CASH TO COMPANY

Item Bank

"Businesses need systems and roles"

Per-unit quiz / test items · 4 units · ETS-quality alignment to Jump$tart, CEE, CCSS, C3, CASEL, NGSS-

Grade 6 — Cash to Company Item Bank

Year theme: *Businesses need systems and roles.* This bank covers all four Grade 6 units (Where the value comes from · Build the system · Who does what · Run the stand-up). Items use customer/persona/contribution-margin scenario style and ratio reasoning (CCSS 6.RP.A.3). Distractors target the Grade 6 Common Misconceptions table. No family-money probes; "for a hypothetical" framing throughout. Cash's Grade 6 voice: "*Most adults run their lives without a system. You won't.*"

Unit 1: Where the value comes from

MC1. *"For a hypothetical local pizza shop, the value chain is: flour mill → baker → delivery driver → customer. Which step is the SUPPLIER?"*

A. Flour mill · B. Baker · C. Delivery driver · D. Customer

Answer: A · **Standard:** *C3 D2.Eco.6.6-8 — Explain how changes in supply and demand cause changes in prices.* · **Strand outcome (BAVC, 6):** *I can map a business's "value chain" — supplier → producer → seller → customer — for one real business with at least one example at each stage.* · **Misconception targeted:** "*A business is just one storefront*" — corrects.

MC2. *"For a hypothetical 12-year-old's small business, a SEGMENT is..."*

A. Everyone they know · B. A specific group with at least 3 shared traits (age, where they hang out, what they care about) · C. Their best friend · D. Their parents

Answer: B · **Standard:** *CASEL Relationship Skills — Negotiation, role clarity.* · **Strand outcome (CBM, 6):** *I can identify the customer "segment" my product serves and describe at least 3 things I know about that segment (age, where they hang out, what they care about).* · **Misconception targeted:** "*Everyone is my customer*" — corrects.

MC3. *"In a value chain, where does most of the PROFIT usually go?"*

A. Always to the supplier · B. To the step closest to the customer that adds the most value · C. Always to the producer · D. Equally split

Answer: B · **Standard:** *CEE Standard 1 (Earning Income), Grade 8 — People who own and run their own business take risks but also have the potential for higher rewards.* · **Strand outcome (BAVC, 6):** *I can map a business's "value chain."* · **Misconception targeted:** "*Profit is automatic*" — corrects.

SA1. *"For a hypothetical bubble-tea shop, map a 4-step value chain (supplier → producer → seller → customer) and give one specific example at each step."*

Model answer: "*Supplier: tapioca pearl wholesaler in the next town. Producer: the shop kitchen that brews tea and assembles drinks. Seller: counter staff who hand customers their drinks. Customer: high-school students who hang out after school.*"

Scoring guide (3-2-1): - **3:** All 4 steps named with specific (not generic) examples. - **2:** 3 of 4 specific. - **1:** Generic ("a supplier," "a customer").

SA2. *"Describe your venture's customer SEGMENT in 3 specific behaviors (not demographics)."*

Model answer: "*1. They check Instagram between classes. 2. They eat the school cafeteria food but post about local boba on weekends. 3. They have $5-10 in spending money on Friday afternoons.*"

Scoring guide (3-2-1): - **3:** Three behavioral details (not "12 years old, female," etc.). - **2:** Two behaviors + one demographic. - **1:** Mostly demographics.

Performance Task: Value Chain Map + Segment Sketch (90 min, individual).

Child picks one real local business and maps its 4-step value chain with one specific example at each step. Then for their own venture, writes a Segment Sketch with 3 behaviors. **Rubric:** Customer Research Rubric (Grade 6): (1) chain has all 4 steps with real examples, (2) segment is described in behaviors not just demographics, (3) one written reflection on which step has the most leverage for value. **Strand outcome:** BAVC + CBM.

Extension (advanced learner):

"*Within your value chain, where would you ADD a new step that no current player owns? Why would customers pay for it?*" Previews Grade 7 customer discovery + Grade 9 BMC.

