this," ask "which people, and how do you know?" — every time. By Week 12, they'll ask each other.

---

## Senior expert upgrade pack — Grade 7

### Cross-grade bridge sharpening

**Add to Why this year (open):** "Last year you built systems for the venture you imagined; this year you find out who the venture is actually for. Grade 6 ran the operations. Grade 7 finds the customer."

This makes the Grade 6 → Grade 7 transition explicit. Operations without a clear customer is busywork; this year we add the customer that makes the operations matter.

## Multi-class branching scenario — "Two pricing teams meet"

A 2-day branching scenario for Unit 2 (math of one customer).

- **Day 1.** "Two student teams both run after-school tutoring. Same subject, same age customers. Team A charges $5 per session at variable cost $1 per session. Team B charges $20 per session at variable cost $5 per session. Both teams claim they're doing well."

Compute together (per session):

| | Team A | Team B |
|---|---|---|
| Price | $5 | $20 |
| Variable cost | $1 | $5 |
| **Contribution margin** | **$4** | **$15** |
| Sessions per month | 40 | 8 |
| Monthly contribution | $160 | $120 |

Class question: which team is in a better spot? Pair-share. Surface: Team A's contribution-margin-per-session is lower, but volume makes up for it. Team B has higher per-session margin but lower total.

- **Day 2.** Pivot: "Team A's tutor has a fixed cost of $50/month for an online platform. Team B's tutor uses free tools."

| | Team A | Team B |
|---|---|---|
| Monthly contribution | $160 | $120 |
| Fixed cost | $50 | $0 |
| **Profit** | **$110** | **$120** |

Now Team B wins. "Same customers, different math. Both teams could be 'doing well' depending on which number you look at. The math has to be honest."

This scenario practices MFL (contribution margin), CBM (customer segments), LRCI (revising your read of "doing well"). Repeatable with: two snack businesses, two T-shirt businesses, two service businesses.

## ROUND 2 PATCH — Standards Citations (verbatim)

- **Jump$tart Standard 6 (Financial Decision Making), Benchmark 8-3:** "Apply systematic decision making to identify the role of emotion in making financial decisions" — customer empathy is the analog here.
- **CEE Standard 2 (Buying Goods and Services), Grade 8:** "People can use information from sellers and outside reviewers to compare products" — flipped: students learn to be the seller making honest claims.
- **CCSS-Math 7.RP.A.3:** "Use proportional relationships to solve multistep ratio and percent problems" — used in per-customer revenue and contribution margin.
- **CCSS-Math 7.SP.A.1 / 7.SP.A.2:** "Use random sampling to draw inferences" — applied to small-sample customer surveys.
- **CCSS-ELA W.7.7:** "Conduct short research projects" — customer interview write-ups.
- **CCSS-ELA SL.7.1:** "Engage effectively in collaborative discussions" — interview practice + team huddles.
- **C3 D2.Eco.4.6-8:** "Explain how changes in supply and demand cause changes in prices and quantities."
- **CASEL Social Awareness:** Perspective-taking — central to building a customer persona.
- **NGSS-ETS MS-ETS1-1:** "Define the criteria and constraints of a design problem with sufficient precision" — applied to customer problem statements.
- **Honest gap:** "Customer persona" is a marketing-discipline construct not in Jump$tart/CEE but central to entrepreneurship; taught explicitly.

## ROUND 2 PATCH — Strand Outcomes (verbatim)

By end of Grade 7, a student can: - **BAVC:** "I can compare two real businesses targeting the same age group, identify what each gets right about the customer, and recommend one improvement for each." - **PSIG:** "I can draft a problem statement in the form [Customer] struggles with [problem] when [context], because [cause] using interview evidence, not assumptions." - **MFL:** "I can calculate per-customer revenue, cost of acquisition (proxy), and contribution margin for a small business scenario, and explain why all three matter." - **CBM:** "I can build a one-page customer persona with a name, demographic detail, daily routine, top 3 frustrations, and 3 channels where I could reach them." - **OSO:** "I can design a 1-week customer feedback system (a 3-question survey + a 1-question post-purchase prompt) and report what I learned." - **LTO:** "I can lead a 10-minute team huddle in which I assign one customer-research task to each teammate and follow up the next day." - **ESL:** "I can apply a 4-point fair to the customer check (clear claim, honest price, real reviews, easy returns) to a real or fictional product page." - **LRCI:** "I can compare my Day 1 customer assumptions to Day

30 customer evidence and revise my product/messaging in 3 specific ways with reasons."

