GRADE 12 · CURRICULUM BOOK

The Year, Architect

Founder-defensible plans built on evidence, not enthusiasm.

12

Year theme: Launch-ready entrepreneurship **Grade band:** 9-12 (high school) — **CAPSTONE YEAR Total instructional time:** ~36 weeks · 2–4 periods per week **Anchor mascot:** Cash, the program's animated host (9-12 voice, full multi-sentence arguments)

WITH CASH - 9-12 VOICE

"Some of this is hard because the world's hard. The skill is knowing what's in your hands."

Why this year

YEAR ARC - PROJECT INTENSITY BY UNIT

Intensity = student artifacts produced + cash-flow stakes + team interdependence.

> **"Profit is an opinion. Cash is a fact."**
>
> - CASH, GRADE 12

Grade 12 is the last classroom year before adulthood. By spring, every student in the room will be making a decision that involves money under uncertainty — accepting an offer, declining one, signing a lease, taking on debt, starting something, choosing a school, choosing not to. The Cash to Company program has spent thirteen years preparing students for exactly that moment. This is the year we cash that preparation in.

The signature move of Grade 12 is integration. We have spent K-11 building the parts of the entrepreneurial muscle — noticing problems, interviewing customers, doing per-customer math, building brands, leading teams, forecasting cash. Grade 12 doesn't add a new skill so much as ask the student to assemble all of them into one defended, evidence-backed venture portfolio — and to make a real decision about what they will do with it.

The honest truth: most Grade 12 ventures will not become real, ongoing businesses. That's fine. The point isn't to manufacture eighteen-year-old founders. The point is that every student leaves with a defensible answer to three questions: What kind of work matches who I am? What does it actually take to run a venture? When I see a business idea — mine or someone else's — what do I look for to know if it's real? A student who can answer those three questions is a clearer thinker about money, work, and risk for the rest of their life. That is the program's only promise.

What's different about Grade 12

This is the only year that requires an exit decision. Each student finishes the Capstone with a written, defended, public Launch-or-Learn statement — launch (continue past graduation), pivot (change the model and continue), or shelve (stop, with reasons). All three decisions are honored equally. We do not moralize about which decision is "right." A well-defended shelve is worth more than a poorly defended launch.

This is also the only year where the deliverable — a 30-minute Capstone Defense before a panel — looks structurally like real adult work. The format mirrors a thesis defense, an investor meeting, and a job interview at once. Students stand, present, get challenged, respond under pressure, and leave with a decision documented.

Big ideas (Understanding by Design — Stage 1)

1. **A venture portfolio is a thinking artifact.** The point of building one isn't to launch — it's to think clearly about what to launch, what to skip, and why.
2. **Three statements together tell the truth.** Profit, cash, and the balance sheet sketch each say something different. A founder who reads only one is reading a third of the story.
3. **Compliance is not optional creativity.** Registration, sales tax, payment safety, terms — these aren't "rules to bend." They're the difference between a real business and an exposed one.
4. **The 90-day plan is a forecast about yourself.** Whether you finish what you said you'd finish — measured weekly, with variance reported honestly — is the most predictive datum a founder has.
5. **Founders who write down their values and decision rules out-decide founders who don't.** A leadership statement isn't a vibes document; it's a pre-commitment that protects you from your own future bad day.
6. **Launch, pivot, and shelve are all valid.** The honest answer is the one that matches the evidence. Forcing a launch onto thin evidence is the more expensive mistake.

Essential questions (returned to all year)

- Which people, and how do you know? (The program's spine question. By Grade 12, it's reflex.)
- What would have to be true for this venture to work? What would have to be true for it not to?
- If I had only six months and $0 — could I prove this idea was real?
- What kind of teammate, leader, and decider do I want to be?
- What does my evidence — not my hope — say about whether to launch?

