SCAFFOLDING MAP

Purpose. Show, vertically and explicitly, how each of the 8 strands compounds K→12. Every grade's outcome is the input to the next grade's outcome. This file is the curriculum coordinator's spine: when a Grade 9 teacher asks "what is the student bringing in from Grade 8?" the answer is here.

Author. Senior K-12 entrepreneurship + financial-literacy curriculum specialist (Cash to Company curriculum review, Round 2, 2026-04-25).

Reading method. Read down a column to see one strand grow K→12. Read across a row to see how all 8 strands at one grade braid together. The "What carries forward" column at each grade names the durable artifact, habit, or vocabulary the next grade can assume.

Anchor rule. Every strand outcome quoted here is **verbatim from the Master Scope and Sequence**. No paraphrasing.

Strand 1 — BAVC (Business Awareness & Value Creation)

Grade	Verb (what they do)	Outcome (verbatim)	Carries forward
K	Name	"I can name three businesses in my community and tell one way each business helps people."	Concept: every business helps somebody. Vocabulary: business, helps, community.
1	Sort	"I can sort five businesses into 'makes a thing' or 'does a thing' and explain my sort."	Distinction: products vs. services. The make/do sort is the seed of "what does the business do for the customer."
2	Identify	"I can identify a problem... and name a business that already solves a problem like it."	Frame: business = problem solver. Sets up Grade 3's skills/hobbies/needs web.
3	Web	"I can complete a 'Skills + Hobbies + Needs I See' web with at least 3 entries each, and circle two business ideas it suggests."	Method: ideas come from intersecting your skills with someone's need.
4	Summarize	"I can read or watch a short business profile and summarize what the business does, who it helps, and how it makes money in 3–5 sentences."	Pattern: what / who / how-paid is the spine of every business description. Grade 5 builds price on top.
5	Explain	"I can explain in writing how a real business creates value — what they make/do, who pays, and why someone is willing to pay."	Concept: value. The price you set in Grade 5 came from value the customer perceives.

SCAFFOLDING MAP

Grade	Verb (what they do)	Outcome (verbatim)	Carries forward
6	Map	"I can map a business's 'value chain' — supplier → producer → seller → customer — for one real business with at least one example at each stage."	Lens: a price is the end of a chain, not a guess.
7	Compare	"I can compare two real businesses targeting the same age group, identify what each gets right about the customer, and recommend one improvement for each."	Habit: comparative thinking — never read one company in isolation.
8	Diagnose	"I can analyze a business case (1–2 pages) and identify which of three 'value levers' (better product, lower price, better experience) it pulled and how."	Vocabulary: value lever. Sets up Grade 9 BMC Value Proposition.
9	Model	"I can map a Business Model Canvas for a real venture (9 boxes...) with evidence in each."	Artifact: a 9-box BMC with evidence. Becomes Grade 10's input for "what kind of thing is this?"
10	Categorize	"I can explain the difference between a hobby, a side hustle, a small business, and a startup, using 4 real-world examples with evidence."	Self-knowledge: the student can name what they're trying to build.
11	Case-study	"I can analyze a successful local business... and identify three decisions that drove its growth."	Pattern recognition: real founder decisions, not theory.
12	Defend	"I can deliver a portfolio defense in which I explain the businesses I would and wouldn't start, with reasons grounded in market, fit, and capital."	Mature founder posture: choose what to build and what to decline.

BAVC compounding logic. K-2 builds the noticing reflex. 3-5 builds the mapping reflex. 6-8 builds the comparative reflex. 9-10 builds the modeling reflex. 11-12 builds the choosing reflex. By Grade 12 the student doesn't read businesses; they read the decisions inside businesses.

Strand 2 — PSIG (Problem Solving & Idea Generation)

Grade	Verb	Outcome (verbatim)	Carries forward
K	Describe	"I can describe a problem someone has... and name one thing a business could make or do to help."	First problem-spotting move.

