GRADE 10 · CASH VIDEO SCRIPTS

Eight Scripts. One Cash.

The legal, financial, and operational chassis under every venture.

10

Eight short videos, one per major Grade 10 milestone. Each script targets 2:30–3:00 finished runtime, ~350–420 spoken words. Scripts include a hook, content arc, and a CTA (call to action) that lands in a classroom assignment or journal prompt. Voice and personality follow the Cash Mascot Style Guide — at the 9-12 band, Cash builds multi-sentence arguments, uses precise vocabulary (premortem, unit economics, runway, jurisdiction), and is willing to name systemic factors directly. Cash never flatters, never promises wealth, never says "everyone can be rich," "boss up," "easy money," "amazing," or "just believe."

WITH CASH - GRADE 10 SCRIPT SET

"Eight scripts, one Cash. Each ends in a CTA you can teach Wednesday."

Format conventions:

- **[VISUAL]** = animated visual cue.
- **CASH:** = spoken dialogue.
- **[SFX]** = sound effect or music cue.

SCRIPT

Video 1 — "What Kind of Thing Is This?" (Week 1, Unit 1 Launch)

> "What would have to be true for you to be wrong?"
>
> - CASH, GRADE 10

GRADE 10 · 2:30–3:00 · CASH VOICE

Runtime target: 2:50 **Strand mapping:** BAVC + LRCI

VISUAL Cash, a coin-shaped character with a friendly face, sitting on a stool with a small notebook. Behind them, four small windows: one labeled HOBBY, one SIDE HUSTLE, one SMALL BUSINESS, one STARTUP.

CASH: Hey. I'm Cash. Welcome to Grade 10. We're going to spend the year on the parts of business adults usually pretend don't exist until you're older — what kind of thing a venture actually is, how it gets funded, how it's owned, and what laws apply.

VISUAL The four windows light up one at a time as Cash names them.

CASH: Here's the first move of the year. Most adults, when they hear the word business, picture one thing — somebody behind a counter, ringing up a sale. That's not enough. Businesses come in at least four shapes, and the shape changes everything else.

VISUAL Four icons appear — a hobbyist painting, a side hustler with a laptop and a coffee, a small-business owner in a storefront, a startup team in a co-working space.

CASH: A hobby is something you do for the doing. The money, if there is any, is incidental. A side hustle is a venture you run alongside a primary income — nights, weekends, supplemental dollars. A small business is the operator's primary income, usually serving a local or specific market, not built to scale. A startup is a venture explicitly designed to scale — to grow large, often on outside capital, often with the founder's full time.

VISUAL Each definition appears as Cash speaks it, with one distinguishing word highlighted: incidental, supplemental, primary, scale.

CASH: Here's the trick. The category isn't about the activity. The same activity — selling cookies, tutoring math, walking dogs — can be a hobby, a side hustle, a small business, or a startup. The activity doesn't tell you. The structure around it does. Intent. Time commitment. Funding. Whose income depends on it.

VISUAL A cookie appears in all four windows, labeled differently in each.

CASH: This matters because every other decision this year depends on it. Funding looks different for each. Structure looks different. Compliance looks different. The risks look different. If you can't name what kind of thing your venture is, you can't compare it to anything.

VISUAL A blank index card with the prompt "MY CAPSTONE IS A ___ BECAUSE ___ AND ___."

CASH: Your move this week is small. Pick a category for your Capstone. Write one sentence. Two reasons. Don't worry about being right — worry about being specific. Most students change category at least once during the year. Being wrong on Day 1 is the deal. It's how you find out what kind of thing you actually built.

VISUAL Cash holds up a hand.

CASH: And here's a rule that runs through the whole year. We don't ask about your family's money. Not what they earn, not what they spend, not what they owe. The Capstone is yours. Hypotheticals are fine. Real talk about real family finance lives at home, with your family — not here.

VISUAL Bold text on screen.

CLASSROOM CTA

"Write your Day 1 Categorization. One sentence, two reasons. We'll see how it survives in eight weeks."

[Cash waves. Fade.]