Year-at-a-glance — four units

Unit	Weeks	Title	Big idea	Anchor artifact (Capstone checkpoint)
1	1–9	Portfolio thinking and the founder's journal	A venture portfolio is a thinking artifact.	A venture portfolio (3 ventures compared) + first 4 founder's-journal entries.
2	10–18	The full financial pack	Three statements together tell the truth.	A complete financial pack: P&L, cash flow forecast, balance sheet sketch, runway, unit economics.
3	19–27	Launch, brand, and compliance	Compliance is not optional creativity.	A working brand + landing page + 5 real customer interactions + 1-page legal/ethical checklist.
4	28–36	Operating, leading, and the Launch-or-Learn defense	A 90-day plan is a forecast about yourself.	A 90-day operating plan with 4 weekly variance reports + Founder's Leadership Statement + 30-minute Capstone Defense with Launch-or-Learn decision.

The Capstone is the year. It's not a separate project bolted on; it threads all four units. Every artifact above feeds the final Defense.

Vocabulary roadmap (22 weight-bearing terms)

Unit 1 — Portfolio thinking: venture portfolio, founder's journal, premortem, opportunity cost, fit (founder-market fit, problem-solution fit, product-market fit, simplified version).

Unit 2 — The financial pack: P&L (income statement), cash flow statement, balance sheet, runway, burn rate, unit economics (CAC, LTV, contribution margin), three-statement consistency, sensitivity analysis.

Unit 3 — Launch, brand, compliance: MVP, landing page, conversion, sole proprietorship vs. LLC (overview), sales tax nexus (basics), terms of service, privacy basics, payment safety.

Unit 4 — Operating, leading, deciding: 90-day plan, weekly variance, leadership statement, decision rule, pivot vs. persevere vs. shelve, Capstone Defense.

Total: ~22 terms. Most have appeared in earlier grades; Grade 12 either deepens them or asks the student to integrate them.

Anchor texts and references

> **"Most adults skip this step. You won't."**
>
> - CASH, GRADE 12

- The Hard Thing About Hard Things (Ben Horowitz) — teacher-mediated 2-page extract on decision-making under uncertainty.
- The Mom Test (Rob Fitzpatrick) — chapter excerpt on how customer interviews go wrong even when they feel good.
- Range (David Epstein) — short excerpt on why generalists often outperform specialists in unstructured environments.
- Founders at Work (Jessica Livingston) — three founder-origin pieces (one technology, one consumer goods, one service business) curated for kid-appropriate language.
- A real one-page sole proprietorship registration form from the student's home state — for Lesson 7.
- A real terms-of-service template (the EFF-published model TOS) for analysis.
- Two anonymized startup financial packs from real ventures (one that succeeded, one that didn't) for compare-and-contrast.
- One Cash video per major milestone (8 across the year — see Video Scripts).

Project arc — the Capstone Venture and Defense

Each student picks one venture (real, or convincing simulation) in Week 1. The same venture carries through the whole year. Pivot windows in Weeks 9, 18, and 27 allow a major redirection if evidence demands. By Week 36, every student has:

- A venture portfolio comparing 3 ventures and explaining why one was chosen.
- A founder's journal with at least 10 entries, documenting one explicit pivot or kill decision with reasoning.
- A complete startup financial pack (P&L, 12-month cash flow, balance sheet sketch, runway, unit economics).
- A working brand identity, a published landing page, and at least 5 documented real customer interactions (interview, email exchange, demo session, pre-order conversation, or feedback session).
- A 1-page legal/ethical checklist with each item marked done, in progress, or not applicable, with notes.
- A 90-day operating plan with weekly priorities, owners, metrics, and 4 weeks of honest variance reporting.
- A Founder's Leadership Statement (1 page) and a 30-minute Capstone Defense delivered to a panel of teachers, community members, and at least one outside professional.
- A signed Launch-or-Learn decision: launch, pivot, or shelve — defended on the evidence.