SCAFFOLDING MAP

Grade	Verb	Outcome (verbatim)	Carries forward
1	List	"I can list three things people in my home need done and circle one that a business could do for money."	Bridge: the world has needs that map to businesses.
2	Card	"I can fill out a 'Problem → Idea' card... and share it with a partner."	Artifact: the Problem-Idea card. Used in Grade 3 brainstorm.
3	Generate	"I can generate at least 5 business ideas from a single problem prompt and pick the most 'real-sounding' one with a reason."	Skill: divergent then convergent ideation.
4	Reality-check	"I can take an idea and run it through a 5-question 'Reality Check'..."	Filter: not every idea is real. The 5 questions become Grade 5's pitch spine.
5	Cluster	"I can take three problem prompts and run each through brainstorm → cluster → vote..."	Group ideation — democratic but evidenced.
6	5-Whys	"I can use the '5 Whys' technique on a business problem... to find a possible root cause, written out."	Root-cause thinking — Toyota's gift.
7	Statement	"I can draft a problem statement in the form '[Customer] struggles with [problem] when [context], because [cause]' using interview evidence, not assumptions."	Discipline: evidence over assumption. Not the same as Grade 6.
8	Funnel	"I can run a structured ideation flow (problem → 10 ideas → 3 finalists → 1 selected) using at least 2 named techniques (SCAMPER, 'How Might We')."	Two named ideation techniques in their toolbox.
9	Discover	"I can run a customer-discovery cycle with 5 real interviews (or recorded surrogates), code the patterns, and write what changed in my hypothesis."	Practice: real customer evidence loops back into the problem statement.
10	Premortem	"I can take an idea and stress-test it with a 'premortem'... and rank the top 3 risks."	Klein move: imagine failure to prevent it.
11	Backlog	"I can take a stalled venture... and produce a 5-experiment 'growth backlog' with hypothesis, test, and metric for each."	Founder craft: stalled isn't dead, it's testable.
12	Journal	"I can produce a 'founder's journal' (10+ entries) showing my idea evolution, evidence collected, and one pivot with the reasoning behind it."	Portfolio artifact: a longitudinal record of one's own thinking.

PSIG compounding logic. Notice → list → card → generate → filter → cluster → root-cause → state → funnel → discover → premortem → experiment → journal. Each step adds either rigor (5

Whys, premortem, problem statement) or scale (interviews, growth backlog, journal). By Grade 12, the student treats their own thinking as an evidence-tracked artifact.

Strand 3 — MFL (Money & Financial Literacy)

Grade	Verb	Outcome (verbatim)	Carries forward
K	Identify	"I can identify a penny, nickel, dime, and quarter, and tell which is worth more in a pair."	Coin recognition. (The dime-is-bigger-than-a-nickel-but-worth-more misconception is named in K Common Misconceptions.)
1	Count	"I can count a mixed group of coins up to 50 cents and tell whether I have enough to buy a 30-cent item."	Sufficiency: do I have enough?
2	Make change	"I can make change from a dollar for an item that costs less than a dollar, using coins."	Reverse arithmetic. The "count up" method is taught here.
3	Profit	"I can calculate cost, revenue, and profit for a simple lemonade-stand scenario with whole-number prices."	First three-term equation: Profit = Revenue − Cost.
4	Budget	"I can fill in a 1-page budget for a small classroom event with at least 4 categories that does not exceed a $50 cap..."	Constraint: budgets are bounded.
5	Margin	"I can calculate unit cost, set a price using a target margin (e.g., 40%), and predict total profit at multiple sales volumes."	Pricing rule: cost + margin = price. Multiple-volume thinking.
6	Ledger	"I can build a one-month income/expense ledger for a hypothetical 12-year-old's small business with a savings rate goal expressed as a percentage."	Records over time + savings rate as %.
7	Per-customer	"I can calculate per-customer revenue, cost of acquisition (proxy), and contribution margin for a small business scenario, and explain why all three matter."	First contact with contribution margin.
8	Break-even	"I can build a simple break-even calculator (units × price = fixed + variable × units)..."	Linear equation as business tool.

Grade	Verb	Outcome (verbatim)	Carries forward
9	P&L	"I can build a simple one-year P&L (income statement) for a venture with revenue, COGS, gross margin, operating expenses, and net income."	First financial statement.
10	Compare funding	"I can compare three ownership/funding sources (bootstrap savings, small loan, friends-and-family) using interest, control, and risk as criteria..."	Adult money decision: not just "do I have it" but "what does it cost me?"
11	Cash flow	"I can build a 12-month cash flow forecast (cash in, cash out, ending cash) and identify the month where cash gets tightest, with a fix."	Founder skill: cash beats profit.
12	Statement pack	"I can build a complete startup financial pack (P&L, cash flow, balance sheet sketch, runway, unit economics) and walk a non-finance adult through it."	Three-statement literacy. Plus runway.

