GRADE 10 · CURRICULUM BOOK

The Year, Architect

The legal, financial, and operational chassis under every venture.

10

Year theme: Ownership structure, money, and compliance **Grade band:** 9-12 (high school) **Total instructional time:** ~36 weeks · 2–4 periods per week (depending on schedule) **Anchor mascot:** Cash, the program's animated host (in 9-12 voice — multi-sentence arguments)

WITH CASH - 9-12 VOICE

"Some of this is hard because the world's hard. The skill is knowing what's in your hands."

Why this year

YEAR ARC - PROJECT INTENSITY BY UNIT

Intensity = student artifacts produced + cash-flow stakes + team interdependence.

> **"Profit is an opinion. Cash is a fact."**
>
> - CASH, GRADE 10

Sixteen-year-olds are starting to brush up against the parts of business adults usually pretend don't exist until later. They have friends with side hustles selling on Depop and Etsy and Whatnot. They see relatives running cash-only businesses. They notice the difference between someone who "has a business" and someone who "is a registered LLC." They are starting to ask, often quietly, what's the actual structure under all this?

Grade 10 answers that question with the directness it deserves. The year teaches the moves under the surface of every venture: what kind of thing is this (hobby, side hustle, small business, startup), how does it get funded, how is it owned, what is owed to whom, and what laws and rules apply. We don't moralize about it. We don't tell students to start an LLC or warn them off one. We teach them the categories, the tradeoffs, and the questions to ask. By June, a Grade 10 student should be able to read a business and tell you what kind of thing it

is, how it's structured, where the money came from, where the liability sits, and what rules it has to follow.

This is the year the Grade 9 muscle gets a backbone. Grade 9 taught organized problem-solving — the Business Model Canvas, customer discovery, a simple P&L, an MVP test. Grade 10 takes that intact and asks the harder, stranger question: now what kind of business is this, on paper? And: whose risk is whose? The answers shape everything Grade 11 builds on top — leadership, sales, execution under cash constraints.

The pedagogy stays the same. Concrete before abstract. Evidence not assumptions. The year's spine question — which people, and how do you know? Show me the evidence. — runs through ownership work the same way it ran through customer work. Who exactly are you partnering with? Show me the operating agreement. Whose money is at risk? Show me the contract. Which jurisdiction's rules apply? Show me where you looked it up.

The big ideas (Understanding by Design — Stage 1)

These are the year's load-bearing understandings. Every unit, lesson, and assessment can be traced to one or more.

1. **Not every venture is a business, and not every business is a startup.** "Hobby," "side hustle," "small business," and "startup" are different things with different math, different risks, and different commitments. Naming the category matters before anything else.
2. **Funding isn't free; every dollar comes with strings.** Bootstrap savings, a small loan, a friends-and-family round, a credit card — each has different costs (interest, dilution, social risk, legal risk) and different control implications. You can compare them.
3. **Ownership structure is a tool, not a status symbol.** Sole proprietorship, partnership, LLC, S-corp, C-corp — each is a tradeoff among cost, liability, complexity, and tax treatment. The right structure depends on the venture, not the founder's ego.
4. **A vision survives contact with people only if it's written down.** A shared vision lives in a paragraph everyone can read, not in someone's head.
5. **Compliance is a feature, not an obstacle.** Licensing, sales tax, ID-required products, age limits, and PII protection are part of how a real business stays alive. Skipping them isn't faster; it's slower with extra steps.
6. **A premortem is cheaper than a postmortem.** Before launch, asking "if this fails in a year, what killed it?" surfaces risks while you can still do something about them.

Essential questions (returned to all year)

- Hobby, side hustle, small business, or startup — and how do I know?

- Whose money is at risk, and how much?
- If two people start a thing together, how do they decide together — and how do they leave?
- What kind of legal structure fits this venture, and why?
- Which laws and rules apply, and where do I look that up?
- If this fails in a year, what's the most likely cause — and what would I do about it now?

Year-at-a-glance

The year is four units. Each unit ends with a public-facing artifact that feeds the rolling Capstone — the Structured Venture Brief — students refine across the year.