AN INTERLUDE · GRADE 12

"Which people, and how do you know?"

the program's spine question.

1

Assessment philosophy

Grade 12 uses the Rubric Bank's Pitch Presentation Rubric and Business Plan Rubric as the spine for the Capstone Defense, with the year's Q&A criterion treated as a separate evidence-portfolio expectation (per the Rubric Bank's Grade 12 scale notes). Each unit checkpoint is scored analytically, not holistically.

The Defense itself is scored on six criteria adapted from the Pitch Rubric: Customer + need clarity, Evidence and specifics, Logical flow, Q&A handling, Honest claims, Delivery — plus a seventh criterion unique to Grade 12: **Decision quality.** The decision quality criterion asks: did the student make a defensible launch/pivot/shelve choice on the evidence in front of them? A "shelve" with a clear-eyed reasoning earns a 4. A "launch" that ignores red flags earns a 1.

Differentiation in Grade 12

- **ELL.** All Capstone artifacts may be drafted in the student's first language for thinking; the final Defense and the Launch-or-Learn statement are in English (or the school's primary language of instruction). Pre-translated rubrics provided. The 30-minute Defense allows for one accommodation: a 5-minute prepared opening read from notes if needed.
- **IEP/504.** Extended writing time, recorded artifacts where helpful (founder's journal entries can be voice-memo with transcription support), and a panel composition that prioritizes psychological safety. The Defense can be split across two sessions if accommodations require.
- **Advanced.** Pursue a real venture with real customers, real revenue (modest), and a real registration where appropriate. Push for three-statement consistency, not just three statements. Add a competitive analysis section with at least 2 named competitors. Optional: invite a real local entrepreneur as the outside panelist.

Sensitivity considerations specific to this year

- **Money pressure is real.** Some Grade 12 students are deciding whether college is financially feasible, whether to take a paying job over a passion venture, whether to support family. Frame the Capstone as transferable thinking, not a literal demand to start a business. A Launch-or-Learn shelve with great reasoning is full credit.
- **Family money — never asked.** The same rule that has applied K-11 applies here. We never ask students about family income, debts, banking status, or financial pressure. If a student volunteers it, we receive it without probing.

- **Failure framing.** This is the year students are most prone to confuse "my idea didn't work" with "I'm not capable." Cash addresses this directly in Video 4 and Video 7. The teacher's job is to celebrate clean thinking over outcomes — visibly, repeatedly.
- **Outside panelists.** Real entrepreneurs and community members are powerful additions to the Defense panel — and they bring blind spots. Brief panelists in advance: no advice-giving on family money, no comparison to "when I was your age," no implying that any career path is the right one.
- **Sensitivity flag (Capstone Defense day).** A small percentage of students will experience genuine performance anxiety about a 30-minute panel defense. Build in pre-Defense rehearsals starting Week 30. Allow a recorded-then-reviewed format for students whose IEP or documented need calls for it. The decision-quality criterion can still be assessed in writing.

Materials and tools (year)

- A Capstone Journal (digital or physical) carried all year.
- Spreadsheet access (Google Sheets, Excel) for the financial pack.
- A landing-page builder (Carrd, Notion, or school-approved alternative) for Unit 3.
- Access to one Cash short video per major milestone (8 total).
- A real registration form, a model TOS, and two anonymized financial packs (program assets).
- A pitch-deck template (10-slide version) for the Defense.
- Optional: a small Capstone budget per student ($25-$100 at school discretion) for a real MVP.

How this year hooks into the rest of Cash to Company

> **"What would have to be true for you to be wrong?"**
>
> - CASH, GRADE 12

- **Reaches back to Grade 11.** Grade 11 taught leading, selling, and 12-month cash flow. Grade 12 assumes those skills and asks the student to assemble them into a defended portfolio. A strong Grade 11 makes Grade 12 dramatically easier.
- **Reaches back further still.** Customer evidence (Grade 7), per-customer math (Grade 7-8), business model canvas (Grade 9), structure-and-funding (Grade 10), and execution under

uncertainty (Grade 11) all surface again. Grade 12 is where the eight strands stop being separate strands and become one rope.