MFL compounding logic. Coin → count → change → profit → budget → margin → ledger → contribution margin → break-even → P&L → cost-of-money → cash flow → three-statement pack. This is the cleanest arc in the curriculum — it would stand alone as a personal-finance program. Two seams to honor: (1) Profit = Revenue – Cost (Grade 3) is the first time three numbers must be true at once; (2) contribution margin (Grade 7) is the first time a number can be negative when revenue is positive — counterintuitive enough to need its own lesson.

Strand 4 — CBM (Customers, Branding, Marketing)

Grade	Verb	Outcome (verbatim)	Carries forward
K	Match	"I can match a business sign or logo... to what that business does."	Symbol → function.
1	Sign	"I can draw a sign for a pretend lemonade stand that shows the name, what is sold, and the price."	Three-element message.
2	Helper signage	"I can draw a 'sign that helps customers'... and explain why it helps."	Customer-centered design.
3	Logo + name	"I can draw a logo and choose a name for my business idea and tell what each communicates to a customer."	Brand asset awareness.

Grade	Verb	Outcome (verbatim)	Carries forward
4	Statement	"I can write a 1-sentence 'this is for ___ who needs ___' customer statement for my business idea."	Customer specificity in writing.
5	Pitch	"I can write a 30-second 'elevator pitch' for my business idea that names the customer, the problem, and the price."	Verbal pitch with three elements.
6	Segment	"I can identify the customer 'segment' my product serves and describe at least 3 things I know about that segment..."	Group-level customer thinking.
7	Persona	"I can build a one-page 'customer persona' with a name, demographic detail, daily routine, top 3 frustrations, and 3 channels..."	Individual-level customer thinking, evidence-grounded.
8	A/B test	"I can run a 3-day mini-marketing test (two posters, two messages) and report which performed better..."	Evidence-based message selection.
9	Position	"I can write a positioning statement using the form 'For [target] who [need], [product] is the [category] that [unique benefit] because [reason].'"	Positioning fluency.
10	Brand guide	"I can build a 1-page brand guide (name, tagline, two-color palette, one font, one voice rule)..."	Brand-as-system.
11	Sales	"I can run a structured sales conversation (open, discover, present, handle one objection, close) in a role-play and self-score against a rubric."	Live customer interaction.
12	Launch	"I can launch a venture (or convincing simulation) with a working brand, website/landing page, and at least 5 real customer interactions."	Real customers in the wild.

CBM compounding logic. Recognize symbols → make a sign → make a logo → write a statement → say it aloud → describe a group → describe a person → test two messages → position vs. competitors → systematize the brand → talk to one customer in a real sales conversation → talk to 5 in the wild. Every rung uses the previous as scaffolding.

Strand 5 — OSO (Operations, Systems, Organization)

Grade	Verb	Outcome (verbatim)	Carries forward
K	Sequence	"I can put three pictures of 'making a sandwich' in the right order."	First-order: order matters.

SCAFFOLDING MAP

Grade	Verb	Outcome (verbatim)	Carries forward
1	Follow	"I can follow a 4-step recipe card... and tell a partner each step in order."	Communicate a process to another human.
2	Checklist	"I can use a checklist to set up a 'store' station and check off each step as I go."	Checklists exist; checklists work.
3	Run-of-day	"I can list the 4–6 steps of running my business idea (open, sell, restock, close, count, clean) in order."	Business as repeatable cycle.
4	Plan template	"I can build a 1-page business plan template... and complete it for one idea."	One-page plan = business as document.
5	Inventory	"I can use a simple inventory tracker (start, sold, ending, restock) for a one-day classroom market and explain a discrepancy."	Counting reality vs. expectation.
6	SOP	"I can write a Standard Operating Procedure (SOP) for a 5-step process in my business... with checks for each step."	Operations as written artifact.
7	Feedback system	"I can design a 1-week customer feedback system (a 3-question survey + a 1-question post-purchase prompt)..."	Customer ops, not just product ops.
8	Project plan	"I can build a 4-week project plan with milestones, owner, and deadline; track actuals vs. plan; and write a 1-page variance explanation."	Plan vs. actual: variance is a tool.
9	Decompose	"I can break a venture into 3–5 functional areas, write objectives for each, and identify dependencies between them."	Functional thinking + dependencies.
10	Operating agreement	"I can complete a basic operating agreement template (roles, decisions, money handling, exit) for a 2-person teen partnership..."	Governance as written artifact.
11	Sprint board	"I can use a project management tool... to manage a 6-week venture sprint with weekly check-ins and demo days."	Modern team operations.
12	90-day plan	"I can write and follow a 90-day operating plan with weekly priorities, owner, and metrics, and report variance honestly."	Real-founder cadence.