Unit	Weeks	Title	Big idea	Anchor artifact (Capstone Checkpoint)
1	1–8	What kind of thing is this?	Hobby/side hustle/ small business/startup are different things.	**Categorization Pack** — 4 real ventures categorized with evidence + a 1-paragraph case for what your Capstone is.
2	9–18	Money in, money out, on whose terms	Every dollar comes with strings.	**Funding Comparison Pack** — bootstrap vs. loan vs. F&F comparison for a sample venture, with a recommendation memo.
3	19–28	Who owns what, and how do we decide?	Structure is a tool; agreements make it real.	**Operating Agreement Pack** — completed 2-person operating agreement template + sole-prop-vs-LLC analysis + 1-page brand guide.
4	29–36	Premortem and the month-in-review	Compliance is a feature; a premortem is cheaper than a postmortem.	**Compliance + Vision Pack** — premortem ranked top 3 risks + month-in-review on 5 metrics + 3-minute vision pitch + revision list.

The Capstone — the Structured Venture Brief — threads all four units. Students start by categorizing their venture, then layer funding analysis, ownership structure, brand identity, premortem, compliance map, and a vision pitch. The final Capstone is a 5-minute defense plus a written brief, scored on the Business Plan rubric and the Pitch Presentation rubric from the Rubric Bank.

The eight strand outcomes (verbatim from Master Scope)

Grade 10 is the tenth row of the K-12 grid. Every outcome below is quoted exactly from the Master Scope and Sequence — never paraphrased.

- **BAVC.** I can explain the difference between a hobby, a side hustle, a small business, and a startup, using 4 real-world examples with evidence.
- **PSIG.** I can take an idea and stress-test it with a "premortem" (assume it failed in 1 year — list every reason) and rank the top 3 risks.
- **MFL.** I can compare three ownership/funding sources (bootstrap savings, small loan, friends-and-family) using interest, control, and risk as criteria — and recommend one for a sample business.
- **CBM.** I can build a 1-page brand guide (name, tagline, two-color palette, one font, one voice rule) for my venture and explain each choice.
- **OSO.** I can complete a basic operating agreement template (roles, decisions, money handling, exit) for a 2-person teen partnership and explain each clause.
- **LTO.** I can draft a 1-page vision statement for my venture, defend it in a 3-minute pitch, and capture pushback into a revision list.
- **ESL.** I can identify the right business structure (sole prop, LLC) for a sample venture using cost, liability, and complexity, and explain why.
- **LRCI.** I can run a "month in review" using 5 metrics (revenue, customers, cost, time spent, satisfaction) and propose two changes for next month.

Standards alignment (cited at benchmark level)

> **“Some of this is hard because the world's hard. The skill is knowing what's in your hands.”**
>
> - CASH, GRADE 10

Grade 10 centers the following benchmarks (drawn verbatim from the Standards Alignment Map):

- **Jump$tart Standard 2 (Credit and Debt), Benchmark 12-3:** Compare sources of consumer credit — extended to small-business funding sources.
- **Jump$tart Standard 5 (Risk Management and Insurance), Benchmark 12-1:** Identify risks in life and how to manage them — applied to business-structure liability.

- **CEE Standard 4 (Using Credit), Grade 12:** Borrowing money usually involves repaying both the principal and the interest.
- **CCSS-Math A-SSE.B.3 / F-IF.C.8:** Choose and produce equivalent forms — used in funding-source comparison spreadsheets.
- **CCSS-ELA W.9-10.1:** Write arguments to support claims with valid reasoning — defending a vision statement.
- **C3 D2.Eco.10.9-12:** Use current data to explain the influence of changes in spending, production, and the money supply on various economic conditions.
- **CASEL Responsible Decision-Making:** Considering ethical responsibility.
- **Honest gap (named):** Premortem is a Klein-style decision-quality tool, not in any K-12 framework. We teach it because it works.

AN INTERLUDE · GRADE 10

"Which people, and how do you know?"

the program's spine question.

1

Vocabulary roadmap (22 weight-bearing terms)

Vocabulary is layered. Each unit introduces 5–7 new terms; old ones are recycled. Students keep a Vocabulary Spine in their notebook (a single index list that grows all year). Frayer entries are built for italicized "weight-bearing" terms.

Unit 1 — categorization vocabulary: hobby, side hustle, small business, startup, scalable, evidence threshold, intent.

Unit 2 — funding vocabulary: bootstrap, principal, interest (APR), friends-and-family round, dilution (intro), control, opportunity cost.