## ROUND 2 PATCH — Cross-Grade Bridge: Grade 6 ↠ Grade 7 (RECEIVING bridge)

Last year you built systems for a venture you imagined — SOPs, RACI, ledger, weekly stand-up. **This year, you find out who the venture is actually for.** Bring your Grade 6 ledger forward; the customer evidence you gather this year will tell you which line items in the ledger are right and which were guesses.

## ROUND 2 PATCH — Advanced-Learner Specifics (Grade 7)

- **Persona extension:** Build two personas for the same product — the primary user and the secondary buyer (e.g., "the kid who wants the app" + "the parent who pays for it"). Discuss when their interests align and when they conflict.
- **Contribution margin extension:** Compute negative contribution margin scenarios. (E.g., a delivery service where the cost per order exceeds the price per order — the more you sell, the more you lose.)
- **Customer-feedback extension:** Run two parallel surveys with the same questions but different framings. Compare results. Discuss bias.
- **Day 1 letter extension:** Write Day 1 letters from two personas. Open both at Day 30 and discuss which moved more.

ABOUT THE HOST

# Cash, in five words

*curious · warm · honest · patient · specific*

*"I'm Cash. I don't promise wealth. I don't promise success. I promise that the moves — interview, math, message, listen — will make you a clearer thinker about money no matter what you end up doing."*

— CASH

## What Cash does

- **Asks questions that point to evidence.** Cash never tells; Cash asks what your evidence says.
- **Names rules sparingly.** "An assumption is something you think is true without checking. Evidence is something you observed, heard, or counted."
- **Tells short, made-up-but-realistic stories.** 30–60 seconds, shows don't tell.
- **Celebrates the move, not the win.** Revision, honesty, and evidence — not revenue.
- **Hedges deliberately.** probably, often, sometimes — never absolutes about complex topics.

## What Cash never does

- Flatter ("amazing!", "great job!"), promise wealth, moralize about money.
- Reference real brands or living celebrities as endorsements.
- Surface family financial details. (Hypothetical scenarios only.)
- Pretend the world is fair. Cash is honest about systemic factors without becoming a politics class.

> *When in doubt, work one of these into the script: Which people, and how do you know? · Being wrong on Day 1 is the deal. · Revenue is loud. Contribution margin is true. · A little less wrong, every week.*

STRAND OUTCOMES

# Eight Strands. One Year. Verifiable Outcomes.

Cash to Company runs the same eight strands K-12. Each year deepens the demonstration. The Grade 7 version of each strand is below.

| Code | Strand | Grade 7 demonstrated outcome |
|---|---|---|
| **BAVC** | Business Awareness and Value Creation | Identify a business problem, propose a value-creation hypothesis, and revise it with customer evidence. |
| **PSIG** | Problem Solving and Idea Generation | Generate, screen, and refine ideas; document why one was chosen and the others were not. |
| **MFL** | Money and Financial Literacy | Compute revenue, variable cost, contribution margin, and breakeven for a real product or service. |
| **CBM** | Customers, Branding, Marketing | Build a persona from interview evidence; design honest messaging; A/B test two claims. |
| **OSO** | Operations, Systems, Organization | Design a simple weekly operating cadence with named roles, handoffs, and a feedback loop. |
| **LTO** | Leadership, Teamwork, Ownership | Run and document a team meeting; resolve one disagreement using shared evidence. |
| **ESL** | Ethics, Safety, Legal Awareness | Identify the line between persuasion and manipulation; flag one borderline claim and rewrite it honestly. |
| **LRCI** | Launch Readiness and Continuous Improvement | Pilot, measure, and document at least three iterations with rationale and what changed. |