SCRIPT

Video 2 — "Every Dollar Comes With Strings" (Week 9, Unit 2 Launch)

GRADE 10 · 2:30–3:00 · CASH VOICE

Runtime target: 2:55 **Strand mapping:** MFL

VISUAL Cash at a desk with three envelopes: BOOTSTRAP, LOAN, FRIENDS-AND-FAMILY.

CASH: Here's a thing nobody tells you about money for a venture. Every dollar comes with strings. Some are obvious. Some are quiet. Some are the kind that don't show up until something goes wrong, and then they're the only thing that matters.

VISUAL The three envelopes float up. Each has visible threads attached, of different colors.

CASH: Three sources, three sets of strings. First — bootstrap. You use your own savings. The string here is opportunity cost. The money you put in could have done something else — earned interest in a savings account, paid for textbooks, sat there in case of an emergency. There's no interest payment, no contract, no relationship risk. But your savings are at risk if the venture fails. Real risk. Quiet string.

VISUAL The bootstrap envelope opens; a dollar bill goes in, but a small clock icon appears beside it labeled "OPPORTUNITY COST."

CASH: Second — a loan. From a bank, an SBA program, a credit union. The string is interest. You pay back principal plus interest at an agreed rate over an agreed term. The bank doesn't get a vote in your business, but they do expect payments on time. Higher APR, more total cost. Longer term often means lower monthly payment but more total interest. The math is the math; learn it once.

VISUAL The loan envelope opens; principal flows in, interest flows out as monthly payments. A small calculator pops up showing APR math.

CASH: Third — friends-and-family money. Your aunt, your neighbor, somebody who knows you. The string here is the one that snags hardest if anything goes wrong. The money is often cheap in interest. It's never cheap in relationship. A handshake F&F deal that goes sideways doesn't just cost you the money — it costs you Thanksgiving. A written F&F note isn't bureaucracy; it's a kindness, to both sides.

VISUAL The F&F envelope opens; a friendly face appears on the dollar but a faint thread connects it to a Thanksgiving table icon.

CASH: Here's the move you'll make this unit. Take a hypothetical $3,000 venture. Compare all three sources. Run the APR math on the loan. Estimate the opportunity cost of the bootstrap. Read a sample F&F note and translate three clauses into plain English. Then write a one-paragraph recommendation memo defending one source.

VISUAL A spreadsheet appears with three columns: BOOTSTRAP · LOAN · F&F. Empty rows: COST · CONTROL · RISK · RECOVERY.

CASH: And here's the question you'll keep asking. Which dollar costs the least in dollars? Which costs the least in control? Which costs the least in relationships? They're rarely the same answer. Choosing well means knowing which kind of cost you can most afford to pay.

CLASSROOM CTA

"This week — find one real loan APR in the wild. A credit card mailer, an auto-loan ad, an SBA quote in the news. Bring it Wednesday. We'll do the math together."

[Fade.]

SCRIPT

Video 3 — "Structure Is a Tool" (Week 19, Unit 3 Launch)

GRADE 10 · 2:30–3:00 · CASH VOICE

Runtime target: 2:50 **Strand mapping:** OSO + ESL + CBM

VISUAL Cash standing between two doorways. One labeled SOLE PROP. One labeled LLC. Each has a different kind of fence around it.

CASH: Let me tell you about structure. Not buildings — business structure. The legal shape of the thing you're running. Most teenagers I've met think this is bureaucracy adults made up to slow them down. It isn't. Structure is a tool. The right tool for the right venture protects what's worth protecting and doesn't waste effort on what isn't.

VISUAL A line of business types — sole prop, partnership, LLC, S-corp, C-corp — appears, each labeled with cost, complexity, and liability indicators.

CASH: Here's the spectrum. On the simplest end, sole proprietorship. You and the business are legally the same person. Zero filing in most places, except maybe a local license. Your taxes are easier. But here's the trade — you and the business are also the same legally for risk. If somebody sues the business, they sue you. Your savings, your house, your car — exposed.

VISUAL A sole-prop sign. A pretend lawsuit arrow flies past it and hits a person directly.

