a FlexLifeFi K-12 program

GRADE 8 · CASH VIDEO SCRIPTS

Eight Scripts. One Cash.

Hook, content arc, and a clean classroom CTA — 2:30–3:00 each.

Year theme: Measure, Improve, Operate Smarter

CONTENTS

What's Inside

01 Video 1 — "From Idea to Test" (Week 1, Unit 1 Launch)
02 Video 2 — "The Break-Even Truth" (Week 9, Unit 2 Launch)
03 Video 3 — "Marketing Is an Experiment" (Week 19, Unit 3 Launch)
04 Video 4 — "Operate Smarter" (Week 29, Unit 4 Launch)
05 Video 5 — "Personas Through the Funnel" (Week 6, Mid-Unit 1)
06 Video 6 — "What Could Your A/B Test Not Tell You?" (Week 26, Mid-Unit 3)
07 Video 7 — "Variance Is the Story" (Week 32, Mid-Unit 4)
08 Video 8 — "The Year-End Operate-Smarter Summary" (Week 36, Defense Day)
09 Production notes (for whoever animates these)
10 Video 1 — "From Idea to Test" — Upgrade
11 Video 2 — "The Break-Even Truth" — Upgrade
12 Video 3 — "Marketing Is an Experiment" — Upgrade
13 Video 4 — "Operate Smarter" — Upgrade
14 Video 5 — "Personas Through the Funnel" — Upgrade
15 Video 6 — "What Could Your A/B Test Not Tell You?" — Upgrade
16 Video 7 — "Variance Is the Story" — Upgrade
17 Video 8 — "The Year-End Operate-Smarter Summary" — Upgrade

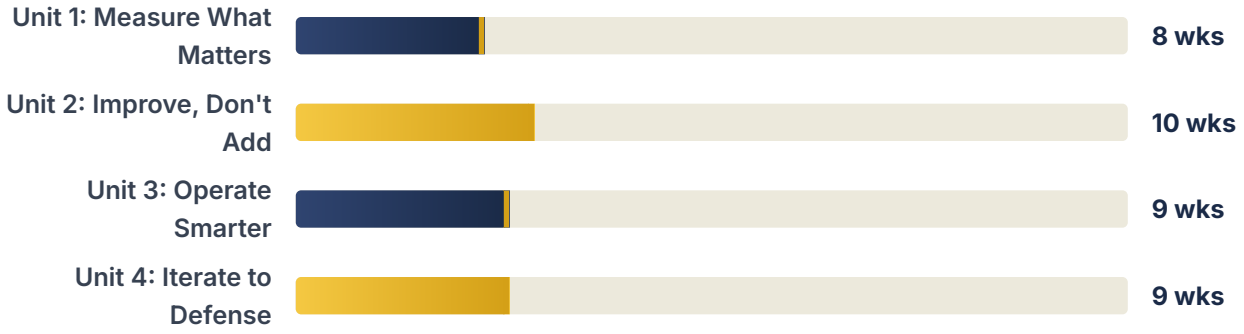
18 End-of-script Brand Stamp

YEAR-AT-A-GLANCE

Four Units. Thirty-Six Weeks. One Capstone.

The year is built as four units, each ending with a public-facing artifact that feeds the rolling Capstone. The bars show how the weeks are spent — roughly equal, with a slight lean toward the math-heavy unit because per-customer math is the load-bearing skill.

WEEKS PER UNIT · GRADE 8



Each unit closes with a checkpoint artifact. Final defense in Week 36.

36	4	10	8
WEEKS	UNITS	LESSONS	CASH VIDEOS

GRADE 8 · CASH VIDEO SCRIPTS

Eight Scripts. One Cash.

A little less wrong, every week.

Eight short videos, one per major Grade 8 milestone. Each script targets 2:30–3:00 finished runtime, ~350–420 spoken words. Scripts include a hook, content arc, and a CTA (call to action) that lands in a classroom assignment or journal prompt. Voice and personality follow the Cash Mascot Style Guide — curious, warm, honest, never flatters, never says "everyone can be rich."

Format conventions:

- **[VISUAL]** = animated visual cue.
- **CASH:** = spoken dialogue.
- **[SFX]** = sound effect or music cue.

Video 1 — "From Idea to Test" (Week 1, Unit 1 Launch)

"Listening is not a moment. It's a system."

— CASH

Runtime target: 2:50 **Strand mapping:** PSIG + LRCI + BAVC

[VISUAL: Cash on a stool with a small notebook. The classroom backdrop is warm and minimal. Behind Cash is a poster with five letters: P · D · S · A · ?]

CASH: Hey. Welcome to Grade 8. Quick check — last year, you spent the year on one question. Which people, and how do you know? That question still applies. Always will. But this year, we add a second one. What's your bet, and what would tell you you're wrong?

[VISUAL: The two questions appear, stacked.]

CASH: Here's why. Last year you learned who your customer is and how much each customer contributes. That's a lot. Most adults never do that. But knowing the customer isn't enough to run a business. You also have to make changes — and check whether the changes actually worked.

[VISUAL: A chalkboard split in half. Left side: "KNOW THE CUSTOMER" with a checkmark. Right side: "RUN A TEST" with a question mark.]

CASH: Here's a story I made up to be true. A kid runs a bracelet shop. They have ten regulars. They think — if I doubled the size, more people would buy. So they double the size. They lose money for two months. Why?