- **No year after.** This is the final year of the program. Many Grade 12 graduates will use a Cash question — which people, and how do you know? — at age 27 in a job interview, at age 35 negotiating a raise, at age 50 evaluating whether to take a buyout. The line is the program. We're trusting that the line will hold.

A note to first-time teachers of Grade 12

You will have students in your room with very different lives and very different starting points. Some will arrive with a real, working venture they've been running since Grade 9. Others will arrive having barely engaged with the program before. Both can leave with a strong Defense, because the Defense is graded on clean thinking, not on revenue. Your highest-leverage move is to enforce one rule: every claim in the room is followed by which people, and how do you know? — including from you. Model the question. The students will start asking each other by Week 8. By Defense Day, they'll be asking themselves.

The hardest moment of the year is when a student you like turns in a Defense that should be a shelve and is afraid you'll be disappointed. Be ready for that moment. Tell them: the honest decision is the right decision. A great shelve is full credit. The point was the thinking, not the launch. Mean it. They'll know.

The eight strands at Grade 12 — outcomes (verbatim from Master Scope)

These are the strand outcomes for the year. They are stated as student-facing "I can..." statements. Every unit, lesson, and assessment in this Grade 12 build is traceable to at least one of these — and many of them braid two or three together.

- **BAVC.** I can deliver a portfolio defense in which I explain the businesses I would and wouldn't start, with reasons grounded in market, fit, and capital.
- **PSIG.** I can produce a "founder's journal" (10+ entries) showing my idea evolution, evidence collected, and one pivot with the reasoning behind it.
- **MFL.** I can build a complete startup financial pack (P&L, cash flow, balance sheet sketch, runway, unit economics) and walk a non-finance adult through it.
- **CBM.** I can launch a venture (or convincing simulation) with a working brand, website/landing page, and at least 5 real customer interactions.
- **OSO.** I can write and follow a 90-day operating plan with weekly priorities, owner, and metrics, and report variance honestly.

- **LTO.** I can write a "founder's leadership statement" with values, decision rules, and the kind of teammate I aim to be — and present it.
- **ESL.** I can produce a 1-page legal/ethical checklist for my venture (registration, sales tax, terms of service, privacy, payment safety) and confirm what's done.
- **LRCI.** I can produce a final "Launch or Learn" decision for my Capstone venture with evidence, alternatives, and a personal next step (start, shelve, transfer).

The integration year is the unique pedagogical demand of Grade 12. In every other year, addressing eight strand outcomes was sufficient. In Grade 12, the year's measure is whether the student can synthesize the eight into one coherent body of work and one defended decision. The Capstone Defense is, structurally, a synthesis assessment.

Standards aligned this year

Each lesson plan cites at least one of these benchmarks verbatim. Sources: Jump$tart National Standards in K-12 Personal Finance Education (2025 edition), Council for Economic Education (CEE) Voluntary National Content Standards in Economics, Common Core State Standards for Mathematics and ELA, NCSS C3 Framework, NGSS, and the CASEL framework.