CASH: On the more-protected end, the LLC. Limited Liability Company. You file articles with your state. You draft an operating agreement. You pay an annual fee — varies a lot by state. You open a separate bank account. You keep the business finances and your personal finances apart, like apart-apart. In return, the LLC stands between a lawsuit and your personal assets. If something goes wrong, only the business's assets are exposed. Mostly. The veil only holds if you respect it.

VISUAL An LLC sign with a fence. A lawsuit arrow hits the fence and stops; the person behind is unharmed.

CASH: Beyond the LLC, you can elect to be taxed as an S-corp, which can save self-employment tax above a certain income — that's a Grade 11 conversation, mostly. Or you can incorporate as a C-corp, which is the standard for venture-funded startups. Each has tradeoffs. Each has costs. Each has paperwork.

VISUAL The S-corp and C-corp doors appear briefly, then dim — saved for later years.

CASH: Here's the rule that runs through this whole unit. Structure isn't status. Forming an LLC doesn't make you a real entrepreneur. Staying a sole prop doesn't make you a small one. The right structure depends on the venture — its scale, its risk profile, its operations — not on the founder's ego.

VISUAL An ego balloon deflates. The text "RIGHT TOOL, RIGHT JOB" appears.

CASH: And the line you'll hear me draw all year. We're learning the categories and the tradeoffs. We're not deciding what you should form. Decisions about real ventures involve a real lawyer and a real accountant — not Cash, not your teacher, not a curriculum. We're building literacy. The decisions live somewhere else.

CLASSROOM CTA

"This week — for three sample ventures, run the sole-prop-vs-LLC comparison. Then run it on your Capstone. Bring your reasoning Friday — not a verdict, but the reasons."

[Fade.]

SCRIPT

Video 4 — "A Premortem Is Cheaper Than a Postmortem" (Week 29, Unit 4 Launch)

GRADE 10 · 2:30–3:00 · CASH VOICE

Runtime target: 2:55 **Strand mapping:** PSIG + LRCI + ESL

VISUAL Cash standing in a hospital scene. Two doctor figures. One holding a chart. Cash points at the second doctor.

CASH: Here's a story about two doctors. Two doctors look at the same patient. The first asks, "How can we treat them?" The second asks, "Imagine they died — what killed them?" That second question seems morbid, almost rude. But the second doctor is the one who catches the deadly thing — the allergy nobody flagged, the medication interaction nobody checked, the symptom nobody asked about. The second doctor is doing a premortem.

VISUAL The word PREMORTEM appears. Beneath it, a definition: "Imagine the failure before it happens. List every reason."

CASH: A premortem in business is the same move. Before you launch, you sit down and pretend it's a year from now and the venture failed. Then you list every reason. Out of money. No customers. The co-founder dropped out. The compliance issue you didn't see. The product wasn't safe. The pivot came too late. The pivot came too early. Whatever you can imagine.

VISUAL A grid of failure reasons appears: NO CUSTOMERS · CASH OUT · CO-FOUNDER LEFT · LICENSE ISSUE · UNSAFE · PIVOTED LATE · PIVOTED EARLY.

CASH: The point isn't to scare you. The point is that risks you can name are risks you can do something about. Risks you don't name run the show.

VISUAL A spotlight finds a previously-hidden risk in a corner.

CASH: The discipline of a premortem is the order. First, generate broadly. List every reason without filtering. Silly, scary, boring — they all count. Most students stop at three. Push to ten. The tenth one is often the one you didn't want to admit you were worried about.

VISUAL Sticky notes get added one at a time, going from 3 to 10. Number 10 is highlighted.

CASH: Then, and only then, rank. Of your list, which three are most likely to actually happen? Mark them with likelihood and impact, on a 1-to-5 scale. Then mitigate. For each top-three risk, name one specific action you can take now to reduce it.

VISUAL Three risks lift to the top of the list. Each gets a mitigation card attached: a specific named action.

CASH: Here's where most adults get this wrong. They mitigate before they generate. They jump to "I'll work harder" or "I'll get more customers." That's not a mitigation. That's a feeling. A real mitigation is specific. I'll secure a customer pool by Week 2 by interviewing five people, not two. Or I'll set aside one month of operating expenses in a separate account before I take any owner draw. Specific action. Specific timing. Checkable.