Unit 3 — structure and brand vocabulary: sole proprietorship*, LLC**,** S-corp **(intro),** operating agreement**, member, manager, pass-through taxation,** liability*, brand guide, tagline, voice rule.

Unit 4 — compliance and review vocabulary: premortem*, business license**,** sales tax**,** PII∗, jurisdiction, vision statement, month-in-review, leading vs. lagging metric.

Roadmap total: 22 weight-bearing terms across the year. Recycled vocabulary from Grade 9 (BMC, MVP, P&L, COGS, gross margin, runway) is recycled in workbook prompts and assumed live by week 3.

Anchor texts and case set

Mix of short readings, case studies, and one or two carefully chosen longer pieces. Nothing requires purchase; school-friendly substitutes provided where possible.

- **Four-business case set (provided in program assets).** A profile each of: a hobby (a teen who paints commission portraits 4 times a year for fun), a side hustle (a college student running an SAT-tutoring service evenings and weekends), a small business (a family-run hot-sauce company with a storefront), and a startup (a venture-backed mental-health app with 14 employees). Used for categorization work in Unit 1 and revisited every unit.
- **Excerpt from The Founder's Dilemmas (Noam Wasserman).** A 2-page teacher-mediated summary of the chapter on co-founder splits, used in Unit 3 to ground the operating-agreement work in real founder stories.
- **One LLC operating agreement (template, redacted).** Provided in program assets. Used as the source text for the agreement-clause analysis lesson.
- **One sample loan term sheet and one F&F note (templates, fictional).** Provided in program assets. Used in Unit 2 for the funding comparison.

- **Two short founder origin stories.** Recommended: Sara Blakely (Spanx — bootstrapped sole prop early, restructured later) and a small-business owner local to the school (interviewed by a teacher or older student — an authentic Cash to Company tradition).
- **Two ad and product-page pairs.** One compliant (clear claim, terms visible, returns easy), one borderline (ambiguous claims, missing terms). Used in Unit 4 compliance lesson.
- **Eight Cash videos** (one per major Grade 10 milestone — see Video Scripts file).

Project arc — the Structured Venture Brief (Capstone)

Students (or pairs) develop one venture across the year. The venture can be real, simulated, or hypothetical. Across the four units, students:

- **End of Unit 1 (Week 8) — Categorization Pack.** Categorize 4 real-world ventures (hobby/side hustle/small business/startup) with written evidence; write a 1-paragraph case for what their Capstone is, with the evidence that supports the call. Graded on a custom analytic rubric (provided).
- **End of Unit 2 (Week 18) — Funding Comparison Pack.** Compare bootstrap, small loan, and friends-and-family funding for a sample venture. Build a comparison spreadsheet (interest cost, control implication, risk to relationships). Write a 1-paragraph recommendation. Graded on the Budget Project rubric (Rubric Bank).
- **End of Unit 3 (Week 28) — Operating Agreement Pack.** Complete a 2-person operating agreement template (roles, decisions, money handling, exit). Layer a sole-prop vs. LLC analysis (cost, liability, complexity). Add a 1-page brand guide (name, tagline, two-color palette, one font, one voice rule). Graded on the Business Plan rubric.
- **End of Unit 4 (Week 36) — Compliance + Vision Pack + Final Defense.** Premortem ranked top 3 risks. Compliance map (license, sales tax, ID-required products if any, age limits, PII). Month-in-review on 5 metrics. 1-page vision statement defended in a 3-minute pitch with a captured pushback list. Graded on the Pitch Presentation rubric and the Reflection Writing rubric.

Optional pivot windows in Weeks 9, 19, and 29 allow venture switches if evidence demands it.

Assessment philosophy

We assess two things at every checkpoint:

1. **Did the student do the work the standard names?** Did they actually compare funding sources, with numbers? Did they actually fill in an operating agreement, clause by clause? Did they actually map the compliance items?

2. **Did the student think about it?** Can they explain the tradeoffs? Can they say what would change their mind?

Analytic rubrics from the Rubric Bank are the spine. Holistic scoring is allowed only on Cash-video reflections and exit tickets. The Final Defense uses the Pitch Presentation rubric (all 6 criteria) plus the Reflection Writing rubric for the captured pushback list.

A common pitfall to avoid: grading the Capstone on whether the venture would "really work." It might. It might not. Neither should drive the grade. The grade reads for evidence and reasoning quality, not market viability.