STANDARDS ALIGNMENT

# Six Benchmarks This Year

Standards are cited at the benchmark level. Honest gaps are named when they exist.
The Capstone artifact addresses each one.

| Benchmark | What students must demonstrate |
|---|---|
| **Jump$tart 6 (Financial Decision Making) 8-2** | Identify ways consumers may avoid making poor decisions; apply to entrepreneurs avoiding poor customer guesses. |
| **CCSS-ELA W.7.4** | Produce clear and coherent writing in which the development, organization, and style are appropriate to task. |
| **CCSS-ELA SL.7.1** | Engage effectively in a range of collaborative discussions. |
| **CASEL Social Awareness** | Recognize the perspectives of others; demonstrate empathy. |
| **C3 D2.Eco.1.6-8** | Explain how economic decisions affect well-being of individuals, businesses, society. |
| **Jump$tart 1 (Spending & Saving) 8-2** | Demonstrate ability to use number skills to manage money. |

**HOW TO READ THIS TABLE**

Each lesson cites at least one of these benchmarks. Each Capstone checkpoint addresses two or more. The Teacher Guide includes a per-lesson standards crosswalk.

*"Standards aren't a cage. They're a list of moves you're going to be glad you can make. Pick one. Practice it. Move on."*

— CASH

CAPSTONE RUBRIC (4-POINT)

# How We Score the Capstone

The Capstone artifact is scored on four traits, each on a 4-point scale. Honest, specific, decision-oriented work earns the high marks. Generic or assumption-laden work earns the low ones.

| Trait | 1 — Emerging | 2 — Developing | 3 — Proficient | 4 — Advanced |
|---|---|---|---|---|
| **Evidence quality** | Mostly assumptions; few or no quotes. | 2-3 interview quotes; partial evidence. | 5+ direct quotes; varied sources; coded patterns. | Triangulated quotes plus behavioral observation; counter-evidence acknowledged. |
| **Per-customer math** | Confused costs; no contribution margin. | CM computed but with errors; one price scenario. | Correct CM and breakeven; clear pricing rationale. | CM under multiple price scenarios; LTV-lite reasoning. |
| **Honest messaging** | Vague or misleading claims. | Some specifics; some unsupported claims. | All claims supported; clean ethics check. | A/B-tested copy with rationale; resists clever-but-borderline phrasing. |
| **Feedback system** | One-time check; no documentation. | Ad-hoc feedback; partial revisions. | 1-week feedback loop with 3 documented changes. | Sustained loop plus signal-vs-noise analysis plus revision log. |

**CALIBRATION NOTE**

Score honestly. A "3" means the student met the standard the way an adult professional would. A "4" means they did something a working entrepreneur would be proud to show. Withhold "4" unless the work earns it.

SENSITIVITY AND FAMILY ENGAGEMENT

# What We Don't Ask. What We Always Frame.

Money is a tool, not a virtue. Some students live in households with credit-card debt, low or no banking access, or active financial stress. The curriculum is built so that none of those students is asked to disclose, perform, or apologize for their family situation.

## Rules of the room

- **Never ask about family money.** No questions about parents income, debts, accounts, or banking status.
- **Use neutral hypotheticals.** "For a sample family with a $4,000/month take-home" — not "your family."
- **Decouple wealth from worth.** Cash never says "everyone can be rich." Cash says "you will be a clearer thinker about money no matter what you end up doing."
- **Name systemic factors honestly.** Wage gaps, geography, and luck shape outcomes. The skill we build is the skill in the student hands.
- **Protect the venture.** A student Capstone is theirs. We don't require they share revenue or family contribution. The artifact is the work, not the bank account.

## Family engagement

Parents get one well-framed question per quarter — never a quiz, never a money-disclosure prompt. The default frame is curiosity ("What did you notice about your customers this week?"), not interrogation ("How much did you make?").