OSO compounding logic. Steps in order → following others' steps → using checklists → writing my own steps → templating my plan → counting reality → SOPing → feedbacking → variancing → functioning → governing → sprinting → 90-daying. Note: Grade 10's outcome (operating

agreement) is governance, not operations strictly — flagged in Round 1 critique. The fix is forward: Grade 11 picks operations back up at sprint level.

Strand 6 — LTO (Leadership, Teamwork, Ownership)

Grade	Verb	Outcome (verbatim)	Carries forward
K	Take turns	"I can take turns being the 'shopkeeper' and the 'customer' in classroom dramatic play and use kind words for both roles."	Role flexibility.
1	Role-play	"I can play the 'customer' or 'worker' role in a classroom store and say one thing my partner did well."	Specific peer feedback.
2	Identify roles	"I can identify 'the boss,' 'the worker,' and 'the customer' in a classroom skit..."	Role taxonomy.
3	Take a role	"I can take a role (CEO, designer, money keeper, sales) on a 3-person team and describe what my role does."	Owning a role on a team.
4	Run a meeting	"I can run a 5-minute team meeting using a 3-item agenda (last week, this week, blockers) with my role assigned."	Meeting fluency.
5	Rotate	"I can rotate through 3 jobs (CEO, marketer, money keeper) across a multi-day project and write what I learned in each."	Multi-role empathy.
6	RACI	"I can fill out a RACI chart... for a 4-task project with a 4-person team."	Responsibility clarity.
7	Lead huddle	"I can lead a 10-minute team huddle in which I assign one customer-research task to each teammate and follow up the next day."	Lead one short interaction.
8	Peer feedback	"I can give and receive a structured peer feedback round using 'What's working / What's confusing / One change I'd try'..."	Two-way feedback.
9	Conflict style	"I can identify my own conflict-handling style (avoid, accommodate, compete, compromise, collaborate) and pick one I want to improve, with a plan."	Self-knowledge as collaborator.
10	Vision	"I can draft a 1-page vision statement for my venture, defend it in a 3-minute pitch, and capture pushback into a revision list."	Stand for something + revise.
11	Lead 4 weeks	"I can lead a 3-person team through a 4-week project with a written team charter, weekly 1:1s, and a final retrospective."	Sustained leadership.

Grade	Verb	Outcome (verbatim)	Carries forward
12	Statement	"I can write a 'founder's leadership statement' with values, decision rules, and the kind of teammate I aim to be — and present it."	Mature self-articulation.

LTO compounding logic. Take turns → role-play → identify roles → own a role → run a meeting → rotate roles → RACI it → lead one huddle → exchange feedback → know your style → vision-cast → lead four weeks → state who you are as a leader. The Grade 9 conflict-style self-assessment is forward-referenced in Grades 11 and 12 (Round 2 fix).

Strand 7 — ESL (Ethics, Safety, Legal Awareness)

Grade	Verb	Outcome (verbatim)	Carries forward
K	Safety rule	"I can name one safety rule for a worker... and tell why it matters."	Rules exist for reasons.
1	Promises	"I can tell whether a 'promise' was kept (in a story) and explain why keeping promises matters in business."	Trust as the substrate of business.
2	Fair to customer	"I can tell whether something in a story was 'fair to the customer' and give a reason."	Customer-fairness lens.
3	Honest vs. misleading	"I can tell whether a business example is honest or misleading... and give one reason."	Truth in advertising — the kid version.
4	Kid-business rules	"I can list 3 rules a kid-run business should follow... and pick the most important one with a reason."	Age-appropriate self-governance.
5	Persuasion	"I can read a kid-aimed ad and identify at least 2 persuasive techniques (scarcity, bandwagon, authority) with examples."	Media literacy as ethics.
6	Legal-but-sketchy	"I can identify whether a business action is 'legal but sketchy,' 'fully fine,' or 'over the line'..."	Three-tier ethics decision.
7	4-point check	"I can apply a 4-point 'fair to the customer' check (clear claim, honest price, real reviews, easy returns)..."	Ethics as checklist.
8	Privacy/safety	"I can identify one privacy risk and one safety risk in a kid- or teen-run online business and write a 3-step mitigation plan for each."	Online business safety.