[VISUAL: Two bracelets, one normal, one double. A sad-looking cash register.]

CASH: Because doubling the size doubled the cost, but it didn't double the customers. The kid had an opinion. They didn't have a bet. A bet has a number in it. A bet has a metric.

[VISUAL: The word OPINION appears, then crosses out. The word BET appears, with three sub-bullets: "change · metric · target."]

CASH: This year, you'll learn techniques to invent options on purpose — SCAMPER, How Might We. You'll learn to compute break-even — the customer count where you stop losing money. You'll run a three-day A/B test on your marketing. You'll plan a four-week sprint and explain the gap when reality misses your plan. And you'll close the year with a full Plan-Do-Study-Act cycle.

[VISUAL: A circle of four labeled steps: PLAN · DO · STUDY · ACT.]

CASH: Here's the small move this week. Think about your venture. Maybe it's the same as last year. Maybe it's new. Write one sentence — not an opinion, a bet. The format is: if I changed this, this metric would move this much, because this. Be specific. Be wrong. Be in the game.

[VISUAL: A blank index card appears with the sentence frame.]

CASH: And one rule for the year. Variance is data. When your plan and your reality disagree — and they will — that gap tells you something. Don't hide it. Don't pretend it didn't happen. Write the gap. The gap is the most useful sentence you'll write all year.

[VISUAL: Two lines: one labeled PLAN, the other ACTUAL. The gap between them lights up with an arrow labeled VARIANCE.]

CASH: Most adults skip this. They run a business on opinions and never measure anything. You won't.

CTA: [VISUAL: Bold text on screen.] "Write your Day 1 Improvement Bet. One sentence. Specific. We'll see in Week 18 how it held up."

[VISUAL: Cash waves. Fade.]

Video 2 — "The Break-Even Truth" (Week 9, Unit 2 Launch)

Runtime target: 2:55 **Strand mapping:** MFL + BAVC

[VISUAL: Cash at a chalkboard with a single equation written on it: price × n = fixed + variable × n.]

CASH: Quick test. Two ventures, same neighborhood, same week.

[VISUAL: Two storefronts. Stand A: "Maya's Bracelets, $5 each." Stand B: "Jay's Tutoring, $20 a session."]

CASH: Maya charges five dollars per bracelet. Each bracelet costs her two dollars in beads and cord. She also pays a thirty-dollar Etsy fee every month. Question: how many bracelets does she have to sell before she stops losing money?

[VISUAL: The equation appears: 5n = 30 + 2n.]

CASH: Most adults guess. I dunno, ten? Twenty? You don't have to guess. You can solve it.

[VISUAL: The equation gets manipulated — 5n minus 2n equals 30, then 3n equals 30, then n equals 10.]

CASH: Ten bracelets. That's break-even. Below ten, she's losing money. Above ten, she's contributing to the rent.

[VISUAL: A graph appears. Two lines crossing at 10 — one for revenue, one for total cost.]

CASH: Here's the version of the formula that's most useful. Break-even equals fixed cost divided by contribution margin per unit. Thirty dollars divided by three dollars per bracelet equals ten bracelets. Same answer.

[VISUAL: The shortcut formula written cleanly: BE = FC ÷ CM/unit.]

CASH: Now Jay. Twenty dollars per session. Variable cost: two dollars in copies and a sticker. Fixed cost: forty dollars a month for a tutor-matching app. Contribution margin per session is eighteen dollars. Break-even is forty divided by eighteen — about two and a quarter sessions a month.

[VISUAL: Numbers appear: $40 ÷ $18 = ~2.22 sessions.]

CASH: Jay's break-even is way smaller than Maya's. Why? Because his contribution margin is huge. Each session contributes a lot. Her contribution margin is small. Each bracelet contributes a little. Different break-evens, different businesses.

[VISUAL: Two break-even graphs side by side. Maya's crosses at 10. Jay's crosses at 2 (rounded up to 3).]

CASH: Here's the move this week. Take your venture. Plug in your numbers — your price, your variable cost, your fixed cost. Solve for n. Write it down.

[VISUAL: A blank break-even worksheet appears.]

CASH: Then ask yourself the harder question. Which people are going to be those n customers, and how do you know? Because if your break-even is fifty per month, but you have evidence for ten — you have a problem to solve before you launch.

[VISUAL: The wall poster appears: "WHICH PEOPLE, AND HOW DO YOU KNOW?"]

CASH: Revenue is loud. Contribution margin is true. Break-even is the truth that tells you when the business stops bleeding.

CTA: "Compute your break-even using the linear-equation form. Bring it to Wednesday's work block. Be ready to defend the number."

[Fade.]

Video 3 — "Marketing Is an Experiment" (Week 19, Unit 3 Launch)

Runtime target: 2:50 **Strand mapping:** CBM + LRCI

[VISUAL: Cash sitting between two posters labeled A and B. Behind, a wall covered in marketing examples — some plain, some flashy.]

CASH: I want to talk about marketing. Specifically, the part that most adults get wrong.

[VISUAL: A character at a whiteboard writing slogans, crossing them out, writing more, getting frustrated.]

CASH: Here's the wrong move. You sit alone, you stare at the wall, you write twenty slogans, you pick the one you like, you go with it. That's not marketing. That's a vibe.