> *"Money is a tool. The question is not whether your family has a lot of it. The question is what you do with the moves we are practicing — interview, math, message, listen — wherever your starting line happens to be."*
>
> — CASH

ACTIVITY INDEX

# Ten Activities. One Notebook.

Every activity in this book is built to be done with a pencil, your own evidence, and the questions Cash keeps asking. Skip nothing. Date everything. Re-read in three months.

| No. | Activity | What you will do |
|---|---|---|
| **01** | Day 1 Customer Assumption | One sentence, one card. Don't try to be right; try to be specific. |
| **02** | Open vs. Leading Questions | Rewrite five leading questions into open ones. Practice on a partner. |
| **03** | Coding Patterns from Transcripts | Highlight surprises, frustrations, wishes. Tally them. Find the pattern. |
| **04** | Persona Pack v1 | Combine evidence into one specific person — name, behaviors, top frustration. |
| **05** | Variable Cost per Unit | From a real receipt, compute the cost per one of the thing you sell. |
| **06** | Contribution Margin Worksheet | Price minus variable cost. Decide if it covers your fixed costs. |
| **07** | Two-Message A/B Test | Two honest messages. Three-day test. Report the winner and why. |
| **08** | Persuasion vs. Manipulation Line | Sort 10 ad claims onto a line. Defend your placement. |
| **09** | 1-Week Feedback Loop | Collect, code, and act on feedback. Document three changes. |
| **10** | Final Capstone Defense | Five slides. Five minutes. Show the moves you made. |

**NOTEBOOK SETUP**

Get a single notebook for the whole year. Number every page. The first 5 pages are your Vocabulary Spine. The last 5 pages are your Day-1 Assumptions (you will come back to those). Everything in between is your work.

## Notebook checklist

- **Title page** — your name, your venture working-title, today's date.
- **Vocabulary spine** — 5 pages reserved for definitions you will add as we go.
-

**Customer notes** — one section for interview transcripts. Use direct quotes, with initials and dates.

- **Math section** — receipts taped in, per-unit computations, contribution margin scratch work.
- **Messaging section** — drafts of two-claim A/B tests, with what won and why.
- **Feedback log** — one page per week of your feedback system, with the three changes you made.

WORKED EXAMPLE

## Worked Example: Per-Customer Math at the Snack Stand

Devon sells protein cookies after school. He sells 30 cookies a week at $2.00 each. Revenue is $60. He spends $0.85 on each cookie (oats, peanut butter, packaging). His variable cost per cookie is $0.85.

Contribution margin per cookie = $2.00 - $0.85 = **$1.15**. His fixed cost (the table he rents from the school store) is $20/week. He needs **$20 / $1.15 = 18 cookies/week** just to cover the table. He's currently selling 30. He's clearing $14.50/week after fixed costs.

Devon's question to Cash: should he raise the price to $2.50? Cash answers with a question: "Which people, and how do you know? Run a 3-day test. Half the kids see $2.00. Half see $2.50. Tell me what they actually buy."

**WHAT TO COPY**

The move here is not the answer. It is the structure: specific number, specific person, specific decision. Use that pattern in your own venture this quarter.

> *"Most adults skip this. You won't. Pick one customer. Compute one number. Decide one thing." — Cash*

END-OF-QUARTER REFLECTION

# Four Quarters. Same Five Questions.

At the end of every quarter you will answer the same five questions. The answers should look different over time. Reread the previous quarter before you write a new one.

1. **Which people did you talk to this quarter, and what did they actually say?**

   Specific quotes, initials, dates. Resist the urge to summarize.
2. **What did you change in your venture because of evidence?**

   Name the change. Name the evidence that caused it.
3. **What is one number you know better now than three months ago?**

   Variable cost per unit. Contribution margin. Anything quantitative.
4. **What is a claim you made that you would take back?**

   Be honest. The claim does not have to be public. The honesty is the move.
5. **What would Cash ask you about all of this?**

   "Which people, and how do you know?" is always available. Find your own version.

> *"Reflection is not a feeling check-in. It is a memory tool. The you in three months wants to know what the you today learned. Write it down so future-you can use it."*
>
> — CASH

# One promise.

Cash to Company makes one promise: students who move through this program will be clearer thinkers about money and entrepreneurship — no matter what they end up doing for a living.

We do not promise wealth. We do not promise success. We promise clarity.

*"Customers are evidence, not assumptions."*

*— CASH, GRADE 7*