Unit 2: Build the system

MC1. *"An SOP (Standard Operating Procedure) differs from a checklist because..."*

A. SOPs are longer · B. SOPs are typed; checklists are handwritten · C. SOPs include a CHECK at each step (how you know you did it right) · D. SOPs are for adults; checklists are for kids

Answer: C · **Standard:** *CCSS-ELA W.6.2 — Write informative/explanatory texts.* · **Strand outcome (OSO, 6):** *I can write a Standard Operating Procedure (SOP) for a 5-step process in my business (e.g., "how to take an order") with checks for each step.* · **Misconception targeted:** "*An SOP is just a checklist*" — corrects.

MC2. *"For a hypothetical 12-year-old saving toward a $300 used scooter over 6 months, what monthly savings rate (as % of $40 monthly allowance) is needed?"*

A. 50% (= $20/month) · B. 100% (= $40/month) · C. 125% (= $50/month) · D. 75% (= $30/month)

Answer: C · **Standard:** *CCSS-Math 6.RP.A.3 — Use ratio and rate reasoning to solve real-world problems.* · **Strand outcome (MFL, 6):** *I can build a one-month income/expense ledger for a hypothetical 12-year-old's small business with a savings rate goal expressed as a percentage.* · **Misconception targeted:** "*Savings rate is what you have left over*" — $300/6 = $50; $50/$40 = 125% — meaning the goal is unreachable on allowance alone, so the kid must earn more or extend the timeline.

MC3. *"5 Whys is..."*

A. Asking 'why' exactly five times · B. Asking 'why' until you reach a root cause that's actionable (could be 3, could be 7) · C. A guessing game · D. Only used by big companies

Answer: B · **Standard:** *CASEL Self-Management — Goal-setting.* · **Strand outcome (PSIG, 6):** *I can use the "5 Whys" technique on a business problem (e.g., "we sold less today") to find a possible root cause, written out.* · **Misconception targeted:** "*5 Whys is just asking 'why' five times*" — corrects.

SA1. *"Write a 5-step SOP for 'How to take an order' at a hypothetical lemonade stand. Each step needs a CHECK."*

Model answer: "*1. Greet customer (check: said hello AND eye contact). 2. Repeat the order back (check: customer says 'yes, that's right'). 3. Take payment (check: amount matches sign price). 4. Make change if owed (check: count up from price to amount paid). 5. Hand over drink (check: drink is full and not spilling).*"

Scoring guide (3-2-1): - **3:** 5 steps in order, each with a verifiable CHECK. - **2:** 5 steps, but 1-2 checks are vague ("done well"). - **1:** Fewer than 5 or no checks.

SA2. *"For a hypothetical 'we sold less today than yesterday' problem, run a 5 Whys."*

Model answer: "*Why? Fewer customers came. Why? It rained at noon. Why? — but here we hit a non-actionable cause (weather). Re-stem: Why didn't we have a rain plan? Because we never tried indoor sales. Root cause: no indoor backup. Action: pre-position a 'rain table' in the cafeteria.*"

Scoring guide (3-2-1): - **3:** Reaches an actionable root cause AND names a specific action. - **2:** Reaches a root cause but no action. - **1:** Stops at "weather" or another non-actionable cause.

Performance Task: Systems Pack — SOP + Monthly Ledger (90 min over 2 sessions).

Child writes a 5-step SOP with checks AND a one-month income/expense ledger for a hypothetical 12-year-old's small business with a savings rate goal expressed as a %. **Rubric:** Budget Project Rubric (Grade 6): (1) SOP has 5 steps each with a check, (2) ledger has at least 4 income + 4 expense lines, (3) savings rate goal is stated as % AND math is consistent. **Strand outcome:** OSO + MFL.

Extension (advanced learner):

"*The savings rate of 125% won't work. What 3 specific changes could the kid make to hit the $300 goal in 6 months?*" Model: extend timeline; raise allowance; start a venture earning $10/week extra; reduce target.