Differentiation in Grade 10

> **"Which people, and how do you know?"**
>
> - CASH, GRADE 10

- **ELL.** This is the heaviest legal-vocabulary year in the curriculum. Provide a translated glossary (Spanish at minimum; expand to your roster) for the 22 weight-bearing terms. Cognates help: sole proprietorship → propietario único, liability → responsabilidad, license → licencia, partnership → sociedad. Allow native-language reasoning during pair work; require English on filed artifacts. Sentence frames provided for every checkpoint (in the Activity Book).
- **IEP/504.** The legal-document work favors students who can sit with dense text. Provide chunked operating-agreement excerpts (one clause per page). Permit voice-recorded defenses. Calculator and spreadsheet allowed throughout. Extended time on the funding comparison; pre-formatted templates with column headers labeled.
- **Advanced.** Push toward depth — multi-jurisdictional comparisons (compliance differs by state), an S-corp election analysis layered on the LLC work, a sensitivity table on the funding comparison (what happens to total interest cost if the rate changes by 2 percentage points?). Peer-teaching role for Grade 9 students during the BMC review week.

Sensitivity considerations specific to this year

- **Family-business privacy.** Many students will have family members who run businesses — and many will not. Never frame an assignment around "your family's business" or "ask your family how they did this." Frame around the four-case set or hypothetical ventures. If a student volunteers family information, listen briefly, validate, redirect to the assignment.

- **The "should you start one?" trap.** This is an educational unit. We teach LLCs, S-corps, and operating agreements without ever advising a student to form one. The voice rule for the year: "Here's how this works. Here's the tradeoff. Decisions about real ventures are family decisions and outside this curriculum."
- **Loans and debt sensitivity.** Some students live in households where debt has caused real strain. Teach loans, principal, and interest as concepts and as comparison criteria. Never frame loans as good or bad in themselves. Use neutral hypothetical scenarios.
- **Friends-and-family money.** This is the one funding source most likely to surface uncomfortable home dynamics. Always teach F&F using a fictional, named hypothetical (e.g., "Maya wants to borrow $2,000 from her uncle for inventory"). Never assign a student to ask their own family for money for the Capstone. Real-money decisions are family decisions, named explicitly.
- **Legal advice line.** We are not lawyers and we don't play one in this curriculum. The Teacher Guide includes the language: "This is educational. For a real venture, consult a real attorney and a real accountant." Reinforce this with students. It models the right adult move.
- **At least one sensitivity flag (required). Lesson 7 (Sole Prop vs. LLC)** carries a sensitivity flag — students may bring in family-business stories that involve real money, real losses, or real legal trouble. Pre-brief: keep all examples hypothetical; redirect personal disclosures to the school counselor if needed.

Materials and tools (year)

- Notebooks (paper or digital) for the Vocabulary Spine and Capstone Journal.
- 4-case profile set (provided).
- Funding comparison spreadsheet template (provided; works in Google Sheets, Excel for Web).
- Operating agreement template (2-person, fillable; provided).
- Brand guide one-pager (provided).
- Premortem worksheet (provided).
- Compliance map template (provided).
- Month-in-review template — 5 metrics (provided).
- Vision statement scaffold + pushback capture sheet (provided).
- Access to one Cash short video per unit (8 total).
- A spreadsheet tool — required for Unit 2 funding comparison. As of April 2026, options include LibreOffice Calc (libreoffice.org — open-source free tool), Google Sheets (sheets.google.com — free with a Google account), or Microsoft Excel for the Web (office.com — free with a Microsoft account).

AN INTERLUDE · GRADE 10

"Most adults skip this step. You won't."

the band's working assumption.

2

How this year hooks into the rest of Cash to Company

- **Reaches back to Grade 9** — students arriving from Grade 9 already have the Business Model Canvas, customer discovery, a simple P&L, and one MVP test. Grade 10 takes those and adds the legal/financial backbone they didn't yet have. The first two weeks recycle Grade 9 vocabulary to bring the cohort onto the same page.
- **Reaches forward to Grade 11** — Grade 11 builds on Grade 10's structure and compliance work with leadership, sales, cash flow forecasting, and the 6-week venture sprint. A strong Grade 10 Capstone (categorization clear, structure articulated, premortem honest) feeds directly into Grade 11's team charter and traction work.
- **Vertical strands.** Each of the eight strands has a Grade 10 outcome (above). The four units braid them together — Unit 3 alone centers OSO (operating agreement), CBM (brand guide), and ESL (sole-prop vs. LLC) with a strong supporting beam from LTO (vision).