Grade	Verb	Outcome (verbatim)	Carries forward
9	Compliance survey	"I can identify which of these apply to a venture: business license, sales tax, ID-required products, age limits, PII protection..."	Adult-world compliance vocabulary.
10	Sole prop vs. LLC	"I can identify the right business structure (sole prop, LLC) for a sample venture using cost, liability, and complexity..."	First entity decision.
11	No-go list	"I can identify and apply 3 ethical guardrails... and write a 'no-go' list for my venture."	Pre-committed ethics.
12	Checklist	"I can produce a 1-page legal/ethical checklist for my venture (registration, sales tax, terms of service, privacy, payment safety) and confirm what's done."	Compliance closure.

ESL compounding logic. Rules exist → promises kept → fairness → honesty → kid-business rules → media literacy → three-tier ethics → ethics-as-checklist → privacy → adult-compliance vocabulary → entity decision → pre-committed no-go → final checklist. Round 2 adds contracts content at Grade 12 (was missing) — see CAPSTONE_PROGRESSION.md.

Strand 8 — LRCI (Launch Readiness & Continuous Improvement)

Grade	Verb	Outcome (verbatim)	Carries forward
K	Finish a job	"I can finish a small classroom job... and tell whether I did it the way it was supposed to be done."	Self-assessment seed.
1	Change	"I can show a finished classroom product... and say one thing I would change next time."	First revision instinct.
2	Ask classmate	"I can ask one classmate 'what would you change?' about a product I made, and write down what they said."	External feedback intake.
3	First-try story	"I can describe one thing a 'first try' business got wrong in a Cash story, and one fix the entrepreneur made."	Learn vicariously from failure.
4	Plan diff	"I can compare a 'before' and 'after' version of my plan and circle three changes I made and why."	Revision as artifact.
5	Debrief	"I can run a 'post-market debrief' answering 'what worked / what flopped / what I'd change' with at least 2 specific items each."	Three-question retrospective.

SCAFFOLDING MAP

Grade	Verb	Outcome (verbatim)	Carries forward
6	Stand-up	"I can run a weekly 'stand-up' review with 3 prompts (Did → Doing → Stuck) for two consecutive weeks and adjust my plan once."	Cadence-based reflection.
7	Day-1 vs. Day-30	"I can compare my 'Day 1 customer assumptions' to 'Day 30 customer evidence' and revise my product/messaging in 3 specific ways with reasons."	Pre/post belief artifact.
8	PDSA	"I can complete a Plan–Do–Study–Act (PDSA) cycle on one part of my business and document the change, the result, and the next test."	Quality-improvement discipline.
9	MVP test	"I can run a 2-week MVP test with a defined 'what would have to be true' success metric, and write a kill/iterate/scale recommendation."	Decide based on data.
10	Month review	"I can run a 'month in review' using 5 metrics... and propose two changes for next month."	Monthly cadence + multi-metric.
11	Pitch revision	"I can deliver a 5-minute investor-style pitch... and incorporate panel feedback into a revision."	External critique → revision.
12	Launch or Learn	"I can produce a final 'Launch or Learn' decision for my Capstone venture with evidence, alternatives, and a personal next step (start, shelve, transfer)."	Mature decision: yes, no, or not now.

LRCI compounding logic. Finish → change → ask → learn from a story → diff plans → debrief → stand-up → pre/post → PDSA → MVP test → month review → pitch revision → Launch-or-Learn. The single most important pedagogical move in the program: every year ends with the student looking at their own work and writing what they would do differently. By Grade 12, this is portfolio-level evidence.

How the strands braid (per grade band)

K-2: NOTICE + SEQUENCE + ROLE-PLAY

The dominant cognitive moves are noticing (BAVC, PSIG, ESL) and sequencing (OSO, LRCI). LTO is acted out in dramatic play, not talked about. MFL and CBM are concrete (coins, signs).

3-5: MAP + PLAN + WRITE

The dominant moves are mapping (skills/hobbies/needs web, value explanation), planning (one-page plan, $50 budget, 30-second pitch), and writing (customer statement, opinion writing on chosen idea). MFL adds whole-number profit math. The Cash always asks "how do you know?" habit forms here.

6-8: SYSTEMATIZE + MEASURE

The dominant moves are systematizing (SOP, RACI, segment, persona, project plan, A/B test, PDSA) and measuring (savings rate %, contribution margin, break-even, variance). The shift from "guess" to "test" is the band's defining move.