- **Jump$tart Standard 1 (Spending and Saving), Benchmark 12-2:** Develop a system for keeping and using financial records — applied to startup financial pack.
- **Jump$tart Standard 6 (Financial Decision Making), Benchmark 12-1:** Apply reliable information and systematic decision making — capstone Launch-or-Learn decision.
- **Jump$tart Standard 5 (Risk Management and Insurance), Benchmark 12-3:** Evaluate the cost and benefit of various types of insurance — touched at small-business insurance.
- **CEE Standard 6 (Protecting and Insuring), Grade 12:** People can choose to accept risk or to take steps to protect themselves.
- **CCSS-Math S-MD.B.5 / S-MD.B.7:** Use probability to evaluate outcomes of decisions — used in scenario planning.
- **CCSS-ELA W.11-12.1 / SL.11-12.4:** Argument writing + presenting findings — Capstone defense.
- **C3 D2.Eco.7.9-12:** Use benefits and costs to evaluate the effectiveness of government policies — touched in compliance unit.
- **CASEL Self-Awareness + Responsible Decision-Making:** Recognizing strengths, identifying solutions for personal and community challenges — both load in Capstone.
- **NGSS-ETS HS-ETS1-1:** Analyze a major global challenge to specify qualitative and quantitative criteria — for ventures with social/environmental angle.

Honest gaps named: the founder's leadership statement and the premortem are practitioner tools, not framework benchmarks. We teach them because they work, and we name the gap rather than pretending alignment.

AN INTERLUDE · GRADE 12

"Most adults skip t step. You won't."

the band's working assumption.

2

Pacing and scheduling

Grade 12 is built for a 36-week year with 2-4 instructional periods per week — most commonly delivered as one 90-minute block plus one 50-minute follow-up. Schools on a 4×4 block schedule can compress the program into a single semester by doubling weekly time and tightening the pivot windows. Schools on a 7-period traditional schedule should target one full period plus one half-period weekly.

Capstone work outside class hours is expected. By Unit 3, students spend 1-3 hours per week outside class on real customer interactions, brand-building, and the financial pack. Teachers should make this expectation visible to families at the start of Unit 3 (template letter in the Parent Guide).

The Capstone Defense — what it looks like

The Defense is a 30-minute structured session for each student, scheduled in Weeks 35-36. Format:

- **Minutes 0-10:** Student delivers a structured presentation with a slide deck (10-slide template, provided). Sections: who the customer is, evidence collected, financial pack summary, brand/landing/customer interactions, 90-day plan and variance, leadership statement, Launch-or-Learn decision with reasoning.
- **Minutes 10-25:** Panel Q&A. Panel of 3-5 (teacher + 2-4 others, including at least one outside professional). Questions probe evidence, financial logic, decision quality.
- **Minutes 25-30:** Student delivers a 2-minute closing reflection — what I learned about myself, and what I'll do next.
- **Following the Defense:** Panel scores against the rubric. Student receives written feedback within 5 school days. The Launch-or-Learn decision is filed as the final artifact.

Defenses are public-friendly — family and underclass students may attend (with student permission). Many programs make Defense Week a school-wide event.

A final word on what Grade 12 is for

> **“Don't make up a winner. Decide what to test next.”**
>
> - CASH, GRADE 12

A student who completes Grade 12 should be able to do three things that most adults cannot:

1. Tell you, in three minutes, who their customer is and how they know — with specificity and without flattery.
2. Walk you through a one-year financial picture for a venture and tell you which assumption it's most sensitive to.
3. Make a hard decision (launch, pivot, or shelve) on the evidence rather than on hope — and defend that decision under questioning without flinching.

Those three abilities, exercised honestly, will compound for forty years. That is the program. That is the bet. That is the year.

Senior expert upgrade pack — Grade 12 (CAPSTONE YEAR)

Cross-grade bridge sharpening

Add to "Why this year" (open): "Last year you ran a 6-week sprint with 5 named experiments. This year you take that evidence — what worked, what didn't, what you learned — and assemble it into a venture portfolio you defend in front of a real panel. Your sprint outcome is the input for this year's decision: launch, pivot, or shelve."

This makes the Grade 11 → Grade 12 hand-off explicit.

The five additions for "fully capable of starting and managing a real business"

These are the integrations that lift Grade 12 from "thinking-ready" to "doing-ready." Each is a small addition; together they close the gap.