[VISUAL: The word VIBE appears in big letters, then deflates into a small "?".]

CASH: A vibe might be right. It might be wrong. You don't know. And neither does anybody who's not your customer.

[VISUAL: A row of customers, each shrugging.]

CASH: Marketing is an experiment. A real one. With two versions, one variable, a metric, and a count. Three days. That's all you need for your first test.

[VISUAL: A poster pair — Message A: "The brain food smart kids actually choose." Message B: "30 grams of protein. No crash at hour two."]

CASH: Same product. Same colors. Same size. The only thing that changes is the words. Then you put both posters where customers can see them — same wall, same hours — and you count which gets more votes.

[VISUAL: Two voting jars under the posters. Coins start dropping in over a 3-day timeline.]

CASH: Three rules. One — only one variable changes. If A and B have different colors AND different words, you don't know which mattered. Hold everything else equal.

[VISUAL: One variable highlighted; everything else greyed out.]

CASH: Two — define the metric before you start. Whichever gets more votes? Fine. Whichever feels better? Not fine. Feels better is a vibe.

[VISUAL: VOTES with a checkmark. FEELS with an X.]

CASH: Three — count, don't fudge. If A wins, A wins. If B wins, B wins. If they tie — that's a real result. Don't make up a winner.

[VISUAL: Three scoreboards: A wins, B wins, TIE.]

CASH: Here's what's harder than the rules. After you run the test, you have to write two sentences. Sentence one — who won, and by what number. Sentence two — what your test cannot tell you.

[VISUAL: Two sentence frames appear. "Message _ won by ." "My test cannot tell me whether ."]

CASH: That second sentence is what makes you a real entrepreneur. Adults who skip it look smarter for ten minutes and dumber for a year. The big bet of this year is that you'd rather be honest now and right later, than confident now and wrong later.

CTA: "This week, design your two posters. Write your hypothesis. Name one bias your test cannot eliminate. Bring all three Wednesday."

[Fade.]

Video 4 — "Operate Smarter" (Week 29, Unit 4 Launch)

Runtime target: 2:55 **Strand mapping:** OSO + LTO + ESL + LRCI

[VISUAL: Cash holding a calendar with four weeks marked: Week 29, 30, 31, 32. Below each week, a row of empty checkboxes.]

CASH: Last unit of the year. We're going to operate. Not imagine. Operate.

[VISUAL: The word OPERATE appears in plain block letters.]

CASH: Here's the move. You're going to write a four-week project plan for your venture. Five to eight milestones. Each milestone has an owner, a deadline, and what "done" looks like. Then you're going to actually run those four weeks. And then — and this is the harder part — you're going to track what actually happened against the plan.

[VISUAL: A plan with neat boxes, then a real-life version with some boxes ticked, some not, some half-done.]

CASH: That gap — between plan and actual — has a name. It's called variance. Variance is data. Most adults hide it. They hope you'll forget what they said three weeks ago. You won't be that adult.

[VISUAL: The word VARIANCE appears, with a label arrow: "the gap between plan and actual."]

CASH: Here's the rule. You're going to write a one-page variance explanation. Three things in it. What's the biggest gap? What caused it? What are you going to do about it?

[VISUAL: A one-page document with three labeled sections.]

CASH: And here's the rule about the rule. Variance isn't failure. Hidden variance is failure. A clean variance writeup outscores a "magic match" where actuals somehow happen to match plan exactly. Nobody believes that anyway.

[VISUAL: A teacher's red pen circling a plan that "magically" matched and writing "?" in the margin.]

CASH: While you're operating, two more things. One — peer feedback. You're going to pair up with a classmate and run a feedback round, both directions. Three questions: what's working, what's confusing, one change I'd try. You'll give those answers about their venture, and they'll give them about yours.

[VISUAL: Two characters trading folders. Each card labeled: "WORKING · CONFUSING · CHANGE."]

CASH: Two — privacy and safety. If your venture touches the internet, you're going to write a risk plan. One privacy risk, one safety risk, three steps to mitigate each. Most teen ventures online have predictable risks: a public name, an address in a shipping label, an account that someone else can guess into. Those aren't fears. They're things you can plan around.

[VISUAL: A risk-plan template appears with two boxes — Privacy and Safety — each with three numbered mitigation steps.]

CASH: And then — the year's biggest move. You're going to run one full Plan-Do-Study-Act cycle on your venture. Plan a small change. Do it. Study what happened. Act on what you learned.

[VISUAL: The PDSA circle appears, ticking through each quadrant.]

CASH: Here's the trick most adults miss. The point isn't to be right. The point is to be a little less wrong, every cycle.

[VISUAL: The phrase "A LITTLE LESS WRONG, EVERY WEEK" appears.]

CTA: "Draft your four-week project plan this week. Five to eight milestones. Owner, deadline, definition of done. Bring it Wednesday."

[Fade.]

Video 5 — "Personas Through the Funnel" (Week 6, Mid-Unit 1)

> *"Tell me what they actually said."*
>
> — CASH

Runtime target: 2:35 **Strand mapping:** CBM + PSIG

[VISUAL: Cash at a desk with a funnel-shaped diagram on the wall. At the wide top: "10 ideas." Narrowing: "3 finalists." At the point: "1 selected."]

CASH: Quick puzzle. You have ten ideas from SCAMPER. They're all kind of interesting. How do you pick one?