VISUAL A vague mitigation ("I'll work harder") gets crossed out. A specific one ("Interview 5 people by Friday") replaces it.

CASH: And one more thing. The most useful premortem is the one you do before you've fallen in love with the venture. You'll think you're being negative. You're being responsible. The job isn't to talk yourself out of it. The job is to know what you're walking into.

CLASSROOM CTA

"This week — generate ten failure reasons for your Capstone. Rank top three. Write specific mitigations. Act on one of them by Friday."

[Fade.]

SCRIPT

Video 5 — "When a Hobby Becomes a Side Hustle" (Week 4, Mid-Unit 1)

GRADE 10 · 2:30–3:00 · CASH VOICE

Runtime target: 2:35 **Strand mapping:** BAVC

VISUAL Cash holding a sketchbook in one hand and a laptop with an Etsy storefront in the other.

CASH: Quick puzzle. A 16-year-old paints portraits of pets. They've done it for fun for three years. Their mom shares one on social media. Suddenly, two people from work want to commission one. The 16-year-old says yes. They get $80 each. Six months later, they're doing two commissions a month at $100 each. They have an Instagram for it. They have a list of supplies they reorder. They've made $1,200 this year.

VISUAL A sketchbook becomes a small Instagram feed becomes a recurring supply list.

CASH: Question. Is this still a hobby, or is it a side hustle? Argue both sides for 30 seconds in your head before I give you the answer.

VISUAL Two columns appear — one labeled "STILL HOBBY," one labeled "NOW SIDE HUSTLE." Two characters argue.

CASH: Here's the answer most curriculums won't give you. There isn't one right answer — there's a threshold question. Did the intent change? Are they doing it now because they love it, or because they're trying to earn? Are they making decisions to grow it — pricing more

deliberately, planning their supply orders, scheduling their time around commissions? If the answer is yes, it crossed into side hustle. If the answer is no, it's still a hobby that happens to make money.

VISUAL A scale tips between intent on one side and money on the other.

CASH: **Why does this matter? Because the rules change. Most jurisdictions have a threshold — sometimes $400, sometimes $600, sometimes by tax year — at which the IRS considers self-employment income reportable. Some hobbies cross into side-hustle tax treatment without the artist realizing. That's not advice — it's literacy. The rules are real even when nobody's checking yet.**

VISUAL A small "REPORTABLE INCOME?" question mark appears with hedge text "RULES VARY — CHECK YOURS."

CASH: **Here's the practical move. When a venture is shifting category, write down the threshold. "It becomes a side hustle when I'm doing it primarily to earn, when I'm spending more than X hours a week, when I cross Y in revenue, or when I'm making business decisions to grow it." Pick one or two of those. Hold yourself to them.**

VISUAL A whiteboard with the four thresholds listed; the student circles two.

CASH: **And one more thing. There's nothing wrong with staying a hobby on purpose. Hobbies are excellent. The world has too few of them and too many burned-out side hustles that should've stayed hobbies. The wrong mistake is to slide between categories without noticing — that's where structure problems come from later.**

CLASSROOM CTA

"This week, write down the thresholds at which your hobby would become a side hustle. Two thresholds. Specific. Bring them Friday."

[Fade.]

SCRIPT

Video 6 — "The Quiet Cost of Borrowing" (Week 13, Mid-Unit 2)

GRADE 10 · 2:30–3:00 · CASH VOICE

Runtime target: 2:40 **Strand mapping:** MFL + LRCI

VISUAL Cash at a chalkboard with a loan amortization schedule slowly filling in.

CASH: I want to talk about the part of borrowing that doesn't show up in the headline number. The APR is loud. The total interest is quieter. And the part that's almost completely silent — until it isn't — is what changes when something goes wrong.

VISUAL A 6% APR in big bold letters. Then the same number with smaller text behind it: "TOTAL INTEREST OVER LIFE OF LOAN."

CASH: Here's the math you already know. A $5,000 loan at 6% APR over 24 months costs about $318 in total interest. The same loan at 12% costs about $649. At 22%, about $1,220. The headline difference is the rate. The real difference is the dollars at the end.