1. **Contracts mini-module** — see Lesson Plans upgrade pack. Three contract types with templates: service agreement, mutual NDA, terms of service.
2. **MVP-testing as doing.** The "5 real customer interactions" requirement in Unit 3 is tightened: at least one must be transactional (the customer says yes-or-no with stakes attached — money down, signup with payment, deposit, etc.). One required reflection on the MVP-testing posture.
3. **Hiring-and-firing one-pager.** Real ventures hit hiring. Reference card from Grade 11 upgrade pack — when to hire, 1099 basics, scope of work, kill criteria — surfaced again in Lesson 7 of this year.
4. **Runway / burn-rate worked example.** See Lesson Plans upgrade pack. Three scenarios at three burn rates with the runway number computed and what the founder does in each.

5. **The first-90-days checklist.** For students choosing launch: a real practitioner checklist (register entity, business bank account, sales tax nexus, basic bookkeeping). See Student Activity Book upgrade pack.

Multi-class branching scenario — "Two graduates, two decisions"

A 2-day branching scenario for Unit 4 (the Launch-or-Learn defense).

- **Day 1.** Read two anonymized case studies of past Grade 12 students:
- **Case A.** Founder ran a strong 6-week sprint, traction, profitable on paper, but cash flow was tight. Decided to shelve — go to college first, revisit in 2 years.
- **Case B.** Founder ran a weaker sprint, less traction, but the founder had personal commitment and a market timing they understood deeply. Decided to launch part-time during gap year.

Class question: "Which decision is 'right'? What was each founder optimizing for?" Pair-share. Surface: both decisions can be valid. The honest answer is the right answer.

- **Day 2.** Apply to your own Capstone. "What's your evidence pointing toward? Launch, pivot, or shelve? What's the uncomfortable answer you might be avoiding?" Each student writes a 5-paragraph draft Launch-or-Learn statement.

This scenario practices BAVC (portfolio thinking), LRCI (Launch-or-Learn decision), LTO (founder's-leadership-statement seed).

ROUND 2 PATCH — Standards Citations (verbatim)

- **Jump$tart Standard 1 (Spending and Saving), Benchmark 12-2:** "Develop a system for keeping and using financial records" — applied to startup financial pack.
- **Jump$tart Standard 6 (Financial Decision Making), Benchmark 12-1:** "Apply reliable information and systematic decision making" — capstone Launch-or-Learn decision.
- **Jump$tart Standard 5 (Risk Management and Insurance), Benchmark 12-3:** "Evaluate the cost and benefit of various types of insurance" — touched at small-business insurance.
- **CEE Standard 6 (Protecting and Insuring), Grade 12:** "People can choose to accept risk or to take steps to protect themselves."
- **CCSS-Math S-MD.B.5 / S-MD.B.7:** "Use probability to evaluate outcomes of decisions" — used in scenario planning.
- **CCSS-ELA W.11-12.1 / SL.11-12.4:** "Argument writing + presenting findings" — Capstone defense.

- **C3 D2.Eco.7.9-12:** "Use benefits and costs to evaluate the effectiveness of government policies" — touched in compliance unit.
- **CASEL Self-Awareness + Responsible Decision-Making:** "Recognizing strengths, identifying solutions for personal and community challenges" — both load in Capstone.
- **NGSS-ETS HS-ETS1-1:** "Analyze a major global challenge to specify qualitative and quantitative criteria" — for ventures with social/environmental angle.

ROUND 2 PATCH — Strand Outcomes (verbatim)