[VISUAL: Ten sticky notes on a wall. Cash points at them.]

CASH: Here's a wrong answer. Pick the one you like best. Why is that wrong? Because the question this year — and last year, and probably forever — is which people, and how do you know? The person who likes the idea is supposed to be your customer, not you.

[VISUAL: A character points at themselves; a "no" symbol appears.]

CASH: Here's a right answer. Pull out your customer persona — the one you built last year, or a new one this year. Read it. Then ask each idea three questions.

[VISUAL: A persona card appears next to the ten sticky notes.]

CASH: Question one. Does this idea solve something my customer actually said was a problem? Not what I imagine. What they said.

[VISUAL: A speech bubble with quote marks appears next to one of the sticky notes.]

CASH: Question two. Can my customer afford it, at the price I can charge? If your contribution margin is ten cents and your customer wants something for two dollars, you have a real conversation to have.

[VISUAL: A coin slot with a price tag.]

CASH: Question three. Can I run a small test on it in the next three weeks? If the answer is "I'd need a factory and a year," that's a future idea. Park it. Pick one you can test.

[VISUAL: A clock showing "3 weeks" with a checkmark.]

CASH: Score your ten ideas. The top three get to be finalists. Then — and only then — you pick one. With a reason. Written down.

[VISUAL: The funnel narrows. Ten ideas → three finalists → one selected, with a paragraph next to it.]

CASH: Here's the catch. The one you pick won't be the best one. It'll be the one with the most evidence. Big difference. Best is a vibe. Most evidence is a fact.

[VISUAL: Two trophies side by side. One labeled BEST (with a question mark), one labeled MOST EVIDENCE (with a check).]

CASH: And one more thing. Park your other two finalists. Don't throw them away. They're your Plan B and Plan C. If your evidence on the selected one breaks — and sometimes it will — those finalists are right there, waiting.

[VISUAL: A folder labeled "FINALIST PARK" with two cards inside.]

CTA: "Score your 10 ideas against your 3 criteria. Name your finalists. Pick one. Write the reason in 3 sentences. Bring it Friday."

[Fade.]

Video 6 — "What Could Your A/B Test Not Tell You?" (Week 26, Mid-Unit 3)

Runtime target: 2:40 **Strand mapping:** CBM + LRCI + ESL

[VISUAL: Cash standing between two posters. A funhouse mirror sits between them.]

CASH: Hard truth about A/B tests. They will lie to you. Or really, they'll let you lie to yourself.

[VISUAL: The mirror distorts both posters slightly.]

CASH: Here's a story. Two posters. Same product. One on the left wall by the cafeteria, one on the right wall by the library. After three days, the cafeteria poster has way more votes.

[VISUAL: Foot-traffic arrows show way more people walking past the cafeteria poster.]

CASH: Cafeteria wins! Right?

[VISUAL: A trophy hovers over the cafeteria poster, then a question mark appears over it.]

CASH: Except. The cafeteria gets fifteen times more foot traffic. More votes don't mean better message. It means more eyeballs.

[VISUAL: An "eyeball count" graph showing huge cafeteria traffic and small library traffic.]

CASH: That's a bias. A bias is something in your test that gives one side an unfair advantage. Every test has bias. The job isn't to eliminate it — that's impossible. The job is to name it.

[VISUAL: The word BIAS appears with bullets: "Position. Color. Time of day. Who's asking. What else is happening."]

CASH: Here's the move. Compute lift. Lift equals winner minus loser, divided by loser, times 100. So if A got twenty-five votes and B got twenty, lift is five divided by twenty, times one hundred — twenty-five percent.

[VISUAL: The lift formula shown step by step.]

CASH: Now the harder rule. Small samples don't tell you much. If your total votes are under thirty and your lift is under twenty percent — that's inconclusive. Your test cannot say.

[VISUAL: A "rough rule" box: "Total < 30 AND lift < 20% → INCONCLUSIVE."]

CASH: When the test is inconclusive, you don't make up a winner. You write that sentence — my test cannot tell whether A or B is better. And then you decide what to test next. Different sample. Different variable. Different question.

[VISUAL: A scoreboard showing a tie. Below it, the word NEXT.]

CASH: That sentence — my test cannot tell — that's what makes you a real entrepreneur. Most adults skip it. They look smarter for ten minutes and dumber for a year.

[VISUAL: Two characters in slow motion. One walks straight into a wall. The other checks the doorframe and walks through.]

CASH: Most great businesses run dozens of tests. Each one is small. Each one is honest. Each one teaches something. Nobody bats a thousand. Everybody who's any good — bats more often.

CTA: "After your test, write two sentences. Who won by what lift, and what your test cannot tell. Be honest about both."

[Fade.]

Video 7 — "Variance Is the Story" (Week 32, Mid-Unit 4)

Runtime target: 2:45 **Strand mapping:** OSO + LRCI + LTO

[VISUAL: Cash holding two clipboards. One labeled PLAN, one labeled ACTUAL. Each shows a list of milestones with checkmarks and X marks.]

CASH: Here's a thing nobody told me when I was in eighth grade. The most useful sentence in business isn't here's what I did. It's here's the gap between what I said I'd do and what I actually did.

[VISUAL: The two clipboards align. The differences light up.]

CASH: That gap has a name. Variance.