VISUAL Three loans line up, each with their total-interest dollar amount.

CASH: But here's the part nobody talks about. The APR you're quoted assumes you pay on time. Every time. What happens if you miss a payment?

VISUAL A calendar. A payment date is missed. A small red flag appears.

CASH: Late fees show up. Sometimes $25, sometimes $35, sometimes more. The late payment may get reported to credit bureaus, which lowers your credit score. A lower credit score means the next loan you take — for an apartment, for a car, for a future business — costs more. The cost compounds across loans you don't even have yet.

VISUAL A series of dominoes — late payment, credit score drop, next loan rate higher.

CASH: And if you default — meaning you stop paying altogether — the consequences depend on whether the loan is secured (backed by something they can take, like equipment) or unsecured. Either way, default is expensive. The money is still owed; collections agencies get involved; your credit takes a multi-year hit; and in some cases, the lender can come after personal assets if you signed personally.

VISUAL The word DEFAULT appears with a series of consequences — collections, credit damage, asset exposure.

CASH: That's why structure matters here too. A loan made personally to you — even for the business — exposes your personal assets if the business can't pay. A loan made to the LLC, properly maintained, exposes only the LLC's assets. Mostly. Lenders sometimes ask for personal guarantees on small-business loans, especially for new ventures. Read the paperwork. Know what you're signing.

VISUAL A magnifying glass moves across "PERSONAL GUARANTEE" in fine print.

CASH: None of this means don't borrow. It means borrow with both eyes open. The right loan at the right rate for the right venture is a useful tool. The wrong loan at the wrong rate for the wrong venture can take years to dig out from. The difference is whether you did the math first.

CLASSROOM CTA

"Find a real loan offer this week. Compute total interest. Identify whether it's secured or unsecured. Identify whether it requires a personal guarantee. Bring your findings Wednesday."

[Fade.]

SCRIPT

Video 7 — "What the Bracelet Stand Forgot" (Week 23, Mid-Unit 3)

> "I don't know either. That's why we test."
>
> - CASH, GRADE 10

GRADE 10 · 2:30–3:00 · CASH VOICE

Runtime target: 2:45 **Strand mapping:** OSO + LTO

VISUAL Two students at a farmers-market booth selling bracelets. Smiling.

CASH: Imagine two students — call them Aisha and Riley — start a custom-bracelet stand at a Saturday farmers market. They're best friends. The venture works. Year one, they make $4,000 in profit. They split it 50/50. Both are happy.

VISUAL A chart showing $4,000 split into two equal stacks.

CASH: Year two, things shift. Aisha is in her senior year and applying to college. She stops showing up to the booth. She still does the marketing — the Instagram, the email list — but Riley is at the booth every Saturday from 7 a.m. to 3 p.m., alone. By August, Riley does ninety percent of the work. By the end of the year, the venture has made $5,500 in profit.

VISUAL The booth shows only Riley most weekends. The chart now shows $5,500.

CASH: Question. Should they still split it 50/50?

VISUAL The two stacks of money pause mid-split.

CASH: Aisha says yes — they agreed to that, and her marketing brought in customers Riley wouldn't have reached. Riley says no — she did the actual labor. Both are right. Both are angry. The friendship breaks. The venture closes.

VISUAL A "CLOSED" sign appears on the booth.

CASH: **Here's what could have prevented it. A piece of paper. Specifically, an operating agreement — even a one-page one, even a homemade one — with five clauses. Roles. Decision rules. Money handling, including how distributions get paid and on what schedule. What happens when one person reduces their commitment. What happens when one person wants to exit.**

VISUAL A 1-page agreement appears with the five clauses listed.

CASH: **None of those clauses would have fixed the situation by themselves. Aisha was always going to apply to college. Riley was always going to want recognition for the labor. But the agreement would have given them a place to revisit when things changed. It would have said "if a member's contribution drops below X, the split adjusts to Y." Or "distributions are based on hours logged plus ownership percentage." Or "a member who wants to step back gives 60 days' notice and we renegotiate."**

VISUAL Each clause animates, with arrows pointing to specific situations from the story it would have addressed.