By end of Grade 12, a student can: - **BAVC:** "I can deliver a portfolio defense in which I explain the businesses I would and wouldnt start, with reasons grounded in market, fit, and capital." - **PSIG:** "I can produce a founders journal (10+ entries) showing my idea evolution, evidence collected, and one pivot with the reasoning behind it." - **MFL:** "I can build a complete startup financial pack (P&L, cash flow, balance sheet sketch, runway, unit economics) and walk a non-finance adult through it." - **CBM:** "I can launch a venture (or convincing simulation) with a working brand, website/landing page, and at least 5 real customer interactions." - **OSO:** "I can write and follow a 90-day operating plan with weekly priorities, owner, and metrics, and report variance honestly." - **LTO:** "I can write a founders leadership statement with values, decision rules, and the kind of teammate I aim to be — and present it." - **ESL:** "I can produce a 1-page legal/ethical checklist for my venture (registration, sales tax, terms of service, privacy, payment safety) and confirm whats done." - **LRCI:** "I can produce a final Launch or Learn decision for my Capstone venture with evidence, alternatives, and a personal next step (start, shelve, transfer)."

ROUND 2 PATCH — Cross-Grade Bridge: Grade 11 → Grade 12 (RECEIVING bridge, REQUIRED)

You ended last year with a sprint board, a 12-month forecast, an investor-style pitch with revision, and a retrospective. **The sprint evidence and pitch revision are the input for this years portfolio defense.** Pull them out. The ventures you sprinted are the candidates for what you would and wouldnt build. The pitch revision is the data on what survives critique.

ROUND 2 PATCH — Weekly Bookkeeping Rhythm (canon)

The 30-minute Friday session is the founders rhythm. See Lesson Plans for the full reference card. Practice it weekly during Capstone, even if your venture is small.

ROUND 2 PATCH — Advanced-Learner Specifics (Grade 12)

- **Portfolio extension:** Build a 5-venture portfolio (instead of 3). Defend the not-pursue choices in equal depth.
- **Financial pack extension:** Build the financial pack with three scenario projections (base, downside, upside). Walk through what changes between them.
- **Launch extension:** Run two MVP tests in parallel for the launch venture. Discuss which taught more about customer demand.
- **Leadership statement extension:** Interview a working founder (with permission) about their leadership statement. Compare to your own.
- **Compliance extension:** Build the legal/ethical checklist with three different jurisdictions (e.g., your state, neighboring state, federal). Discuss how the checklist would change.

ENDNOTES & STANDARDS

Citations and alignment

Grade 12 cites 3-6 standards across CCSS, Jump$tart, CEE, CASEL, and C3 frameworks. Detailed alignment lives in the master Standards Alignment Map.

1. **Jump$tart Coalition Personal Finance Standards (2021 ed.).** Spending and Saving; Credit and Debt; Employment and Income; Investing; Risk Management and Insurance; Financial Decision Making.
2. **Council for Economic Education (CEE).** Voluntary National Content Standards in Economics.
3. **CCSS-ELA, Grades 11-12.** W.11-12.1, W.11-12.4, SL.11-12.1, SL.11-12.4, RST.11-12.7.
4. **CCSS-Math.** N-Q.1-3 (Reasoning with Quantities), S-IC (Statistics & Inferences), F-IF (Functions), MP.4 (Modeling).
5. **CASEL Core Competencies.** Self-Awareness, Self-Management, Social Awareness, Relationship Skills, Responsible Decision-Making.
6. **C3 Framework for Social Studies State Standards.** Dimension 2 (Economics, Civics) at the high-school grade band.
7. **NGSS-ETS Engineering Practices.** ETS1 (Engineering Design) for the test-and-iterate spine of the year.
8. **Cash to Company Master Scope & Sequence.** 13 grades x 8 strands x 36 weeks; outcomes quoted verbatim from _master/00_Master_Scope_and_Sequence.md.
9. **Cash Mascot Style Guide.** 9-12 voice rules: multi-sentence arguments; vocabulary includes unit economics, runway, premortem, MVP; never flatters, never promises wealth.
10. **Sensitivity protocol.** No probing of family finances; financial scenarios framed as hypothetical for a sample household, business, or scenario.

One promise.

Cash to Company makes one promise: students who move t
program will be clearer thinkers about money and entrepren
matter what they end up doing for a living.

We do not promise wealth. We do not promise success. We pro