[VISUAL: The word VARIANCE appears.]

CASH: Real example. A kid plans to interview five customers in Week 1 of a sprint. They actually interview one. Negative four variance. Most adults would hide that. They'd hope nobody asks. They'd say "I worked really hard."

[VISUAL: A character behind a desk shrugging, then quickly turning the page.]

CASH: That's the wrong move. The right move is to write the variance down and explain it. I planned five interviews. I did one. The gap is four. The cause is — soccer practice ate Tuesday and Wednesday, and the customer pool I picked is hardest to reach during that window.

[VISUAL: A neat one-page document with three sections: GAP, CAUSE, NEXT.]

CASH: Now you have something. You have data on yourself. You also have a next move — change the customer pool, or move the interview slot to Monday and Friday.

[VISUAL: An arrow points from CAUSE to NEXT, labeled "the move."]

CASH: Here's the rule. Variance isn't failure. Hidden variance is failure. A clean writeup of I missed by four and here's why outscores a fake I hit my plan exactly every single time.

[VISUAL: Two report cards. One says "+4" — green check. The other says "0 — perfect" — red question mark.]

CASH: And here's the part that matters most. Three categories of variance. Schedule — done at a different time. Scope — did more or less than planned. Quality — finished but not at planned quality. Different categories need different responses.

[VISUAL: Three columns: SCHEDULE · SCOPE · QUALITY. Each with a small example.]

CASH: While you're at it, here's another thing. Peer feedback. Pair up. Three questions, both directions. What's working, what's confusing, one change I'd try.

When you're getting feedback, listen for the kernel of truth. When you're giving it — be specific, be kind, and don't soften so much that the feedback disappears.

[VISUAL: Two characters trading feedback cards. One card highlighted: "ONE CHANGE I'D TRY."]

CASH: And one rule about peer feedback. The point isn't to be right about your partner's venture. It's to be useful. The most useful feedback names a specific thing. I'm confused about what your customer actually needs is useful. Looks great is not.

CTA: "This week, fill out your variance template. Pair with a classmate for the feedback round. Both directions. Bring both Friday."

[Fade.]

Video 8 — "The Year-End Operate-Smarter Summary" (Week 36, Defense Day)

Runtime target: 3:00 **Strand mapping:** All eight

[VISUAL: Cash at a slightly different desk — a more grown-up setup. A simple muted-color panel sits behind. The classroom is gone.]

CASH: Okay. Last one. We made it.

[VISUAL: A timeline appears, with checkpoints marked: Week 1, Week 8, Week 18, Week 28, Week 36.]

CASH: Honest moment. You probably didn't make money this year. You probably didn't sell anything. You probably didn't end the year with a launched venture.

[VISUAL: A cash register with no money in it.]

CASH: And that's the win.

[VISUAL: The cash register fades. A notebook appears with notes, sketches, charts, crossed-out plans.]

CASH: Because here's what most people who start businesses skip — and they regret it later. They skip the part where they invent options on purpose. They skip the math that tells them when the business pays for itself. They skip the test that tells them whether the marketing actually works. They skip the plan with a variance column. They skip the cycle that makes them less wrong each time. They jump.

[VISUAL: A character running and falling off a small cliff.]

CASH: You didn't jump. You ran SCAMPER. You wrote a How Might We. You picked a finalist with criteria. You wrote a break-even equation in linear-equation form. You built

a sensitivity table. You ran a three-day A/B test with a stated hypothesis and a named bias. You computed lift. You wrote my test cannot tell me whether — out loud, on paper. You built a four-week plan. You tracked variance. You ran a Plan-Do-Study-Act cycle. You wrote a privacy and safety risk plan. You traded peer feedback in both directions.

[VISUAL: Each of these appears as a checkpoint on the year's timeline, ticking off as Cash names it.]

CASH: Those things — invent, model, test, plan, learn — those are the moves. They are the moves of every operating business that lasts. They are the moves you missed in school for years before this year. And now they're yours.

[VISUAL: The checkpoints become a small toolkit icon labeled "OPERATE-SMARTER KIT."]

CASH: Five things I want you to remember. One. Ideas are products of process. Don't wait for inspiration. Run SCAMPER and a How Might We. Two. Break-even is a number you can compute. When you don't know one, compute one. Three. Marketing is an experiment. Run a test before you run a campaign. Four. Variance is the story. The gap between plan and actual is where the learning lives. Five. A little less wrong, every cycle. That's the method.

[VISUAL: Five lines appear, one at a time, each with a small icon.]

CASH: And I want to ask you one more time. The question that started last year and runs through this one. Which people, and how do you know? Hold onto it. Use it on yourself. Use it on the next venture. Use it when an adult tries to sell you something. Use it forever.

[VISUAL: The wall poster appears one more time.]

CASH: Today is your defense. Walk the panel through your idea, your math, your test, your variance, your risk plan, your PDSA cycle. Be honest about what you don't know yet. Use the words. Use the evidence. Don't sell. Show.

[VISUAL: A panel of three faceless silhouettes appears, each with a clipboard.]

CASH: Whether you start a real venture next year or not, you've already done something most adults haven't. You've practiced the operating moves. You've practiced naming the gap. You've practiced asking — every time, about everything — which people, and how do you know?

CTA: [VISUAL: A simple line of text.] "Go give your defense. We'll see you in Grade 9 — where you build the canvas."