CASH: **The agreement isn't bureaucracy. It isn't a sign of distrust. It's a tool that lets a partnership handle the changes that always come. Most partnerships that fail aren't betrayed. They're just unprepared. They didn't write down what would happen when the world shifted under them — and the world always shifts.**

VISUAL The closed booth gets a new sign: "CLOSED — UNPREPARED, NOT BETRAYED."

CASH: **Most adults skip this. You won't.**

CLASSROOM CTA

"This week — fill in the roles clause and the money-handling clause for your hypothetical Capstone partnership. Specific. Bring them Friday."

[Fade.]

SCRIPT

Video 8 — "Vision and the Captured Pushback" (Week 36, Final)

GRADE 10 · 2:30–3:00 · CASH VOICE

Runtime target: 2:50 **Strand mapping:** LTO + LRCI

VISUAL Cash at a small podium, a closed notebook in front of them. The classroom is empty — a year-end feel.

CASH: **Last video of the year. I want to talk about two things that matter more than anything else you did. Vision. And what you do with pushback.**

VISUAL The notebook opens to a 1-page vision statement on the left side, a "PUSHBACK CAPTURED" page on the right.

CASH: **A vision statement is short. Sixty words or fewer. It says what your venture exists to do, who it's for, and what success looks like in twelve months. Not a slogan. Not a tagline. It's the thing that reminds the team why, when they've forgotten.**

VISUAL A whiteboard with three lines being filled in: "EXISTS TO ___ · FOR ___ · SUCCESS LOOKS LIKE ___."

CASH: **Most adults write vision statements that say nothing. "To revolutionize the industry through innovation." That's a sentence shaped like a vision with zero information. Try this instead. Specific noun. Specific customer. Specific success metric. "In twelve months, our T-shirt operation exists to give middle-school sports teams affordable gear they're proud to wear, with three local schools as recurring customers and break-even by month nine." That's a vision. You can argue with it. You can measure it.**

VISUAL The vague version fades; the specific version brightens.

CASH: **Now the harder part. You're going to defend your vision in front of a panel. They'll ask questions. Some friendly. Some probing. Some landing on the weakest part. "What if**

your three schools use a different vendor by launch?" "How do you hit break-even by month nine if variable cost rises ten percent?"

VISUAL Panel members appear. Each asks a question with a thought bubble. The thought bubbles land on the vision statement and dent it.

CASH: **The temptation, when you get pushback, is to defend. To explain. To make the questioner understand why they're wrong about the thing they pushed on. That's the move that makes you smaller every year you make it. The bigger move is to capture.**

VISUAL A capture page on the right side of the notebook fills in. Each pushback gets two lines: "RESPONSE IN THE MOMENT" and "WHAT I'D ACTUALLY CHANGE."

CASH: **Capture means writing it down. Not the version that won the argument. The version that would change the vision if you took the pushback seriously. Most pushbacks deserve that. The ones that don't, you mark with a note about why. The ones that do, you revise.**

VISUAL The vision statement gets a small revision based on captured pushback. The revision is minor but real.

CASH: **Here's the move that separates a Grade 10 student from an adult winging it for fifteen years. The student captures pushback honestly. The adult deflects. Every meeting, every interview, every venture will test this. Get good at it now.**

VISUAL Cash closes the notebook. A subtle "Year 10" stamp appears on the cover.

CASH: **You'll meet adults who skipped this part and got lucky. Don't model your career on luck. Model it on the moves. Categorize. Compare. Structure. Premortem. Comply. Vision. Capture pushback. Revise. A little less wrong, every week. That's the whole game.**

CLASSROOM CTA

"In your final defense, capture two pieces of pushback in writing. Don't argue them in your head. Write them down. Decide later. That's the move."

[Cash gives a small nod. Fade.]