A note to first-time teachers of this curriculum

You don't need a law degree to teach this. You do need to be willing to say "I don't know — let's look it up together" when a student asks a real legal question. The lesson plans script the moves; the Cash videos introduce concepts; you become the chief evidence-norm-enforcer. When a student says "I'll just be an LLC," ask "why? what's the tradeoff vs. sole prop?" — every time. By Week 12, they'll ask each other. The signature line of the year is the same one Cash carries through every grade: which people, and how do you know? Show me the evidence. In Grade 10, that question gets pointed at the structure, the funding, and the rules. The students who learn to ask it of paperwork — and not just of products — are the ones who'll still be standing in five years.

Senior expert upgrade pack — Grade 10

> **“An MVP is the smallest test that could change your mind. It's not a v1.”**
>
> - CASH, GRADE 10

Cross-grade bridge sharpening

Add to "Why this year" (open): "The BMC you built last year is the input for this year's categorization. A Grade 9 BMC tells you what the venture does, who it serves, and what it costs. A Grade 10 student takes that BMC and asks the next-layer question: what kind of thing is this? Hobby, side hustle, small business, or startup? What ownership structure fits? Whose money is at risk? Each of these has a real answer the BMC sets up."

This makes the Grade 9 → Grade 10 hand-off explicit. The BMC is not a one-shot artifact — it's the input for ownership, structure, and compliance work.

Multi-class branching scenario — "Two co-founders, one $5k loan offer"

A 2-day branching scenario for Unit 3 (who owns what).

- **Day 1.** "Maya and Tomas are co-founders of a custom-shoe business. Maya's mom offers them a $5,000 loan at 5% interest. Tomas refuses — he doesn't want family money in the venture. Maya thinks they need it to scale. Both have valid reasons."

Class question: "What does each side fear? What does each side hope? What's the actual decision?" Pair-share.

- **Day 2.** Run a RACI on the decision-making process itself.

Decision	R	A	C	I
Take the loan				
Decline the loan				
Modify terms				
Walk away from co-founder agreement				

Then: "Write the operating-agreement clause that prevents the next fight like this. Cover: how big-money decisions get made, what counts as 'big,' and what happens if co-founders deadlock."

This scenario practices PSIG (premortem-style risk thinking), MFL (loan-vs-bootstrap analysis), OSO (operating agreement), LTO (vision under disagreement).

Accounting basics — a one-page reference (real venture readiness)

A real Grade 10 student who registers a business runs into accounting on Day 1. The current curriculum doesn't cover this. Add the reference:

- **Cash vs. accrual.** Cash basis: record when money moves. Accrual basis: record when the work happens. Cash is simpler; almost all teen ventures use cash.

- **Receipts to keep.** Anything you spent venture money on. Keep them. A photo + a folder is enough at this scale.
- **EIN.** Employer Identification Number — the business's tax ID. You can obtain one directly from IRS.gov. Most teen ventures don't need one until they hire someone or open a bank account in the business name.
- **The simple accounting rhythm.** Every Sunday: 5 minutes. Look at what came in, what went out, what's owed. Three numbers in a notebook. That's bookkeeping at this scale.

This reference is also recycled at Grade 12.

ROUND 2 PATCH — Standards Citations (verbatim)

- **Jump$tart Standard 2 (Credit and Debt), Benchmark 12-3:** "Compare sources of consumer credit" — extended to small-business funding sources.
- **Jump$tart Standard 5 (Risk Management and Insurance), Benchmark 12-1:** "Identify risks in life and how to manage them" — applied to business-structure liability.
- **CEE Standard 4 (Using Credit), Grade 12:** "Borrowing money usually involves repaying both the principal and the interest."
- **CCSS-Math A-SSE.B.3 / F-IF.C.8:** "Choose and produce equivalent forms" — used in funding-source comparison spreadsheets.
- **CCSS-ELA W.9-10.1:** "Write arguments to support claims with valid reasoning" — defending a vision statement.
- **C3 D2.Eco.10.9-12:** "Use current data to explain the influence of changes in spending, production, and the money supply on various economic conditions."
- **CASEL Responsible Decision-Making:** "Considering ethical responsibility."
- **Honest gap:** Premortem is a Klein-style decision-quality tool, not in any K-12 framework; we teach it because it works.