[Cash waves. A simple "Cash to Company" logo appears. Fade.]

Production notes (for whoever animates these)

> *"You don't have to know everything. You have to know one number."*
>
> — CASH

- **Energy:** Cash is calm and curious, not hyper. No exclamation-heavy shouting. The tone is more "thoughtful older sibling" than "TV presenter."
- **Visuals:** Animation should feel hand-drawn or paper-cutout, not slick 3D. Style should signal "we made this with care, not a marketing budget."
- **Music:** Sparse. Light underscore at most. Silence is fine.
- **Captions:** Always on. Some students learn through reading. Captions are not optional.
- **Length discipline:** Keep within 30 seconds of target runtime. Cut content rather than rush delivery — the slower pace is part of the brand.
- **Cross-grade callbacks:** When Cash says "last year," the visual should briefly reference the Grade 7 customer-persona poster or contribution-margin worksheet. Continuity matters.
- **The recurring poster:** "WHICH PEOPLE, AND HOW DO YOU KNOW?" must appear in Videos 1, 5, 6, and 8 minimum. It's the program's spine question.

UPGRADE LAYER (added by Brand & SMM Director, 2026-04-25)

6-8 cross-script conventions apply: **"Most adults skip this. Watch."** opener, Slow Lean, twist structure, mandatory Shorts cut.

Video 1 — "From Idea to Test" — Upgrade

- **NEW HOOK:** [VISUAL: A glittery business idea card. Cash holds it. Then puts it next to a stopwatch.] **CASH:** "Most adults skip this. Watch. They love the idea. They never test the idea."
- **Shareable Cash line:** "An idea that hasn't been tested is just a feeling."
- **9-second Shorts cut:** Idea card → stopwatch → "Test in 7 days. Or it's just a feeling."
- **Classroom CTA:** Riskiest Assumption + 7-day test plan. Bring it Friday.

Video 2 — "The Break-Even Truth" — Upgrade

- **NEW HOOK:** [VISUAL: A graph climbing. The line crosses the X axis. Cash points.] **CASH:** "Most adults skip this. Watch. The graph's about to cross. THAT'S the moment."
- **Shareable Cash line:** "Break-even is the moment your business stops bleeding."
- **9-second Shorts cut:** Graph crossing → big text "BREAK-EVEN: 47 customers/month."
- **Classroom CTA:** Compute YOUR break-even number. Defend it. Bring it Wednesday.

Video 3 — "Marketing Is an Experiment" — Upgrade

- **NEW HOOK:** [VISUAL: Two posters with two different headlines on a school bulletin board. A QR-tally underneath each.] **CASH:** "Most adults skip this. Watch. They write ONE ad. Then they wonder why."
- **Shareable Cash line:** "Marketing is a guess until you put it on a wall and count."
- **9-second Shorts cut:** Two posters → tally → winner reveal.
- **Classroom CTA:** Run a 3-day, 2-message A/B test on a real surface. Bring data Wednesday.

Video 4 — "Operate Smarter" — Upgrade

> *"Being wrong on Day 1 is the deal."*
>
> — CASH

- **NEW HOOK:** [VISUAL: Same store. Tuesday: chaos. Friday: smooth.] **CASH:** "Most adults skip this. Watch. Same store. Different week."
- **Shareable Cash line:** "Smarter operations don't look impressive. They look quiet."
- **9-second Shorts cut:** Chaos / smooth reveal → "Operate smarter. Look boring. Win."
- **Classroom CTA:** One process you'll standardize this month. Bring SOP draft Friday.

Video 5 — "Personas Through the Funnel" — Upgrade

- **NEW HOOK:** [VISUAL: A funnel labeled top → middle → bottom. Three different personas dropped into each level.] **CASH:** "Most adults skip this. Watch. Different stages. Different person."
- **Shareable Cash line:** "The same person at the top of your funnel is a different person at the bottom."
- **9-second Shorts cut:** Funnel split-screen → three stages of customer.

- **Classroom CTA:** Map your funnel: top, middle, bottom. Name the persona at each stage. Bring it Wednesday.

Video 6 — "What Could Your A/B Test Not Tell You?" — Upgrade

- **NEW HOOK:** [VISUAL: A test-result card with "A WINS!" Cash flips it over. The back says "but A was on the bigger wall."] **CASH:** "Most adults skip this. Watch. The result is right. The conclusion is wrong."
- **Shareable Cash line:** "Don't make up a winner. Decide what to test next."
- **9-second Shorts cut:** Card flip reveal of bias.
- **Classroom CTA:** Two sentences. Who won. What your test couldn't tell you.

Video 7 — "Variance Is the Story" — Upgrade

- **NEW HOOK:** [VISUAL: Two columns of numbers — budget vs. actual. Cash highlights the variance column.] **CASH:** "Most adults skip this. Watch. The numbers are not the story. The DIFFERENCES are."
- **Shareable Cash line:** "Variance is the story your business is trying to tell you."
- **9-second Shorts cut:** Budget vs. actual highlight → variance column glows → "The story is in the gap."
- **Classroom CTA:** Compute one variance this week. Write the story behind it. Bring it Friday.