Unit 3: Who does what

MC1. *"On a 4-task project with a 4-person team, RACI stands for..."*

A. Real, Active, Confirmed, Important · B. Responsible, Accountable, Consulted, Informed · C. Random, Always, Completed, Issued · D. Roles, Admin, Cost, Idea

Answer: B · **Standard:** *CASEL Relationship Skills.* · **Strand outcome (LTO, 6):** *I can fill out a RACI chart (Responsible, Accountable, Consulted, Informed) for a 4-task project with a 4-person team.* · **Misconception targeted:** "*Roles are flexible; we'll figure it out*" — corrects.

MC2. *"On a RACI, who is the ONE person ultimately accountable for a task?"*

A. Anyone with R · B. Exactly one person with A · C. Everyone with C · D. Anyone with I

Answer: B · **Standard:** *CASEL Relationship Skills.* · **Strand outcome (LTO, 6):** *I can fill out a RACI chart for a 4-task project.* · **Misconception targeted:** "*If we're friends, we don't need a RACI*" — corrects with single-A clarity.

MC3. *"For a hypothetical case, a 7th-grader sells homemade peanut snacks at school WITHOUT mentioning peanuts on the package. Is this..."*

A. Fully fine — kids know the snack contains peanuts · B. Legal but sketchy — risks an allergy reaction · C. Over the line — failing to disclose an allergen is a real safety issue · D. None of the above

Answer: C · **Standard:** *Jump$tart Standard 6 (Financial Decision Making), Benchmark 8-1.* · **Strand outcome (ESL, 6):** *I can identify whether a business action is "legal but sketchy," "fully fine," or "over the line" using 3 example cases, and defend my call.* · **Misconception targeted:** "*Small business = small rules*" — corrects.

SA1. *"Build a RACI for a 4-task project (set up booth · take orders · make product · clean up) with 4 teammates (Aisha, Ben, Cam, Dana). Assign each task an R, an A, and at least one C or I."*

Model answer: "*Set up booth: R-Ben, A-Ben, C-Aisha, I-Dana. Take orders: R-Aisha, A-Aisha, C-Ben, I-Cam. Make product: R-Cam, A-Aisha, C-Dana, I-Ben. Clean up: R-Dana, A-Dana, C-Cam, I-Aisha.*"

Scoring guide (3-2-1): - **3:** Each of 4 tasks has exactly one A, at least one R, and at least one C/I; A and R can be the same person OR different. - **2:** All tasks assigned but RACI rules slightly broken (multiple As). - **1:** Multiple tasks unassigned.

SA2. *"Pick one of the 3 cases. Defend your verdict in 3-4 sentences."*

Cases: (1) selling peanut snacks without disclosure; (2) charging different prices to different friends; (3) running a service without telling parents.

Model answer (case 1): "*This is over the line. A peanut allergy can put a kid in the hospital. Even if no buyer is currently allergic, you can't sell food without disclosing peanuts — it's a safety violation, not a marketing choice. The fix: every package gets a 'CONTAINS PEANUTS' sticker before it leaves my hands.*"

Scoring guide (3-2-1): - **3:** Verdict + a specific real-world consequence + a fix. - **2:** Verdict + reason but no fix. - **1:** Verdict only.

Performance Task: Roles Pack (RACI + Ethics Verdicts) (60 min).

Child completes a RACI chart for a 4-task, 4-person project AND writes 3-4 sentence verdicts on three "legal but sketchy / fully fine / over the line" cases. **Rubric:** Reflection Writing Rubric (Grade 6): (1) RACI follows the rules (one A per task), (2) all 3 ethics cases have a verdict + reason + fix, (3) one written reflection on which case was hardest. **Strand outcome:** LTO + ESL.

Extension (advanced learner):

"*In your RACI, one teammate has 5 R's and 4 A's; another has 1 R and 0 A's. How do you re-balance, and what's the fix-conversation you have with the over-loaded teammate?*" Targets workload + conflict; previews Grade 9 conflict styles.