SCRIPT

Notes for production

- **Voice talent direction:** 9-12 Cash builds full multi-sentence arguments and is willing to be slightly philosophical at moments — but never preachy, never moralizing. Calm pacing. Conversational warmth. Never sing-song.
- **Visual aesthetic:** matches the K-12 program — warm-but-not-slick, hand-drawn or paper-cutout feel, muted palette, no neon. At 9-12 the visuals can be slightly more sophisticated (charts that would make sense in a magazine, diagrammatic transitions) but never lose the "made with care, not a marketing budget" feel.
- **CTA enforcement:** every script ends with a clear, classroom-actionable CTA tied to a specific lesson activity. Reviewers should reject any draft where the CTA is generic ("think about it!").
- **Forbidden phrases (per Mascot Style Guide):** never include "amazing," "boss up," "everyone can be rich," "easy money," "just believe," "anyone can be a millionaire," "the sky's the limit," "if you can dream it you can do it." Reviewers reject any draft containing these.
- **Hedge discipline:** when Cash names a rule that varies by jurisdiction (sales tax, LLC fees, threshold for reportable income), Cash includes a hedge — "rules vary," "check yours," "this is educational, not advisory." That hedge is non-negotiable in 9-12 Cash voice.

UPGRADE LAYER (added by Brand & SMM Director, 2026-04-25)

9-12 cross-script conventions apply: **"Quick check-in"** Slow-Lean opener, caption-on, twist + concrete number, both 9-sec and 60-sec cut suggestions.

AN INTERLUDE · GRADE 10

"Most adults skip this step. You won't."

the band's working assumption.

2

SCRIPT

Video 1 — "What Kind of Thing Is This?" — Upgrade

- **NEW HOOK:** [VISUAL: Three boxes labeled SOLE PROP / LLC / S-CORP. Cash points at each one and asks "is yours...?"] **CASH:** "Quick check-in. The first decision isn't what you sell. It's what KIND of thing your venture is."
- **Shareable Cash line:** "Structure is the first decision. Most adults make it last."
- **9-second Shorts cut:** Three boxes → arrow into one → "Pick before you launch."
- **60-sec cut:** when each structure makes sense, with one liability example.
- **Classroom CTA:** Pick a structure for your venture. Defend the choice. Bring it Wednesday.

SCRIPT

Video 2 — "Every Dollar Comes With Strings" — Upgrade

- **NEW HOOK:** [VISUAL: A dollar bill with strings hanging off it. Cash tugs one — a tax. Tugs another — equity. Tugs another — a covenant.] **CASH:** "Quick check-in. Every dollar of funding has strings. The strings are the actual deal."
- **Shareable Cash line:** "It's not the dollar. It's the strings."
- **9-second Shorts cut:** Dollar with strings → string labels reveal → "Loan. Equity. Grant. All different strings."
- **Classroom CTA:** Compare 3 funding options for your venture. Map the strings on each.

SCRIPT

Video 3 — "Structure Is a Tool" — Upgrade

- **NEW HOOK:** [VISUAL: A toolbox. Cash pulls out: contract, NDA, terms, privacy policy.] **CASH:** "Quick check-in. Structure isn't paperwork. Structure is the toolbox that keeps the work safe."
- **Shareable Cash line:** "Structure protects the work. Sloppy structure ends the work."
- **9-second Shorts cut:** Toolbox open → tools in use → "Tools, not paperwork."

- **Classroom CTA:** Identify the ONE legal/structural document your venture needs. Draft a 1-page version. Bring it Friday.

>
> - CASH, GRADE 10

- **NEW HOOK:** [VISUAL: A funeral for a business that hasn't launched yet. Cash sits in front, taking notes.] **CASH:** "Quick check-in. Imagine the funeral. Then prevent it. That's a premortem."
- **Shareable Cash line:** "A premortem is cheaper than a postmortem."
- **9-second Shorts cut:** Funeral scene → notebook → "Imagine the failure. Prevent it."
- **Classroom CTA:** Run a 15-min premortem with your team. List 5 ways this could die. Mitigation for each.