Video 8 — "The Year-End Operate-Smarter Summary" — Upgrade

- **NEW HOOK:** [VISUAL: A kid at defense day shows a process map with labeled time savings.] **CASH:** "Most adults skip this. Watch. They didn't pitch a business. They pitched a system that runs without them."
- **Shareable Cash line:** "You ran the numbers. You built the system. You operated smarter."
- **9-second Shorts cut:** Defense moment → time-savings reveal → year-end fade.
- **Classroom CTA:** Defense Day. Show the variance + the SOP + the funnel.

End-of-script Brand Stamp

[VISUAL: Cash to Company logo. **"Most adults skip this. You won't."**]

ABOUT THE HOST

Cash, in five words

curious · warm · honest · patient · specific

"I'm Cash. I don't promise wealth. I don't promise success. I promise that the moves — interview, math, message, listen — will make you a clearer thinker about money no matter what you end up doing."

— CASH

What Cash does

- **Asks questions that point to evidence.** Cash never tells; Cash asks what your evidence says.
- **Names rules sparingly.** "An assumption is something you think is true without checking. Evidence is something you observed, heard, or counted."
- **Tells short, made-up-but-realistic stories.** 30–60 seconds, shows don't tell.
- **Celebrates the move, not the win.** Revision, honesty, and evidence — not revenue.
- **Hedges deliberately.** probably, often, sometimes — never absolutes about complex topics.

What Cash never does

- Flatter ("amazing!", "great job!"), promise wealth, moralize about money.
- Reference real brands or living celebrities as endorsements.
- Surface family financial details. (Hypothetical scenarios only.)
- Pretend the world is fair. Cash is honest about systemic factors without becoming a politics class.

> *When in doubt, work one of these into the script: Which people, and how do you know? · Being wrong on Day 1 is the deal. · Revenue is loud. Contribution margin is true. · A little less wrong, every week.*

STRAND OUTCOMES

Eight Strands. One Year. Verifiable Outcomes.

Cash to Company runs the same eight strands K-12. Each year deepens the demonstration. The Grade 8 version of each strand is below.

Code	Strand	Grade 8 demonstrated outcome
BAVC	Business Awareness and Value Creation	Identify a business problem, propose a value-creation hypothesis, and revise it with customer evidence.
PSIG	Problem Solving and Idea Generation	Generate, screen, and refine ideas; document why one was chosen and the others were not.
MFL	Money and Financial Literacy	Compute revenue, variable cost, contribution margin, and breakeven for a real product or service.
CBM	Customers, Branding, Marketing	Build a persona from interview evidence; design honest messaging; A/B test two claims.
OSO	Operations, Systems, Organization	Design a simple weekly operating cadence with named roles, handoffs, and a feedback loop.
LTO	Leadership, Teamwork, Ownership	Run and document a team meeting; resolve one disagreement using shared evidence.
ESL	Ethics, Safety, Legal Awareness	Identify the line between persuasion and manipulation; flag one borderline claim and rewrite it honestly.
LRCI	Launch Readiness and Continuous Improvement	Pilot, measure, and document at least three iterations with rationale and what changed.

STANDARDS ALIGNMENT

Six Benchmarks This Year

Standards are cited at the benchmark level. Honest gaps are named when they exist.
The Capstone artifact addresses each one.

Benchmark	What students must demonstrate
Jump$tart 6 (Financial Decision Making) 8-1	Identify the components of decision-making and apply them to financial decisions.
CCSS-Math 8.SP.A.1	Construct and interpret scatter plots for bivariate measurement data.
CCSS-ELA SL.8.4	Present claims and findings, emphasizing salient points in a focused, coherent manner.
C3 D2.Eco.5.6-8	Explain ways in which money facilitates exchange.
CASEL Responsible Decision-Making	Demonstrate curiosity and open-mindedness; analyze information.
CCSS-Math 7.RP.A.3	Use proportional relationships to solve multistep ratio and percent problems.

HOW TO READ THIS TABLE

Each lesson cites at least one of these benchmarks. Each Capstone checkpoint addresses two or more. The Teacher Guide includes a per-lesson standards crosswalk.

"Standards aren't a cage. They're a list of moves you're going to be glad you can make. Pick one. Practice it. Move on."

— CASH

CAPSTONE RUBRIC (4-POINT)

How We Score the Capstone

The Capstone artifact is scored on four traits, each on a 4-point scale. Honest, specific, decision-oriented work earns the high marks. Generic or assumption-laden work earns the low ones.

Trait	1 — Emerging	2 — Developing	3 — Proficient	4 — Advanced
Evidence quality	Mostly assumptions; few or no quotes.	2-3 interview quotes; partial evidence.	5+ direct quotes; varied sources; coded patterns.	Triangulated quotes plus behavioral observation; counter-evidence acknowledged.
Per-customer math	Confused costs; no contribution margin.	CM computed but with errors; one price scenario.	Correct CM and breakeven; clear pricing rationale.	CM under multiple price scenarios; LTV-lite reasoning.
Honest messaging	Vague or misleading claims.	Some specifics; some unsupported claims.	All claims supported; clean ethics check.	A/B-tested copy with rationale; resists clever-but-borderline phrasing.
Feedback system	One-time check; no documentation.	Ad-hoc feedback; partial revisions.	1-week feedback loop with 3 documented changes.	Sustained loop plus signal-vs-noise analysis plus revision log.