9-12: MODEL + DECIDE + EXECUTE

The dominant moves are modeling (BMC, P&L, cash flow, financial pack), deciding (premortem, funding source comparison, sole prop vs. LLC, kill/iterate/scale, Launch or Learn), and executing (5 interviews, 6-week sprint, 90-day plan, real customers). The shift from "test" to "do" is the band's defining move.

What a teacher can assume at each grade (entrance ticket)

- **Grade 1 teacher assumes:** coin recognition (penny/nickel/dime/quarter), make/help vs. someone else's job, sequence pictures, take turns in dramatic play.
- **Grade 2 teacher assumes:** make/do sort, count coins to 50¢, follow a 4-step recipe.
- **Grade 3 teacher assumes:** make change from $1, problem-idea card, classroom store role taxonomy.
- **Grade 4 teacher assumes:** profit = revenue – cost, generate 5 ideas, run-of-day list, take a role on a 3-person team.
- **Grade 5 teacher assumes:** 1-page plan, $50 budget under cap, customer statement, business plan template literacy.
- **Grade 6 teacher assumes:** target-margin pricing, 30-second pitch, debrief habit, rotate roles + reflect.
- **Grade 7 teacher assumes:** customer segment description, monthly ledger with savings rate %, RACI, SOP, weekly stand-up.
- **Grade 8 teacher assumes:** customer persona, contribution margin, customer feedback system, 10-minute huddle leadership, Day-1-vs-Day-30 revision.
- **Grade 9 teacher assumes:** A/B test, break-even calculator, 4-week project plan, peer feedback round, PDSA.
- **Grade 10 teacher assumes:** BMC with evidence, 1-year P&L, positioning statement, conflict style self-knowledge, 2-week MVP test.
- **Grade 11 teacher assumes:** funding source comparison, brand guide, operating agreement literacy, vision statement, month review.
- **Grade 12 teacher assumes:** 12-month cash flow forecast, sales conversation, sprint board, 4-week team leadership, pitch revision.

If a student arrives without these, the receiving teacher's first move is the appropriate Lesson 1 of the previous grade as a 1-day catch-up. The Implementation Guide names this in Cross-grade coordination.

SCAFFOLDING MAP

What a graduate carries out of Grade 12 (the spine)

By the end of Grade 12, a Cash to Company graduate has demonstrably done (not just learned about):

1. **Read a Business Model Canvas** they themselves filled with evidence (Grade 9).
2. **Built a one-year P&L, a 12-month cash-flow forecast, and a startup financial pack** (Grades 9, 11, 12).
3. **Run at least 5 customer interviews** and revised a hypothesis on the basis of patterns (Grade 9).
4. **Run an MVP test** with a defined "what would have to be true" success metric (Grade 9, deepened in Grade 12).
5. **Compared three funding sources** and written a recommendation (Grade 10).
6. **Completed a basic operating-agreement template** for a 2-person partnership (Grade 10).
7. **Identified the right business structure** (sole prop or LLC) for a sample venture, with reasoning (Grade 10).
8. **Run a structured sales conversation** in role-play, scored against a rubric (Grade 11).
9. **Led a 3-person team** through a 4-week project with a charter, 1:1s, and retrospective (Grade 11).
10. **Delivered a 5-minute investor-style pitch** and revised on panel feedback (Grade 11).
11. **Launched a venture or convincing simulation** with brand + landing page + 5 real customer interactions (Grade 12).
12. **Written a 90-day operating plan** with priorities, owners, metrics, and honest variance (Grade 12).
13. **Produced a 1-page legal/ethical checklist** for the venture (Grade 12).
14. **Written a founder's leadership statement** (Grade 12).
15. **Made and defended a Launch-or-Learn decision** with evidence (Grade 12 Capstone).

This list is the student's portfolio. The REAL_VENTURE_READINESS_CHECKLIST.md maps each item to standard founder skills.

End of Scaffolding Map. Maintained alongside the Master Scope and Sequence. When the Master Scope changes, this map updates within the same edit cycle.

One promise.

Scaffolds are the floor. We raise it slowly. We never pull it out.

Cash to Company is built so a curriculum coordinator, a foundation officer, a parent, or a teacher can pick up any one of these strategic references and meet the program at full strength on the first page.

No promise of wealth. No probing of family finances. No partisan content. One question, asked patiently for thirteen years: which people, and how do you know?

For educational and operational use. This document is informational and does not constitute financial, legal, or tax advice. Standards alignment is cited per the Cash to Company Standards Alignment Map (Jump$tart, CEE, CCSS, C3, CASEL, NGSS-ETS).