SCRIPT

Video 5 — "When a Hobby Becomes a Side Hustle" — Upgrade (Note: rename — Cash should use "side venture")

- **NEW HOOK:** [VISUAL: A kid drawing for fun. Then someone offers them money. Cash leans in.] **CASH:** "Quick check-in. The line you're about to cross is not obvious. Watch."
- **Shareable Cash line:** "A hobby and a venture are different things. The line is contracts, not feelings."
- **9-second Shorts cut:** Drawing → money offer → "Hobby vs. venture: when does it cross?"
- **Note to animator:** even though G10 students will recognize "side hustle," Cash uses side venture in voiceover (per Style Guide hustle-bro avoidance). Title can say either.
- **Classroom CTA:** Write 3 questions you'd need answered before turning a hobby into a venture.

SCRIPT

Video 6 — "The Quiet Cost of Borrowing" — Upgrade

- **NEW HOOK:** [VISUAL: A loan amount of $1,000. Then 12 months pass. The number quietly grows.] **CASH:** "Quick check-in. The cost of borrowing is the cost you don't see at the start."
- **Shareable Cash line:** "Interest is the quietest line item. And the costliest."
- **9-second Shorts cut:** $1000 → 12 months → $1,200 reveal → "Compounding is doing the math while you're not looking."
- **Classroom CTA:** Compute the true cost of a $500 loan at 18% APR for 12 months.

SCRIPT

Video 7 — "What the Bracelet Stand Forgot" — Upgrade

- **NEW HOOK:** [VISUAL: A successful bracelet stand. Then a missing receipt. Then a tax letter.] **CASH:** "Quick check-in. They made money. They didn't keep records. Now they have a problem."
- **Shareable Cash line:** "Records aren't optional. They're how the money stays yours."
- **9-second Shorts cut:** Stand → missing receipt → IRS letter → "Records or regret."
- **Classroom CTA:** Set up a 3-folder records system: revenue, expenses, contracts. Bring screenshots Friday.

SCRIPT

Video 8 — "Vision and the Captured Pushback" — Upgrade

- **NEW HOOK:** [VISUAL: A vision statement. Then five sticky notes labeled "PUSHBACK" stuck around it.] **CASH:** "Quick check-in. A vision without captured pushback is a daydream. Vision PLUS pushback is a plan."
- **Shareable Cash line:** "A vision without captured pushback is a daydream."
- **9-second Shorts cut:** Vision + 5 sticky notes → "Capture the pushback. Then decide."
- **Classroom CTA:** Write your year-end vision. Capture 5 pushbacks. Address each one.

ENDNOTES & STANDARDS

Citations and alignment

Grade 10 cites 3-6 standards across CCSS, Jump$tart, CEE, CASEL, and C3 frameworks. Detailed alignment lives in the master Standards Alignment Map.

1. **Jump$tart Coalition Personal Finance Standards (2021 ed.).** Spending and Saving; Credit and Debt; Employment and Income; Investing; Risk Management and Insurance; Financial Decision Making.
2. **Council for Economic Education (CEE).** Voluntary National Content Standards in Economics.
3. **CCSS-ELA, Grades 11-12.** W.11-12.1, W.11-12.4, SL.11-12.1, SL.11-12.4, RST.11-12.7.
4. **CCSS-Math.** N-Q.1-3 (Reasoning with Quantities), S-IC (Statistics & Inferences), F-IF (Functions), MP.4 (Modeling).
5. **CASEL Core Competencies.** Self-Awareness, Self-Management, Social Awareness, Relationship Skills, Responsible Decision-Making.
6. **C3 Framework for Social Studies State Standards.** Dimension 2 (Economics, Civics) at the high-school grade band.
7. **NGSS-ETS Engineering Practices.** ETS1 (Engineering Design) for the test-and-iterate spine of the year.
8. **Cash to Company Master Scope & Sequence.** 13 grades x 8 strands x 36 weeks; outcomes quoted verbatim from _master/00_Master_Scope_and_Sequence.md.
9. **Cash Mascot Style Guide.** 9-12 voice rules: multi-sentence arguments; vocabulary includes unit economics, runway, premortem, MVP; never flatters, never promises wealth.
10. **Sensitivity protocol.** No probing of family finances; financial scenarios framed as hypothetical for a sample household, business, or scenario.

One promise.

Cash to Company makes one promise: students who move
program will be clearer thinkers about money and entrepren
matter what they end up doing for a living.

We do not promise wealth. We do not promise success. We pro