CALIBRATION NOTE

Score honestly. A "3" means the student met the standard the way an adult professional would. A "4" means they did something a working entrepreneur would be proud to show. Withhold "4" unless the work earns it.

SENSITIVITY AND FAMILY ENGAGEMENT

What We Don't Ask. What We Always Frame.

Money is a tool, not a virtue. Some students live in households with credit-card debt, low or no banking access, or active financial stress. The curriculum is built so that none of those students is asked to disclose, perform, or apologize for their family situation.

Rules of the room

- **Never ask about family money.** No questions about parents income, debts, accounts, or banking status.
- **Use neutral hypotheticals.** "For a sample family with a $4,000/month take-home" — not "your family."
- **Decouple wealth from worth.** Cash never says "everyone can be rich." Cash says "you will be a clearer thinker about money no matter what you end up doing."
- **Name systemic factors honestly.** Wage gaps, geography, and luck shape outcomes. The skill we build is the skill in the student hands.
- **Protect the venture.** A student Capstone is theirs. We don't require they share revenue or family contribution. The artifact is the work, not the bank account.

Family engagement

Parents get one well-framed question per quarter — never a quiz, never a money-disclosure prompt. The default frame is curiosity ("What did you notice about your customers this week?"), not interrogation ("How much did you make?").

> *"Money is a tool. The question is not whether your family has a lot of it. The question is what you do with the moves we are practicing — interview, math, message, listen — wherever your starting line happens to be."*
>
> — CASH

ACTIVITY INDEX

Ten Activities. One Notebook.

Every activity in this book is built to be done with a pencil, your own evidence, and the questions Cash keeps asking. Skip nothing. Date everything. Re-read in three months.

No.	Activity	What you will do
01	Day 1 Customer Assumption	One sentence, one card. Don't try to be right; try to be specific.
02	Open vs. Leading Questions	Rewrite five leading questions into open ones. Practice on a partner.
03	Coding Patterns from Transcripts	Highlight surprises, frustrations, wishes. Tally them. Find the pattern.
04	Persona Pack v1	Combine evidence into one specific person — name, behaviors, top frustration.
05	Variable Cost per Unit	From a real receipt, compute the cost per one of the thing you sell.
06	Contribution Margin Worksheet	Price minus variable cost. Decide if it covers your fixed costs.
07	Two-Message A/B Test	Two honest messages. Three-day test. Report the winner and why.
08	Persuasion vs. Manipulation Line	Sort 10 ad claims onto a line. Defend your placement.
09	1-Week Feedback Loop	Collect, code, and act on feedback. Document three changes.
10	Final Capstone Defense	Five slides. Five minutes. Show the moves you made.

NOTEBOOK SETUP

Get a single notebook for the whole year. Number every page. The first 5 pages are your Vocabulary Spine. The last 5 pages are your Day-1 Assumptions (you will come back to those). Everything in between is your work.

Notebook checklist

- **Title page** — your name, your venture working-title, today's date.
- **Vocabulary spine** — 5 pages reserved for definitions you will add as we go.
-

Customer notes — one section for interview transcripts. Use direct quotes, with initials and dates.

- **Math section** — receipts taped in, per-unit computations, contribution margin scratch work.
- **Messaging section** — drafts of two-claim A/B tests, with what won and why.
- **Feedback log** — one page per week of your feedback system, with the three changes you made.

WORKED EXAMPLE

Worked Example: Measure What Matters

Priya runs a tutoring micro-business helping 6th graders with pre-algebra. She has eight regular clients. Five say they would recommend her. Three would not. Her old metric was "hours billed." Her new metric: "would recommend."

The new metric tells a different story. Two of her three non-recommenders share the same complaint: "Sessions feel like quizzes." Priya redesigns the first 10 minutes of every session to start with what the student is stuck on, not what Priya wants to teach. Three weeks later: 7 of 8 would recommend.

What changed? Not effort. Not skill. The metric. "Would recommend" surfaced the experience. Hours billed surfaced nothing.

WHAT TO COPY

The move here is not the answer. It is the structure: specific number, specific person, specific decision. Use that pattern in your own venture this quarter.

> *"Most adults skip this. You won't. Pick one customer. Compute one number. Decide one thing." — Cash*

END-OF-QUARTER REFLECTION

Four Quarters. Same Five Questions.

At the end of every quarter you will answer the same five questions. The answers should look different over time. Reread the previous quarter before you write a new one.

1. **Which people did you talk to this quarter, and what did they actually say?**

   Specific quotes, initials, dates. Resist the urge to summarize.
2. **What did you change in your venture because of evidence?**

   Name the change. Name the evidence that caused it.
3. **What is one number you know better now than three months ago?**

   Variable cost per unit. Contribution margin. Anything quantitative.
4. **What is a claim you made that you would take back?**

   Be honest. The claim does not have to be public. The honesty is the move.
5. **What would Cash ask you about all of this?**

   "Which people, and how do you know?" is always available. Find your own version.

> *"Reflection is not a feeling check-in. It is a memory tool. The you in three months wants to know what the you today learned. Write it down so future-you can use it."*
>
> — CASH

One promise.

Cash to Company makes one promise: students who move through this program will be clearer thinkers about money and entrepreneurship — no matter what they end up doing for a living.

We do not promise wealth. We do not promise success. We promise clarity.

"A little less wrong, every week."

— CASH, GRADE 8