ROUND 2 PATCH — Strand Outcomes (verbatim)

By end of Grade 10, a student can: - **BAVC:** "I can explain the difference between a hobby, a side hustle, a small business, and a startup, using 4 real-world examples with evidence." - **PSIG:** "I can take an idea and stress-test it with a premortem (assume it failed in 1 year — list every reason) and rank the top 3 risks." - **MFL:** "I can compare three ownership/funding sources (bootstrap savings, small loan, friends-and-family) using interest, control, and risk as criteria — and recommend one for a sample business." - **CBM:** "I can build a 1-page brand guide (name, tagline, two-color palette, one font, one voice rule) for my venture and explain each choice." - **OSO:** "I can complete a basic operating agreement template (roles, decisions,

money handling, exit) for a 2-person teen partnership and explain each clause." - **LTO:** "I can draft a 1-page vision statement for my venture, defend it in a 3-minute pitch, and capture pushback into a revision list." - **ESL:** "I can identify the right business structure (sole prop, LLC) for a sample venture using cost, liability, and complexity, and explain why." - **LRCI:** "I can run a month in review using 5 metrics (revenue, customers, cost, time spent, satisfaction) and propose two changes for next month."

ROUND 2 PATCH — Cross-Grade Bridge: Grade 9 ↠ Grade 10 (RECEIVING bridge, REQUIRED)

You ended last year with a Business Model Canvas filled with evidence. **The BMC you built is the input for this years categorization work.** Pull it out. Look at the boxes. Is this a hobby (no revenue intent)? A side venture (revenue intent, part-time)? A small business (revenue intent, full-time, location-bound)? A startup (revenue intent, scalable, growth-bound)? The evidence in your boxes will tell you.

ROUND 2 PATCH — Advanced-Learner Specifics (Grade 10)

- **Premortem extension:** Run premortems on two ventures and rank the top 3 risks across both. Compare risk profiles.
- **Funding extension:** Compare five funding sources (bootstrap, loan, F&F, crowdfunding, grant). Build a spreadsheet with criteria.
- **Operating agreement extension:** Draft an operating agreement for a 3-person partnership. Discuss the unique challenges of three (vs. two) founders.
- **Vision extension:** Write the vision in three voices (founder, customer, investor). Compare which sells the venture best to which audience.

ENDNOTES & STANDARDS

Citations and alignment

Grade 10 cites 3-6 standards across CCSS, Jump$tart, CEE, CASEL, and C3 frameworks. Detailed alignment lives in the master Standards Alignment Map.

1. **Jump$tart Coalition Personal Finance Standards (2021 ed.).** Spending and Saving; Credit and Debt; Employment and Income; Investing; Risk Management and Insurance; Financial Decision Making.
2. **Council for Economic Education (CEE).** Voluntary National Content Standards in Economics.
3. **CCSS-ELA, Grades 11-12.** W.11-12.1, W.11-12.4, SL.11-12.1, SL.11-12.4, RST.11-12.7.
4. **CCSS-Math.** N-Q.1-3 (Reasoning with Quantities), S-IC (Statistics & Inferences), F-IF (Functions), MP.4 (Modeling).
5. **CASEL Core Competencies.** Self-Awareness, Self-Management, Social Awareness, Relationship Skills, Responsible Decision-Making.
6. **C3 Framework for Social Studies State Standards.** Dimension 2 (Economics, Civics) at the high-school grade band.
7. **NGSS-ETS Engineering Practices.** ETS1 (Engineering Design) for the test-and-iterate spine of the year.
8. **Cash to Company Master Scope & Sequence.** 13 grades x 8 strands x 36 weeks; outcomes quoted verbatim from _master/00_Master_Scope_and_Sequence.md.
9. **Cash Mascot Style Guide.** 9-12 voice rules: multi-sentence arguments; vocabulary includes unit economics, runway, premortem, MVP; never flatters, never promises wealth.
10. **Sensitivity protocol.** No probing of family finances; financial scenarios framed as hypothetical for a sample household, business, or scenario.

One promise.

Cash to Company makes one promise: students who move t
program will be clearer thinkers about money and entrepren
matter what they end up doing for a living.

We do not promise wealth. We do not promise success. We pro

> **“The legal, financial, and operational chassis under every venture.”**