Unit 4: Run the stand-up

MC1. *"In a Did → Doing → Stuck stand-up, 'Stuck' means..."*

A. Pretending nothing's wrong · B. Naming a specific blocker so the team can help · C. Quitting · D. Asking for sympathy

Answer: B · **Standard:** *CASEL Self-Management.* · **Strand outcome (LRCI, 6):** *I can run a weekly "stand-up" review with 3 prompts (Did → Doing → Stuck) for*

two consecutive weeks and adjust my plan once. · **Misconception targeted:** "*Reporting blockers makes you look weak*" — corrects.

MC2. *"After 2 weeks of stand-ups, you adjusted the plan once. Which is the BEST adjustment example?"*

A. We changed the team's name · B. We moved 'price-test' from Week 4 to Week 2 because customers asked about price first · C. We decided to work harder · D. We added more meetings

Answer: B · **Standard:** *NGSS-ETS MS-ETS1-3 — Analyze data from tests.* · **Strand outcome (LRCI, 6):** *I can run a weekly "stand-up" review with 3 prompts (Did → Doing → Stuck) for two consecutive weeks and adjust my plan once.* · **Misconception targeted:** "*Adjustment is admission of weakness*" — corrects.

MC3. *"Your stand-up notes show: Week 1 sold 12 units, Week 2 sold 8. Which question best fits 5 Whys here?"*

A. Why are we so bad at this? · B. Why did Week-2 sales drop by 4? · C. Why does anyone bother? · D. Why is customer X mean?

Answer: B · **Standard:** *CCSS-Math 6.SP.B.5 — Summarize numerical data.* · **Strand outcome (PSIG, 6):** *I can use the "5 Whys" technique on a business problem.* · **Misconception targeted:** "*5 Whys is for big problems only*" — corrects.

SA1. *"Write 2 weeks of stand-up logs (Did → Doing → Stuck) for a hypothetical 6th-grader running a button-pin business."*

Model answer: "*Week 1: Did — printed first 30 buttons. Doing — testing pricing at lunch. Stuck — printer ran out of ink mid-batch. Week 2: Did — sold 12 buttons at $1, refilled ink. Doing — designing 3 new patterns. Stuck — pattern voting takes too long; need a faster way.*"

Scoring guide (3-2-1): - **3:** Both weeks complete with all 3 prompts each, specifics named. - **2:** Both weeks but one prompt vague. - **1:** One week complete or prompts off-purpose.

SA2. *"Based on those 2 weeks, write ONE specific adjustment to your plan. Include the reasoning."*

Model answer: "*Adjustment: switch from full-class voting to a 5-classmate beta panel for new patterns. Reason: full-class vote took 20 min; beta panel takes 5 min and the buyers' opinions weighted higher than non-buyers.*"

Scoring guide (3-2-1): - **3:** Adjustment is specific AND reasoning ties to a real stand-up observation. - **2:** Adjustment specific, reasoning vague. - **1:** Adjustment vague.

Performance Task: Stand-up Pack + 5-min Capstone Defense (2-week run + 5-min defense).

Child keeps two weeks of Did → Doing → Stuck logs, makes one documented adjustment to the venture plan, and presents it in a 5-minute Capstone defense. **Rubric:** Pitch Presentation Rubric (Grade 6 — Q&A optional): (1) two complete logs, (2) one specific adjustment, (3) defense names a real metric (sold X, blocker Y), (4) honest claims (no "everyone wants this"). **Strand outcome:** LRCI + LTO + PSIG.

Extension (advanced learner):

"*Your stand-up adjustment didn't work — Week 3 sales fell again. Run a second 5-Whys, propose a second adjustment, and explain what you learned about adjustment-quality.*" Plants the PDSA seed for Grade 8.

Total this grade: 12 MC + 8 SA + 4 Performance Tasks + 4 Extensions = 28 items.
